

Academic High Lights

Mrs. Hudson's Class Has Calf Project

The fourth and fifth grades have a calf project. Leonard McJoe and Nathan Seaman are the project leaders. We feed and water the calf. We clean the pen. We take good care of the calf because we want it to grow fast. We will sell it before school is out.

Grades Have 4H Project

The fourth, fifth, and sixth grades have a 4H art club. There are twenty-two children in the club. We have our meetings on Friday afternoons.

We had a party on the Wednesday before Christmas. The girls on the food committee popped corn for the party.

Each club member is required to draw three pictures. Two of the best ones can be exhibited at the Marion County Fair in Stayton this spring. We are going to work hard to try to win some prizes.

Book Care Important

Boys and girls, you like to read books. Books cost money, so you must take care of them.

When you have finished reading a book you should put it back where it belongs. Some boys and girls mark in the books, then other boys and girls see that mark in the book.

Let us learn to take better care of our books.

Study Constitution

This morning we would like to write a short thing about what we do in Mrs. Friend's classroom. We have been learning about our Constitution. We have learned many things about our Constitution, and we are going to give our program about it on January 12. The boys are drawing the pictures that we are going to show to the boys and girls.

Eighth Grade Sections Join for Party

On Wednesday, December 23, all the boys and girls in the eighth grade and their teacher, Mrs. Hazel Mason had a class party in the visual aids room. Each student paid fifty cents. The girls in the Eight B class had the privilege of preparing the food for the party because they have been in the cooking class this semester.

At the party there were games and dances. The card games were the most popular of all. Among the card games were Rummy, Old Maid, and Canasta. After a while the Bingo game started. Everyone wanted to be in that game because there were candy prizes. After Bingo came the refreshments. There were seconds and even thirds!

While we were still eating, some of the children passed out the presents. After everyone had settled down once more, the boys had to leave to report to their dormitory. The girls helped straighten up the room before leaving. Then everyone returned to the dormitory safe and sound.

Be Safe

We must learn how to walk across the streets anywhere we go. When we go to town, we watch the street lights. When the light is red, we do not cross the street.

When we walk across the street we always walk on the left side of the road.

9Bs Enjoy Party

The 9Bs had a party Thursday afternoon, January 7. We played Bingo before we ate. We had Bologna sandwiches, maple bars, potato chips, coffee, and punch for refreshments.

We enjoyed the party.

Change In Teachers

Mrs. Vern Hackett has quit teaching for the rest of the year. Mrs. James Johnston is our teacher.

Campus Visitors

In the past month Chemawa has enjoyed visits from parents of students, former employees and students, and Indian Service supervisors. Among those who have visited the campus are:

Mr. and Mrs. Edward Carlson and daughters, Joan and Sandra, Nespelem, Washington.

Mrs. Dora Tulee, Harrah, Washington.

Mr. and Mrs. Harry Yallup, Warm Springs, Oregon.

Mr. and Mrs. William Atkins, Bremerton, Washington.

Mrs. Elsie Selatsee, White Swan, Washington.

Mr. Tom Jones, Seattle, Washington.

Mrs. Letitia Huff and daughter, Miss Thelma Jackson, Salem, Oregon.

Mr. and Mrs. Joe Meninick, Toppenish, Washington.

Mr. and Mrs. Henry Thompson, The Dalles, Oregon.

Eleanor Foster, Beatty, Oregon.

James Coburn, Sprague River, Oregon.

Mr. and Mrs. George LaVatta, Portland, Oregon.

Miss Norma Runyan, director special Navajo program, Intermountain, Utah.

Mrs. Nettie Hauser, Salem, Oregon.

See Educational Movies

We went to see two educational movies. One was **Miracle of the Mesa**. It was about the Hopi Indians that live in Arizona. It showed how the ground was dry and how water was needed. The Hopi Indians danced and sang and it began to rain. The rain made the corn grow. The corn was used to make corn bread.

Telephoning Saves Time

Mrs. Sander's class has been studying about telephones. A telephone is one of the most useful inventions in modern times. A telephone call takes less time and less labor than any other form of communication. The person you want to communicate with can be reached by phone quicker than by mail. You get a quicker answer too.
