

From the Vocational Departments

TAILOR SHOP: Suit pressing is the greatest amount of work that is done in the tailor shop. Three of the new boys are working on pants, and others are learning to take measures and draft patterns for pants and are doing good work.

SHOE SHOP: In the shoe shop the boys are always busy doing any kind of work that is to be done in the line of shoe repairing. The boys are working just in the mornings and they claim that they put out more shoes than the "Shirt Tail Tribe" is wearing around.

MACHINE SHOP: In the absence of Mr. Allen the boys in the machine shop are busy with Berger and Max Jackson as foremen. They take turns welding the back stairway of the McNary hall, and have put on a new side railing. The new boys are learning the different tools that are in the shop.

AUTO MECHANIC: Stanley Wilder, with the help of his assistant, Eddie Nicholson, are tightening bearings on Coach Bennett's car. "Shorty" Cross and Elliott Brown are overhauling the government pick-up truck. Walter Mesplie, the foreman, is fixing the carburetor on the project truck.

PAINT SHOP: With Robert Charles as foreman, the boys in the paint shop refinished the tables in McBride hall. They also replaced broken windows in McNary hall, hospital, and the green house.

ELECTRIC SHOP: The boys in the morning division spent last week installing under-ground telephone cables, and the afternoon division with Chester Paul, as foreman, installed wall switches in the halls of the vocational building.

PLUMBING: The boys in the plumbing shop, consisting mostly of NYA students, are repairing the pitchers in the students' dining hall and installed a laundry tray at Mr. Salter's quarters. They repaired faucets and installed valve handles on the wash sink valve at Brewer hall.

MANUAL TRAINING: The manual training department is devoting the rest of their time in making Christmas toys for the smaller children in Brewer and McBride halls.

CARPENTER SHOP: The two special students, Lodge and Douthit, have just finished the chimney on the new practice cottage. Wilfred Teton made a table out of an old condemned piano. Alfred Whitford is starting to turn out a myrtle wood lamp for a Christmas present.

BAKERY: Along with the regular production,

the bakery boys have started the study of the ingredients used in making bread. Flour and shortening are the two subjects for this week.

Production for this week are as follows: 10 pans of coconut cake, 600 ginger cookies, 100 coffee cakes, 100 cream pies, 10 pans spice cakes, 1500 biscuits and 940 loaves of bread.

BARBER SHOP: The boys in the barber shop are without the service of hot water since the tank sprang a leak, and so they have to shave with cold water. Mike Finley and Louis Beaudry are in the hospital getting their tonsils removed.

Woundedeye is getting more practice in cutting the little girls' hair and in giving massages.

PRODUCTIVE SEWING: The seventh grade girls are making piece work for pillow tops for their rooms.

The Freshman girls are busy sewing sheets, and have finished several hundred sheets.

The girls in the Junior class have been making night gowns for the smaller girls, and are kept busy doing this.

The Freshman girls in Miss Sadongei's sewing class have finished making underslips, and are studying the various kinds of cotton materials.

The Sophomore class, in child care, have started a unit of, "Hereditry and Environment of a Child." Dr. Faxon visited the class one day and answered many questions on health.

COMMERCIAL: The Senior class is progressing very well in their shorthand and typing classes, and have started on the more difficult work in shorthand. All are doing good work in their typing class.

The Special class have new books entitled, "Shorthand Dictation Studies," and are starting to study from this book. In the typing class they have been working on rough drafts, and have cut all the stencils for mimeograph work for the school.

CLOTHING: The girls in the Junior class are working on rain coats for the small girls, and will soon have them completed. The knitters have finished caps and scarfs, and have started making knit blouses. They are continuing their study of textiles.

The Sophomore girls have finished their house coats, and dresses for smaller girls. Those who have completed the dresses for the smaller girls will start on a simple wool dress or skirt for themselves.

FOODS: The Sophomore girls are still on the
