A BOAT RAILWAY.

The Ontario Ship Railway company, incorporated under an act of the last Ontario legislature, is preparing to build a three-track railway from Toronto on lake Ontario to Collingwood on Georgian bay in lake Huron for the purpose of hauling lake vessels between those two points, as was proposed by the Dolph project for the dalles of the Columbia.

The completion of the Ontario line tion through the St. Clair river, lake Erie and Niagara falls. It will take Vessels from Chicago to its discretion. Duluth drawing twenty feet could go to Ogdensburg and down the St. Lawrence nearly 200 miles further east than they can now go.

The length of the route is sixty-six miles. There are to be three railway tracks of the standard gauge, 4 feet 81/2 inches, with rails 110 pounds per lineal yard. It is intended to transport vessels of 1,000 tons register, or, say, 2,000 tons displacement weight and fourteen draught. The estimated cost is \$12,000,000.

It is impracticable, except at great cost, to build the railway on a straight line between the two points. There will necessarily be in the central part of the route two, and perhaps three, of the route two, and perhaps three, deflection tables for changing the direction. The grades, as ascertained from all available data, will be thirty-three feet per mile as a maximum, prompted the choosing of The Dalles as although on the larger part of the route the grades will be eleven feet and fourteen feet per mile. The summit to be surmounted is 670 feet above the main level of lake Ontario.

Lieut. Peary has telegraphed from St. eries on the Greenland east coast in Independence bay, latitude 82° N., longitude 35" W., discovered July 4th, 1892. Greenland ice cape ends south of Victoria inlet. The highest point heretofore attained on the east coast is about 75° N., and was made by Holdenby, a German. The ethnological report of the expedition is probably more complete than any heretofore conducted in the far north. A complete consensus of all the Arctic Highlanders, or Esquimaux, living north of the ice barrier of Melville bay, with the new of relationship of the ice barrier of Melville bay, advertising during the past year, that with the name and relationship of the can be traced directly to the press meetdifferent individuals, was taken, to- ing. gether with the photographs of more than one-half the entire population. the meeting will mention the fact any The enumeration shows a total of less than 250 souls, but the most isolated of its going to your city, etc., and while tribes live in a simplicity which finds no the mention in some of them will be parallel.
