

Julie Begay, Mr. Leo Fredrickson, Helen Ramondas, Stanley Begay, Kathryn Almquist, Lee L. Begay, and Raymond Blackgoat pose for us at Fisherman's Wharf, San Francisco.

Trains Scare Me

The train is an ordinary thing here at Chemawa, but did you know it still scares me out of my dreams and sleep at night? I wake up startled thinking there's an earthquake or that the world is ending. Waking up at night is a common thing for me nowadays.

Dora Andrews

Books Become More Popular

As new books are added to the shelves of the library, Chemawa students increase their reading appetites.

With 200 new books being added to the shelves during the month of November, circulation climbed to 1308 separate items checked out. In December another 300 books were placed on the shelves and the circulation increased to 1427, or approximately one and one-half books per month per pupil.

Student librarians are a great help in handling the extra work involved in the increased use and in the placing of new books on the shelves.

After-Class Mail Rush

The girls in Winona Hall are usually seen rushing back to the dorm to see if they have any mail. Sometimes they are the lucky ones and sometimes they aren't.

Betty Moto

Don't Give Up the Ship

Seniors! don't give up yet, you still have five and a half months left before you walk down that aisle in your cap and gown. This would be a time when many of the Seniors might get the feeling that just because we are Seniors we will graduate. This is not true. Next Spring you may just find yourself staring a blank piece of paper in the face when you should be looking at a beautiful diploma.

Let's all get on the ball and show the underclassmen what the Seniors are really made of, and what we can really do when we put our best foot forward.

Kathryn Almquist

Girls Get Prettier

Mr. Alden, a beautician from Portland, Oregon has, for the past three years, been coming to Chemawa's campus once a month. He restyles or cuts the girls hair for them if they desire. He also gives them many tips on how to care for their hair and how to take care of their skin and nails.

Pauline Demmert

Auto Shop Notes

Power mechanics has been a very interesting course this year. The past few months we have been learning about automobile engines. We have taken an engine completely apart and are now learning to put it back together properly. Some of the things we have learned are about refacing and grinding valves, cleaning pistons and installing new rings, adjusting bearings and replacing inserts, and the care and use of the proper tools.

When we have time we also learn about washing and polishing cars, greasing and servicing, and proper record keeping.

We have also taken educational trips to such places as Eyerly Aircraft where they manufacture carnival rides, Holt Manufacturing Company where they make heavy equipment and special machines for special jobs, Towmotor Company where special machines for carrying things were made.

Steve Levi

BUSINESS STUDENTS LEARNING BY DOING

Some of the second year typing and business procedure students are getting a chance to learn their lessons by actual work day conditions. Certain student are being selected from the business department to work as student trainees in offices on campus.

Trainees are now being used in the girls placement office, boys placement office, and the school bank.

Most of the students enjoy working in these offices. Sometimes, when a mistake has been made the students that work in the bank have to work late to find their mistake and balance out the bank.

GIRLS' GUIDANCE PROGRAM

On October 24, 1965 the Winona girls of Units 7 and 8 sponsored the Sunday evening program. Alice Mandregan played several piano solos, the Barters sang two songs, and her group played a skit titled "Twenty Years From Now."

Rev. Stevens had an announcement pertaining to the Sunday school program.

Diana Shorty told of her interesting trip to the Bay Area where the Seniors went to explore the opportunities available to them at junior colleges and in vocational training schools there.

Special guest speaker was Mr. Tadlock, School Social Worker. He spoke to the girls about the importance of health protection.

At the close of the program we sang our school song, On Chemawa.

Audrey Natkong

Driver Training Is Fun

Some of us are fortunate enough to be allowed to take driver training while at school. Each student takes a class in driving which gives him the rules and laws and general knowledge about operating a car. After he completes this course and passes the exam to get his state permit, he is allowed to sit behind the wheel.

We start out by driving only on campus but as we improve our instructor, Mr. Burright, takes us on to the open road.

We have opportunities to drive over to Keizer and sometimes out onto the freeway.

If we do a good job and are able to pass our state exam we can get an Oregon drivers license.

Victor E. Lekanof
