

# SHOP TALK

**MACHINE SHOP**—The boys at the machine shop are all very busy doing odd jobs on the campus. Bud Archambeau has made repairs in the laundry and elsewhere.

Ralph Minnick, the cave man from Pendleton, is a new comer here.

Tony Shoulderblade has also made repairs on certain articles on the campus.

**CARPENTER SHOP**—The two crows, Frankie Backbone and Wesley Fallsdown are working on the new building.

John Slickpoo, the kid from Pendleton, is a welcome addition to our force since Christmas.

At Christmas time, word came from the following ex-carpenters. Louis "Snoopo" LeVay is working at his home near Culbertson, Montana. "Check" Warrior has been working on a concrete farm building on the Crow Indian Agency. We also hear the Red Eagle and the Bighorn brothers have a fine basketball team at Brocton Mont. Leonard Vivette is busy at his job in Chilquin Ore.

Alfred Clarke, Paul LaRoque, Ernest DuBray, and Mr Bigspring have made two doors for Mr Showalter's trailer garage.

Fred "Monk" Lodge, Steven Hall "Scout" Arnoux and John Gerard are making progress between showers on the greenhouse.

Active operations are soon to start on a new cottage and double garage on the North East end of the campus if the weather permits.

**SHOE SHOP**—Vacation is over and the boys are all back and just as happy as if they had good sense. No fooling, the boys are all very good. Between basketball and shoes they get along swell. They are enjoying life at Chemawa and getting an education as well.

There are ten boys that are keeping Chemawa on their feet. Not bad we say. Come up and see the boys do their stuff.

**TAILOR SHOP**—The tailors at present are very busy making baseball suits for the Santa Fe Indian School.

Frank "Cristy" Amyotte has finished a suit coat and now is working on an overcoat.

Joe Reddoor and "Chuck" Farron are working on suits.

Kendal Van Pelt and Clifford Day are working on the baseball suits.

Jay Hedderick is almost finished with a suit coat.

Joe Shippentower is a new addition to our tribe.

Charley Sams and Clarence LaRoque are kept very busy pressing and altering suits, and other wearing apparell.

**BAKERY SHOP**—Due to the fact that we had to work every day during the Christmas vacation, making pies, cookies, hot rolls, and cakes for the student body and parties, the bakery boys say they will take their vacation next summer.

For the New Year's party we had to make 900 cookies. For meals of the student body, we made 62 pies, 6 large pans of cake and about 400 hot rolls.

Our large bread mixer was broken down and could not be used for about five days until it was fixed. Now we put out about 132 loafs of bread a day

**HOME MECHANIC**—The senior home mechanic girls in Mr. Allen's class have been repairing broken articles such as waste baskets, dust mops, and window shades. They have also been making recipe boxes.

Mary Murphy and Gladys Foster repaired the washing machine. The girls will soon study wood-carving.

**HOME ECONOMICS**—Mrs. Jame's Senior Home Ec. girls, who have been sewing colorful spreads for their hope chests, are very busy. Some of the spreads are almost completed.

The girls are also knitting and starting on silk dresses.

Mrs. Lane's seventh and eighth grade sewing classes are finishing laundry bags, aprons, dolls, and bathrobes for this quarter's work.

The GI-C grade Food classes are completing their second quarter of foods. Main dishes for luncheons are stressed.

The G-I-A class is studying and preparing food suitable for breakfasts.

**PRACTICE COTTAGE**—Katherine Tonasket and Esther Plentyhawks have completed their stay at the practice cottage.

Verna Riggs and Marjorie Matheson have recently moved in.
