

## SHOP TALK

### AUTO SHOP

The auto shop began the year with one senior, three juniors, six sophomores, and three Navajos on the class rolls, making a total of thirteen, the largest class for several years. The Navajo boys take auto mechanics for one hour a day, this being their third year at Chemawa. They are Joe Lee, Jimmy Dickson and Lewis Silver.

A complete Ford V-8 engine has been purchased for use in the engine laboratory and after it is set up with all the accessory systems, so that it will run, it is to be used as a practice job in disassembling, servicing and assembling.

The boys are preparing to take the state driving tests so as to obtain their operator's licenses, which is one of the goals of the auto shop.

### INDUSTRIAL ARTS SHOP

There are 14 junior high in the industrial arts shop. They are learning about the care and use of the most important tools. The class has made and painted many articles, including ping-pong paddles for the first and second grades, lettermen's paddles, and a bench hook. These projects have all been made with hand tools.

Those enrolled in the class are 7th grade; Iake Gilbert, Jerry Lafayette, Lester Lowden, Leonard Ouenelle, Roger McKenzie, Charles Morton, Franklin Wilbur, Jimmie Whipple, and Frederick Reed.

From the 8th grade: Clyde Sampson, Clarence Henthorne, and Lloyd Sanders. The ninth grade boys include Farrell Gallineau and Frank Spearson.

### SHOE SHOP

The shoe shop has an enrollment of 12 boys. At the present time these boys are busy learning the proper method of putting heels and soles on shoes. They are also repairing dress shoes, football shoes, and boots. The boys are learning how to do leather craft, too. Some of the new boys are starting to make belts while the older boys are working on wallets, book coverings, and albums.

### CARPENTER SHOP

The carpenter shop has three boys enrolled in class—Ernest Lewis, senior, Clifford Matt, junior, and Kenneth Thompson, ninth grade. The work of the carpenter boys has been mostly repair work and such jobs as laying cement sidewalk back of the new duplex, tearing down a double garage which is to be rebuilt soon, and smaller jobs as repairing sash

boards, making towel racks, fixing screens and repairing the bleachers on the athletic field. The boys hope soon to be able to work on individual projects.

### PRINTERS

Printers have finished work on the 1950-51 handbook, which this year features the school year calendar.

A group of seventh graders have completed their initial jobs on poetry and paragraph composition and have had their first experience with proofing, correcting and distribution. They are now working on a series of assignments involving aligning and centering type groups.

Ralph Scott has been practicing platen press feeding. He has also been distributing type and spacing materials used on the handbook.

Loretta Quampts and Jean Pichette, seniors, did the stitching and trimming on the handbooks.

### ELECTRICIANS

Electricians have been busy lately rewiring old buildings, replacing inside and outside lights on campus buildings, fixing hot plates and irons. Our latest job is putting in iron outlets in the Winona hall laundry.

Delmar Hickox and Alfred Hawk are second year students, while Robert Patterson, Everett Jones and Robert Kirk are getting their first taste of electrical work. Mr. Lester Bolton is our instructor.

### PAINT SHOP

The paint shop boys have been getting the shop in order for a busy school year, refinishing class room furniture and repairing individual lockers. The paint shop class room has acquired new and up-to-date text books for the advanced students.

## Junior High Notes

### WHAT MY FRIEND MEANS TO ME

A friend means someone I can trust and tell my troubles to and one who will try and help me out when I need help. A friend corrects the wrong things that I do and tells me the right things. A friend helps me to make more friends. A friend is almost like a brother or cousin to me. With a friend I can have fun. If a friend is not a bully he can get along with others and I can get along with him too.—Frank LaPena, 7th grade.

## MELODY LANE

### BAND NEWS

Bright and early in the morning of September 19 the band held its first practice at 8:00 a.m. They have continued this practice ever since. The band made its first appearance on September 29, when it played for the Mill City-Chemawa football game. The seven majorettes twirled at the half. The band this year has 48 members, as compared with 42 members last year, of which 37 are girls and 11 boys. New members include Irene Joan Sicade, Frank Pays, Charles Wyman, Myrna Monroe, Delma Jean Gird, Patsy Ochiho, Walter Moses, Philomen St. Goddard, Lloyd Sanders, John Thorpe, Frank LaPena, Peggy Washington, Dalthea Miller, Rose McDougal, Caroline Millett, Henrietta Charles, Yvonne Yopez, Ramona Calvin, Darroll Unive, Leonard Quenelle and Jaqueline Ann Pyne.

The Pep band, consisting of 10 members, is in full swing practicing on Monday and Wednesday evenings. They made their first public appearance at Jefferson on October 6 with the Pep squad.

## DOWN ON THE FARM

The ag boys have been very busy since school started, keeping their tractors, harrows, plows and disk rolling to get in the fall crops. These crops have all been planted by the Ag boys with the help of one employee.

The dairy cows are producing more milk this fall than ever in the past. This is proof of the very fine care that the dairy men are giving them.

The apple pickers are right in the middle of gathering the crop and from the looks of the apple trees it seems as though Chemawa students will not have to go hungry for apples this winter. The Ag boys are grateful for the help the grade school boys have given them in gathering the fruit.

Two new members have been added to the Ag staff. They are Mr. Bradburg who is employed in the dairy and Mr. T. J. O'Brien, agriculture teacher.
