

Pep Club

Chemawa has a new organization, The Pep club. It hasn't appeared often yet, but in the months to come the Pep club will be recognized.

Most of the girls feel privileged to be a member because they are twenty-five girls with good citizenship.

The Pep club girls' duties are to be at the games and get right in there and cheer, winning or losing; Another duty is to provide amusement and entertainment during the halves of the games.

This club will have the privilege of going to off-the-campus games.

Mary Agnes Simmons is president; Virginia La-Fromboise, vice-president; and Leona Bell, secretary. The yell queens are Theresa Matt, Loyette Moppin, Gayle Stone and Elsie Granlose.

Miss Ziebach is the sponsor of this organization.

Indian Club

The girl scouts of Silverton held a benefit pageant early this winter, illustrating the history of their community.

The pageant could not entirely be complete without an Indian scene nor could it be well imitated amongst themselves so a group of our students who were familiar with various kinds of Indian dances were called upon for a part in the evenings performance.

We were all very proud of these students for their entertainment was said to be the highlight of the evening.

Junior Class

The junior class consists of twenty-six students, nine girls and seventeen boys.

We have elected the following people for our room council: President, Earl Davis; vice-president, Harry Cooper; secretary, Elinor John; sergeant-at-arms, Jimmy Chocktoot.

We have been unlucky with our teachers so far. We have had three temporary teachers. Miss Beatrice Morse seems to be our permanent teacher. We are all very fond of her and hope she remains with us. We have been studying all about the northwest in history. We also have biology in which we were learning to dissect cray fish and perch. It was very interesting, but not very appetizing!

Agriculture

The ag class is studying the different varieties of feeds and their minerals to find out how much protein carbohydrates there are in roughage and concentrate.

All the ag boys are looking forward to having steam heat in the classroom.

Several of the boys are working on projects. Ten of the boys have pigs and three boys have calves for project work. These will be exhibited at the close of school to see whose project gets first prize.

Every year just about this time, the ag boys have to spray the orchards. The first to be sprayed is the peach orchard. They spray it with Bordeaux mixture to prevent "leaf cure."

The boys are building a clubroom in the back end of their classroom. It will be finished with a cabin effect. There will be a fire place and the interior will be finished with knotty pine. There will also be several rugs, couches and lamps for the room. Also a gas range for cooking, in the kitchen, and a work bench (for cooking), cupboards and a wash basin.

Our agriculture instructor with five students visited Silver Creek Falls grounds and made a drawing of their stone fire place so we could build a similar one for our clubroom.

Canning Department

The canning season opened on July 5 beginning with cherries which amounted to 414 cans; string beans, 1,888; prunes, 3,277; tomatoes, 2,047; tomato juice, 220; corn, 1,234; pears, 828; pear jam, 188; prune jam, 69. All were canned in No. 10 cans.

There were 7,000 cans of fish put up. Half belonged to the school the other half was given to the people who caught the fish.

The last day of canning was on Nov. 5. All the canned goods were cased after the canning season.

Birthday Celebration Monday, Feb. 25

Chemawa will be 66 years old . . . Students should be looking over their class beauties for possible Birthday Queen candidates . . . Let's all help with the work and . . .

Make it the best Birthday Party Yet!
