

STUDENT BRIEFS

MY DUTIES AS STUDENT COUNCIL TREASURER

As treasurer of the Student Council I have to keep a record of the Associated Students' funds. Every day I report to the administration office to sign the checks.

At the meetings of the Council I read the vouchers so that the secretary will keep a record of the vouchers' numbers. My job also includes serving on Student Council Committees and participating in my share of the Council activities. One of my most important duties is to watch for improvement. These are some of my duties as treasurer of the Student Council of Chemawa Indian School.

Jim Lewis

SCIENCE

This afternoon we did an experiment in science. It was called "The Carbon Dioxide Experiment." We used a drinking glass, a spoon, vinegar, soda and water. First we put a little soda and water in the glass we mixed that together. Then we added a few drops of vinegar and watched the bubbles come up.

A PARTY IN TOWN

I went to a party in town. The party was given by the church people. Father Warren invited us to the party. Cookies, Koolaid, and coffee were served at the party. We enjoyed doing the twist and the mashed potato dances.

Sally Marie Brown

SHOP PROJECTS

In shop boys are making all kinds of projects. We have made picture frames, all kinds of boxes, also a sled. Now we are making projects for Christmas. I made a picture frame and just finished it.

Harvey Hobson

KEEP THE CAMPUS CLEAN

We do our best to keep the campus clean. There is a truck that comes every morning to empty the outdoor trash cans. Every morning we clean the yard around the dormitories and school buildings. We like to keep our campus clean. Some boys and girls are careless. They throw trash around the campus. We should all try to keep our campus clean.

Andrew John

PINON NUTS

From September until November the pinon nuts fall from the trees at home. The trees that have pinon nuts on them are far away from our home. They are in a forest. Each family makes camp out in the forest. The whole family picks pinon nuts.

Picking pinon nuts makes your hands sticky and you get very tired. It is hard work and everyone is tired after they have worked all day. It is fun, too, to be working with your family.

You can roast pinon nuts in a pan over a fire. They are real good to eat.

You sell the pinon nuts at the trading post and then you can buy goods with the money.

We live at the camp until we finish picking all the pinon nuts that we can find. We hope that we go picking pinon nuts again.

EXPLORER CLUB

The Explorers' Club is made up of a group of Chemawa students. One of our activities is to patrol the traffic on the campus. There are many traffic hazards on our campus as a highway and a railroad run across the campus.

We hold meetings to talk over and decide on better safety methods that we can use. We wear uniforms when we are on traffic duty.

So far the Explorers have been successful in controlling traffic. We are proud to be helpers on the student road patrol.

Simeon Arnakin

Simeon Arnakin receives the Insignia of Junior Scout Master from Superintendent Walters.

RECENT VISITORS

Our visitors from the Portland Area Office were: Mr. Richard Balingier, and Dr. Solon Ayers.

Mr. Madison Coombs from Jun-eau Area Office was a recent visitor to Chemawa.

BOYS TOWN DAY

Every Saturday is always town day for boys who have money and want to go to town. Before a boy can go to town he must have a good hair cut and have nice, clean clothes or otherwise no town trip. A boy must buy two bus tickets. They cost twenty-five cents.

Most boys go to town for just a pleasure trip like going to the movies and walking around. Some boys go to the stores and buy items that they need. The boys leave Chemawa at twelve-thirty and return to the campus between four and five.

ELECTION OF OFFICERS

This year the students in Mrs. Grapes' room elected the following officers: President, Jimmy Lewis; vice president, Donna Begay; secretary-treasurer, Virginia Calamity; student council representative, Donald Johnson.

Our first class meeting was held to talk about an educational trip. We voted to go to the ocean. We later learned that we could have only one trip so we changed our vote and we decided to go to the Portland zoo.

Virginia Calamity

SCIENCE CLASS

This year I am really interested in science. I used to dislike that subject most of all but now I really like it.

We have learned about animals and plants now we are studying about minerals. I think that everyone should know at least a little about all these things. They are all important to us because we use them in many different ways.

We have two rats, two horned toads and three lizards in our science room. The students, in our class, like to watch these animals.

Loberta Swartz

CHRISTMAS AT CHEMAWA

We had a very nice time here at Chemawa during our Christmas vacation. We had four days vacation.

Every classroom had a Christmas party which all the students enjoyed. Our classroom teacher gave each of us a treat.
