OUR LOCAL FIREMEN.

Talk About the Coming Tournament-

The fire department of The Dalles is greatly elated with its future prospects, which appear brighter than for a long time past. Chief Engineer Judd S. Fish is in receipt of numerous replies to letters sent out to various departments of Oregon and Washington, respecting the proposed tournament, and these replies are filled with familiar greetings. The Dalles department will become more closely allied with the state firemens' association, and with the increased facilities, provided by the council this year, feel capable of coping with any future fires that may inflict their presence upon the city. At a recent test the hose attached to hydrants direct did much more effective work than the steamer pumping from the cisterns, and the boys feel elated with the result. Mayor Mays assures Chief Fish, that whatever the department requires for energetic and useful activity the council will readily provide. The tournament is yet in abeyance, as the firemen of the state generally prefer staying at home on the fourth of July; which, of all days, is the one most liable for local fires; but if it does not come off on the day we celebrate, it is pretty sure to materialize later on.

## STOLE THE BEST TEAM. A Livery Stable Man in La Grande

A few days since Mr. Haynes, a commercial traveler, was in La Grande on business, and called upon a stable keeper for his best team to make a short excursion into the valley. The stableman told him his best team was out, and that he was somewhat anxious about it, as the team should have been in a day driver of it had skipped. Mr. Haynes asked if he knew the man who had the team, and the reply was to the effect application for the place. that it was Hiller, a representative of ler has your team you are all right." Grande team," replied Hiller, and after death, he at once sent for the little ones. a short talk it was decided that The youngest child is four years old. the team had been taken out by a thief, personating Hiller. As Mr. Haynes had, by his conversation, assured the stableman at La Grande, he felt it his duty to inform the latter of existing circumstances and wired to him that Hiller was in Pendleton, and had had no team. This dispatch was evidently misunderstood, as quickly following its receipt at La Grande, came another to the sheriff of Umatilla county By this time probably the La Grande stable man has realized the full force of his first impressions. Mr. Haynes reached The Dalles last evening, and was seen by a representative of THE CHRONICLE, at the Umatilla house. He says the fellow who took the team introduced himself to the stableman by presenting Mr. Hiller's card, and has probably driven over into the Harney country, disposed of the team somewhere

now on the sick list, but will try to give von a few items anyhow.

Diphtheria has been causing considerable stir in this quiet town. John R. Bryson, the lawyer, lost two children with the dreaded disease last week. The public school has been closed, partly on account of measles; and there is some talk of closing the college. Prof. Bristow's eldest daughter is lying very low family is just getting through with the

Last Friday there was a matched game of base ball between the O. A. C. 4th nine and the Corvallis Giants, small school boys; which was barely won by the latter. Saturday, Jack's Hard Hitters, O. A. C. first nine, played for \$75.00, the best nine that Corvallis could afford. The college boys won, but I fear the fact of their playing for money will have a bad influence on the morals of the school. I don't think a state institution ought to tolerate gambling.

Dr. P. M. Donigian, a former resident of Turkey, lectured here Sunday and Monday evenings.

If the numbers of the State Grange are willing we shall entertain them one day next week. · BUNCHGRASS.

The six year old child of Louis Blank which has been ill with diphtheria, died yesterday afternoon. The youngest child, a boy of two years, was attacked with the disease yesterday morning. Dr. Rhinehart assures THE CHEONICLE that every precaution is being taken to quarantine the patient and he has little apprehension that the disease will spread. The doctor believes that with ordinary care no disease will ever become epidemic in The Dalles.

The Great Northern.

CHICAGO, May 18.—The Great North- Special Correspondence From Wasco ern forces lay three miles of track a day, at which rate the gap between Kalispell and Spokane Falls will be speedily closed. It is possible that passenger trains will be run clear through from St. Paul over the Pacific extension of the Great Northern by June 1st, and it is given out that President Hill has made arrangements for continuing to the coast from Spokane Falls over another line until he can complete his own road. Hill has been a harmless member in the western traffic association, but this resulted not from a desire to become obedient to the agreement, but from the lack of opportunity. It is currently reported that he holds the association in supreme contempt, and that he will not be bound by its provisions or enactments when the time arrives to make a dash for traffic.

Telegraphic Flashes.

It was now nearing the noon hour, and the meeting adjourned to partake of such a lunch as only the farmer's wives mend any man for collector of customs of Sherman county can spread. Your reporter noticed the presence of the following candidates who are taking advantage of the large gathering to get acquainted with the dear people. John not be compelled to go to the expense of Smith, candidate for joint senator, S. F. telegraphing their indorsements or their Blythe and H. E. Moore candidates for joint representative. It is rumored that F. R. Coon of Hood River, is expected the Brunswick Blake Collander com- arrivals overland were a whole family of to deliver an address on fruit culture. The veteran democratic war horse, J. H. Jackson is also here looking after the outposts and so are A. G. Johnson and W. McGinis.

> Wasco, May 12 .- The afternoon session of the Farmer's Institute opened with a musical selection by the choir, after which a paper, composed for the occasion by Wallis Nash, was read by Professor French, on the subject of industrial education. Reference was made to the change that has taken place in the acquisition of technical education, since the times of the old guilds and their apprentice systems, men applying for work in any of the trades are no longer asked "where do you come from and where were you apprenticed?" As a result we have a superabundance of merely "handy men" The state argricultural college aims to make Saturday, May 21st, leaving her berth thoroughly accomplished farmers, and at the foot of Union street at 7.30 o'clock farmers' wives, of the boys and girls under our care. Our education is conducted on the kindergarten principle. time to see the Columbia in its angry tical. We have 200 students from every mood, and notice for themselves the county in the state and we aim to imbue condition of things at the foot of the every one of them with the idea that canal. Our boys are trained provide themselves with well filled how to make a draught of any lunch baskets, to satisfy an appetite piece of mechanical work as well such as an excursion like this will stim- as how to do the work itself. They are instructed in the chemical constituents of soils, and the kind of food adapted to each species of plant life. They are given practical as well as theoretical instruction in horticulture, floriculture, pomology and every other branch of farm work. They are taught the character and habits of the pests of the farm and orchard, and the most approved methods of exterminating them. One third of the students are girls, they too are instructed in horticulture, in the care and cultivation of flowers and fruits as well as in household science, how to cook, boil and stew meats and vegetables, how to make puddings, jams, jellies, etc., how to sew, patch, darn, plan and cut garments and do all kinds of fancy work. These are the aims and objects of our college work, and they have been abundantly successful in turning out young men and women equipped with all necessary knowledge for starting life as accomplished farmers, and farmers' wives, imbued with a love of farm life they are never likely to loose in after years. Mrs. L. Canfield followed with a very

The paper, as a whole, was deeply interesting for its caustic, incisive and somewhat radical thought should they co-operate at the polls. and words. It was finely composed and well received. Mrs. Canfield had urged the importance of good reading matter in the farmers' homes, especially good newspapers, and the institute, taking up the cue, discussed this point at considerable length.

Professor French followed, on: "How

proved so successful.

a very appropriate farmer's song. The The institute had been in session for nearly four hours without a sign of wearcomfortably filled with probably 300 farmers, their wives and children.

Wasco, May 13 .- The convention opened this morning with a large attendance. Frank Lee of the Northwest Farmer read a paper which contained some excellent practical suggestions on "Business Methods on the Farm." Farmers as a class, said Mr. Lee, are sadly deficient in business methods. In no other avocation could men afford to lose, as farmers do, from sheer lack of business methods, and yet live. How much is lost by sowing foul wheat, by neglecting to select the best seed, by not preparing fruit, butter, etc., in a proper manner for market. He recommended that farmers should plan their work shead." Each should keep a diary or day book in which entries should be kept as to yield of crops, when planted, how much they realized. Not one farmer in a hundred can tell how much it costs to raise a pound of beef. He strongly urged the adoption of the cash system in the purchase of all supplies needed on the farm. Better far if possible bor- present to express themselves and row money and purchase for cash than buy on credit. No farmer should buy a threshing machine unless he is a pracmachines that ate up horses, hogs, catfarmer cultivate them.

Mr. Lee's paper was followed by a short essay by Mrs. Hattle Andrews on "How to lighten the work of the farm housewife." The husband should rise early, said Mrs. Andrews, light the fire. set on the kettle and potatoes, and sweep the kitchen floor. Then wake up the wife and she will do the rest. At noon he should come in early from the said that it was evident that Portland field, cut plenty of wood and pack water where necessary. The supper she will prepare without his help. Finally, she assist in putting a boat on the lower urged the married farmer to be a man and to eschew cards and wine and every other pleasure he could not share with his wife.

This was followed by Professor Washburn, in a paper on "Insect Pests of the Farm and Orchard." The nature and habits of various pests were described with the most approved methods of their extermination.

A. B. Craft followed on "Co-operation." Unlike any other business the \$10,000 promised towards the enterprise farmer has nothing to say about the had to be abandoned. If the Regulator price of what he buys or sells. He must has benefited the people in any way take what he can get and pay what is they owe it to The Dalles' merchants asked. The excess if not the best ever held in the state, An interesting discussion followed the of cost by wagon over that of rail for and best of all, it was got up by the decree of Professor Franch At its twenty miles is \$2.20 per top and the farmers themselves. A vote of thanks address of Professor French. At its twenty miles is \$2.20 per ton and the close, A. S. Roberts sang, in fine voice, excess of cost on 2,000 bushels is something like \$132.00 for each farmer who sine die. hour of 4:30 p. m., had now arrived, ships that amount. This shows the vast importance of railroad connection with the Columbia river. Last year we iness. Chairman Medler announced the exported 600,000 bushels of grain and programme for the morrow and the the crop is not all yet sold. In 1884 a Special to the Chromicus.) meeting adjourned. The attendance man at Grants collected all the grain was quite large, the large hall being that was shipped out of the county and the very clear article in THE CHRONICLE it amounted to just half a car load. Not yesterday, on the immense crops that more than half of the county is under cultivation and our need for a railroad year, I am reminded of the pertinent is already imperative.

James McMillen followed. He held that the worst enemy of the farmer is not the railroad but the wagon road. It cost as much to haul grain 10 miles to the station as it did to haul it 180 miles by rail at average rates. Wheat had been carried from Duluth to New York for five cents per bushel, yet we are compelled to pay 141/2 cents per bushel for the 108 miles between Grants and Portland. We pay \$3,80 a ton while the average rate is 65 cents. He reckoned that 500 farmers of Sherman county were practically defrauded out of \$140 each in exorbitant charges.

H. E. Moore spoke of what the Cascade portage had done for the farmers of Wasco county and declared, if elected to in his power to secure the dalles portage.

This was the signal for the chairman to call on other legislative candidates the same manner.

A. S. Roberts-gave an incident of his was told that the cost of running the Cascade portage did not exceed \$4,500 dalles portage need not greatly exceed this sum.

A reference by Mr. Brock to the action of the Portland chamber of commerce in connection with the Norton survey brought Hugh Gourlay to his feet who did not want an open river. When the Regulator company asked Portland to river, nineteen persons contributed the munificent sum of \$2,200. This was the extent of Portland's interest in the opposition boats. The merchants treated the new company with coldness, indifference and in one case, at least, with absolute rudeness. Allen and Lewis, one of the largest wholesale houses, a house that has made thousands of dollars from the farmers and merchants of Eastern Oregon practically showed the collectors the door, and the work of collecting the land. While Eastern Oregon is a unit pects any candidate now before us for legislative honors of not being friendly surprising if Portland would yet oppose

buy. Co-operation has not always been ing the ground that the present law was a yard of legal fence in the county.

SOME PERTINENT : :

A Few Passing Remarks Worthy Consideration.

THE DALLES, May 14 .- After reading will be raised in Sherman county this questions that agitated our people a year ago. In the spring of 1891 there were two or more schemes, on paper and in the air; for moving the grain crop of Sherman and other counties to the coast markets. Paul Mohr and Co., it was said; would have their portage railroad, on the Washington side of the Columbia. completed in time to handle the crop of 1891. Afterwards came the much talked Dalles and Silkstone railroad, and quite recently the report that the Union Pacific would build a branch line from the main line into Sherman county, via. Spanish Hollow and Wasco. Cannot some one of these schemes "get a move on" in 1892?

According to statements of Mr. Johnson, of Moscow, here this morning, rich the legislature, he would do everything deposits of gold have been found near that city quite recently. He says that only a few days ago two men from Howard, a gulch about seven miles from Moscow, came into the city with gold Messrs. Smith, Coon and McDaniels redust and nuggets to buy supplies with, sponded briefly pledging, themselves in and a Mosco paper which Mr. Johnson had with him says: "Messrs. Turner own experience with the Regulator. He "washed this gold out in the gulch. required to ship a bunch of sheep to They said that one shovelful of the dirt Portland. The regular rates by rail where they were last working panned would have been \$70. He had them out \$5 and showed several nuggets, the carried by the Regulator and landed in largest of which was about the size of an larity are laws of nature. Let the every way in better shape for \$36. He ordinary marble. They think they are on the trail of a hidden ledge and pro-pose to follow it up until they find it. per annum and the cost of running the As the last gold is very coarse they are greatly to believe they are close to the Verily, how true it is, that nobody knows the limit to posibility of future development of the wealth of this boundless Pacific Northwest.

> Statues in snowy marble no longer decorate the art halls of Boston. In the interest of realism an artist of that city has propagated a new fad which maintains that sculptured images must be colored in the hue of their human simulacra. The propagandist is even now holding an exhibit of Greek plaster-cast which he has bedizened with a brush and some paint. He colors the mantles of his images a rich scarlet, making the eyes and flesh the bue of the eyes and flesh of living men, and gilds the hair. The impression left by his statuary must be that of a collection of bleached blondes wearing cosmestics and mysteriously petrified in heroic attitudes. While the fad lasts there will probably be added to the collection a bust of Horace showing a red, convival nose, and a statue of Diogenes with solled clothes, a portable plung bath and a dark-lanters having a lighted wick inside.

According to dispatches yesterday the will of William Astor, lately deceased in Paris, leaves \$60,000,000 to his son, John. Jacob Astor third, a young man whose married, if Mr. Drayton is still to be re-These women are cut off with \$2,000,000 each and Mrs. William Astor receives a The explained that all these bequests to the sons and daughters of William Astor are William B.
