

by Stops and Takes The Enemy for the shop. The benches for the atheletic field have been completed and painted grey.

BAKING: The bakery boys are progressing slowly but surely. The cakes are made by Rice and Gardipee, while Beaudry and Edden are getting to be experts in dough moulding, with Joseph as all-around baker. Plain, orange, and fudge cakes, apple, and chocolate pies, brown sugar cookies, peach cobbler, and bread were baked this week.

MACHINE SHOP: Some one became extra ambitious and carved, out of wood, a pair of handles for a farm implement. The other boys are welding or making corner braces for "Lefty's" drawing tables.

PLUMBING SHOP: The plumbers have connected the sink in the matron's quarters in McBride hall. They are drawing all unoccupied buildings that have water in preparation for winter.

ELECTRIC SHOP: The electricians have started wiring the Practice Cottage, and are reconstructing the telephone wires.

CARPENTER SHOP: Fred Lodge and Emmet Douthit are still working on the new Practice Cottage. The myrtle wood extension table for Mrs. Henderson is well under construction.

TAILOR SHOP: Two of last years' tailors are now working on coats and are doing nicely. The rest of last years' tailors are working on trousers for bus drivers' uniforms.

PAINT SHOP: The new boys have been learning the art of staining and varnishing. Robert Charles has been painting the interior of the Employees' Club.

PRINT SHOP: Every student has been working on a project and many have been finished since the last publication. Joe Broncheau completed 500 employee record blanks for the main office. Gilbert Matthews has set-up and ready for printing 1000 grade report cards. Carl Wood has been a busy lad. He completed 500 room check blanks for the grade school; set-up a similar job for McNary hall and was called to duty to print 2,500 quarterly report blanks. George Sloan did an excellent job on a two-color combination menu and program for a vocational meeting and is working on a 16-page layout for a pictorial magazine of the campus. Ralph Jacobs, refugee student, is making progress in his work. He has completed two complicated rule jobs for the dairy and large room chart for Brewer hall. He had his first "taste" of the

cylinder press on the latter job. Lewis Goodluck, as one of his first jobs, completed 1000 library cards. Fred Samuels designed and printed letterheads for his Home Room which was done in two colors. Fred was also head make-up man on the paper this week. William Bighead spent some time studying letterheads and did a neat job on his first attempt for the Commercial department.

Art Van Pelt spent some time studying the unit on business cards and made a test case of his knowledge by printing 50 cards for Mr. Rickard. Dan Snipe, Arthur Shilo, Leslie Brendible and Harris Teo are busy on projects which will be completed when the paper has been "put to bed." Mr. Shilo was head proofreader for the paper this week and spent much of his "short intermissions" studying the unit. "The Newspaper Proofreader and his Job." Master Joe Hayward, special student, printer, and journalist, has had duties too numerous to print and deserves praise for his congenial attitude and help during times of stress. Last but not least, Wilbur Wolfname, his winning smile takes the gloom out of our everyday routine. Wilbur is a beginner and a conscientious student.

From The ALUMNI

Elizabeth Arthur, '40, is working as a stenographer at Warm Springs, Oregon.

Arlene Bingham is attending the Commercial Business College in Sacramento, California.

Henry Scalpcane, '40, is employed in an office at Lame Deer, Montana.

Mr. and Mrs. Alpheus Big Horn (Josephine Juneau) are the proud parents of twins—a boy and girl.

We learned that Perry Smith from Metlakatla, Alaska, class of '31, is taking an advanced course in dentistry at Portland, Oregon.

Irene Arcasa and Dorothy Southern, graduates of Chemawa, are working at the Nespelem Agency office. Zena Hogsed, class of '39 is also working there.

George Motchman, '30 graduate, was a recent visitor on our campus. He is on a business trip to the States from Fairbanks, Alaska, where he is working at the Army Air Base. His duty is to find out how the airplanes are assembled at San Francisco, California, and then return to Fairbanks and be in charge of assembling the airplanes at the base.
