Editorial

Yes, you can be a leader! You can develop your inner self and talents to become an outstanding student and leader right here among your friends and associates. Leadership is a thing that can be accomplished by people just like yourself.

But, you must put forth a lot of effort. You must know the "do's" and "don'ts" of leadership, and apply yourself to it wholeheartedly. In the first place, you should have initiative. That is, you must be a "self-starter"—be capable of starting new and interesting as well as worthwhile projects. Then, secondly, you have to show enthusiasm and interest for the proposed project. In other words, you should be "sold" on the idea yourself, making your enthusiasm genuine. Thirdly, you must possess courage—to face your followers critics—and determination to carry through once you have begun. It takes courage and determination; and gives sincere poise to fellow workers. You have been challenged to become leaders—why not start now? You can accomplish leadership if you try!

This school term will soon be over and it will be the last school term for some students here, but it isn't the end of your education. It is only the beginning. Some of you might not have received good grades in classwork, memorizing facts but you didn't come here to get the highest grades possible. You came here to learn to think—to think for yourself. Thinking is classed as one of the hardest things to do. If you have started to learn to think and to concentrate, your stay here has been well worthwhile.

Before you leave school this year, think this over. Is your summer vacation well planned? Do you know what you want to do? Are you going

to school next year and have you made plans for it? To you, who are graduating and know you aren't going to school anymore, who are going right to work, we wish much success and we hope that you feel able to do what will be required of you. To think you can do it, is the job half done. But to you, who aren't graduating, yet want to quit, give it another thought. Do you want to join the millions who are unemployed and untrained? If not, then let's go on, if you quit now, it will always be easy for you to quit in anything that you may be doing.
