I call your attention to the fact that drunkenness is not subsiding, certainly that it is not at a standstill, but that it is on an on ward march, and it is a double quick. There is more rum swallowed in this coun try, and of a worse kind, than was ever swallowed since the first distillery began its work of death. Where there was one drunken home there are ten drunken homes. Where there was one drunkard's grave there are twenty drunkards' graves. It is on the increase. Talk about crooked whisky-by which men mean the whisky that does not pay the tax to government— I tell you all strong drink is crooked. Crooked Otard, crooked Cognac, crooked schnapps, crooked beer, crooked wine, crooked whisky—because it makes a man's path crooked, and his life crooked, and his death crooked, and his sternity crooked. If I could gather all the armies of the

dead drunkards and have them come resurrection, and then add to that host all the armies of living drunkards, five and ten abreast, and then if I could have you mount a horse and ride along that line for review, you would ride that horse until he dropped from exhaustion, and you would mount another horse and ride until he fell from exhaustion, and you would take an other and another, and you would ride along hour after hour and day after day. Great host, in regiments, in brigades. Great armies of them. And then if you had voice stentorian enough to make then all hear, and you could give the command "Forward, march!" their first tramp would make the earth tremble. I do not care reb!" their first tramp would which way you look in the community to day the evil is increasing.

The name which had shaken all Europe and filled even America with apprehen-sion, that name went down, and Napoleon muddy and hatless, and crazed with his dis asters, was found feeling for the stirrup of

the conflict. Well, my friends, alcoholism is imperial, and it is a conqueror, and there are good people who say the night of national over-throw is coming, and that it is almost throw is coming, and that it is almost night. But before sundown the Conqueror of earth and heaven will ride in on the white horse, and alcoholism, which has had its Austerlitz of triumph, shall have its Waterloo of defeat. Alcoholism having lost its crown, the grizzly and cruel breaker of human hearts, crased with the disaster, will be found feeling in vain for the stirrup on which to remount its foaming "So, O Lord, let thine ene

Pholas, the Shell Miner. The pholas, a small species of bivalve shell having the remarkable faculty of boring into the hardest rock, is one of the greatest wonders known to the conchologist. Great blocks of granite and marble that have fallen overboard or been sunk in afterward completely honeycombed by these curious little borers, they themselves being imprisoned in the cavity, obtaining their food from the water that flowed in and out. Many explanations have been given as to the method by which they bore into such extremely hard rocks. The shell is known to contain aragonite, and some suppose that constant friction enables the shell to subdue the rock. Others, again, are of the opinion that

which dissolves the rock and enables the creature to bore its hole. Some of the most interesting samples of its work known to the scientists may be seen in the pillars of the Temple of Serapis, Italy. There the land became submerged long enough for the shell to do its curious work. After a lapse of ages the land has now being completely permeated by them. These and other exhibitions of its work have caused pholas to be called "the shell curiously enough, it is furnished with a lamo, a rich blue white light that shines over the entire body. Some remarkable experiments have been made with the shells of pholas.—St. Louis Re-
