The lower Columbia is so choked with running ice that only the most powerful steamboats can make the run up from Astoria. All of the boats have been delayed, but so far no accidents have been reported.

The Prineville mail started out with a splash this morning, but in consequence of heavy drifts the driver returned. Mr. J. B. Farish then prepared himself for the trip, and made another start at 8:45 a. m., determined to go through.

We understand that Senator Cogswell says he believes in The Dalles portage railway and only opposed the Raley bill because he couldn't find out how much the road would cost. He don't have to wait two years to find that out. His constituents want the bill passed. Some-tenths of them get their supplies by this route, and ship this way, too.

Mr. L. Winans received a telegram to report at Hood River this evening, and leaves on the 4:20 train. He reports the ice harvest A. 1, and their company will have enough to cool all creation without anything happen between this and tomorrow evening.

J. E. Graham, the recently appointed mechanic of the Iowa Central, who had headquarters at Marshaltown, writes that the thermometer is frozen up and none can tell how cold it is. Some say that it is 46 below; some say 48, and Mr. Graham thinks it is possibly 46. Old timers inform him that the winters hardly ever last more than fifteen months.

The Chautauqua reading circle held its weekly session last evening at the residence of Mrs. C. J. Crandall. The subject under discussion, coming in line with the regular work was the annexation of Hawaii. Miss Frazier concluded the recitation in Greek history and Mrs. Brooks the U. S. and Foreign history. Next week the circle will begin the consideration of California. A Greek romance in connection with the Greek deity. Those present were Mesdames E. L. Brooks, C. J. Crandall, Misses Iva Brooks, Mary Frazier, Lizzie Sampson, Annie Fulton, Jessie Lown, Messrs. H. S. Riddell, E. N. Littlefield.

That old chestnut: "Is this cold enough for you?" was reviewed in The Chronicle 9:45 a. m. today when the thermometer bulb married zero. At 8:30 it was 19 above. At 5 o'clock it stood 29 above. The barometer at 5 p. m. yesterday stood 29.423; at 8 a. m. today 30.161; at 9:45 30.297. Thermometer fell 1 below zero at 10 a. m. today. Last night the wind was blowing 30 miles an hour from w. by n., but it veered east at about 2 a. m. it was blowing, when it got up a velocity of 30 miles, and at 9 a. m. was blowing 30 to 35 miles an hour coming from a west. At the same hour high clouds were madding eastward with equal velocity. As we go to press the barometer stands 30.40; thermometer 3 above zero. Bright sunshine, east wind 12 to 15 miles per hour. The above readings were taken at 10 a. m.

From the Daily Chronicle, Wednesday. The 1:03 p. m. train from Portland did not arrive today until 4 p. m., in consequence of the inclemency of the weather.

The tax rate in Baker county for the year 1892 is thirty mills—only three per cent, says the E. Oregonian. With one or two more criminal cases, conducted regardless of expense in Umatilla county, the tax rate there will be as high as in Baker county.

Dr. Eshelman informs us that Mr. L. Booth is improving, though somewhat weakened by his long illness. He will gain strength as the days go by. We hope to see him on the street as soon as the weather gets warmer.

Capt. John J. Holland, whose death in Seattle was announced, was well known in The Dalles. He was a prominent builder and adept in marine architecture. Among the steamers he built were the Wide West, R. H. Thompson, Idaho and Emma Hayward. He was a brother of Phil Holland, so well known in this city, who received fatal injuries some years ago in a collision between the Southern Pacific railroad ferry and the steam launch Mikado.

Deputy Sheriff Phiraman left for the east last night in company with an officer from Missouri in charge of R. C. Rose, alias Carter, who is under sentence to hang at Mount Vernon. Mo. Gov. Penoyer granted a warrant of arrest on Gov. Stone's requisition. Rose broke jail six years ago while under the sentence of death for murder. He was arrested a few weeks ago near Mt. Tabor, just as he was about to skip out.

Mr. Louis Payette, one of our city mechanics, has just finished putting the iron work into the steamer Regulator, which has been through a general overhauling and repair. The work is first-class in every respect, and the company is well pleased. It is gratifying to know that The Dalles has as good mechanics as any place on the coast. Mr. Payette stands at the head in his profession as an iron worker.

The ice gorge below Seuferts is something grand. In the line of an ice bridge it is superior, in magnificence, to any picture we have seen of the now existing and wonderful ice bridge at Niagara. Herrin should go with Winans Bros., and photograph it, before it goes out. The ice is forced up from the bottom of the river, as it comes down and lodges under the gorge in the swift channel.

One thousand tons of ice were put up by Messrs. Winans Bros. at Hood River yesterday. If this weather continues a few days they expect to house at least 12,000 tons, as they have one of the finest plants for ice harvesting in the United States. Yesterday they had seventy men in the field of ice on the river. Along towards evening the ice became so weak that it was dangerous, and five men got into the river. One of them was unable to swim, and had a close call for his life, but fortunately all escaped with nothing more serious than a cold bath and a bad scare.

We noticed today a horse hitched to a sleigh, tied to a tree in the street exposed to the full force of the cold wind. The poor brute was almost frozen, and was quite frantic in its endeavors to get loose. Any person so devoid of any sense of humanity as to permit a horse to freeze on a day like this, should be forced to stand several hours exposed to today's east wind, in order to appreciate the amount of suffering he causes to the animals he uses. Our city officers should be vigilant to arrest any one so inconsiderate of the city ordinances and the comfort of their domestic beasts, which are oft-times more intelligent than their brutish owners.

Rumor says that several senators (so called) feel ashamed of their vote on the Raley bill on the 25th. It is never too late to repair an injury done. Take no stock in the report that Mr. Raley, has himself stated that if the vote was reconsidered he would not attempt to pass the bill this session, as he saw that was useless. That bill has got to pass. About \$50,000 is wanted to buy the Oregon city locks, the agricultural college wants about \$50,000 as usual, the state university, the normal school, the penitentiary, the asylum and various other institutions want large sums, and indeed must have them. They are all willing to accept Eastern Oregon's share of the taxes, but if they have no notice of contributing anything to aid Eastern Oregon's taxpayers, we should now show them the "fine Italian hand" at retaliation, should they again attempt to play double with us. Eastern Oregon has never done anything unfair, but—time will show results.

Mr. and Mrs. J. H. Sherar are in New York today, but expect to leave for Boston in a day or two. They are in fine health. The ship Tillis E. Starbuck, with Mr. Sherar's wool on board reached New York on the 31st, in good condition. This is the wool cargo shipped from The Dalles last fall by the Regulator line.

The snowfall yesterday put Union street in fine condition for coasting and as the evening shades fell, the various sleds and coasting apparatus accompanied by their owners, appeared in full force and were soon chasing each other down through the cut in swift style, and gave a peculiarly animated appearance to the street, many remained out till quite late enjoying the rare sport.

Cold weather and freezing winds avail nothing to dampen the ardor of the whist players. Last evening at Fraternity hall the Union club held high carnival with the cards and tables, and passed one of the most pleasant evenings known in the history of whist clubs. They were entertained by Mr. and Mrs. J. S. Fish. Mrs. Chas. Hilton won the first prize, while Mr. L. E. Crowe captured the booty. (We wonder if he crowded over it?) The club will be entertained by Mr. and Mrs. H. Glenn next week.

The Prineville News of the 25th ult., says of the winter in Crook county: Although the last snow storm was not deep and the attending cold weather not very severe, there has been some loss of stock on the ranges, but we have not heard of such loss to any great extent. Along the streams and waterways where grass has been eaten off in the fall, the last snow has covered up every vestige of what they might graze upon, and

having grown poorer as the winter advanced, some of them have died. Parties from town who have ridden lately along the river below town, tell us of finding three cattle dead on the range during an afternoon's ride. From the outside range we have had no definite reports, but from what we have previously learned of the condition of stock, and of the range farther away, we do not anticipate having to chronicle any considerable loss of stock unless the winter grows more severe than it has been, and this we firmly believe will not happen, although we are not extra well versed in the forecast business.

THE DALLES MARKETS. THURSDAY, Feb. 2.—Traffic has been nearly suspended on account of the pinching cold wintry weather, and the markets are lifeless in consequence. There is a complaint of a scarcity of vegetables and also in farm products, such as eggs and butter. Eggs are firm and prices are ruling higher than heretofore this season. Fresh butter is in better demand and is a trifle dearer. There is a fair supply of potatoes, but should the cold weather continue much longer prices will be marked up. Money at Six Per Cent. The advent of cheap money in Wasco county is a blessing. We are pleased to note the way the New England National Building Loan and Investment association is taking hold of the situation. Money at six per cent on six years time without bonus is the basis of their loan proposition. They also present a plan for the cancellation of present mortgages, the accumulation of a sinking fund and the reduction of interest. If in need of a loan or if you are paying interest on one, it would be to your benefit to address the association at its office, Oregonian building, Portland, or to write or call on Joel Koontz, esq., the local agent at The Dalles, or Burkes & Brock, Moro, Oregon. We learn the association wishes to extend its business and desires local agents at Antelope, Dufur, Hood River, Linkville, and various other points. The local agency is a profitable and honorable position.

Inhalation of Strychnine. Prineville News: Charlie Hanes and "French Louie," who are taking care of a band of Nye & Allen's sheep near Eagle Rock, came near getting a fatal dose of poison. One of their dogs got hold of a strychnine bait in some unknown manner, and when the boys discovered him in a fit, they went to work to dose him with salt, by which means the dog was saved. They must have inhaled the animal's breath, for soon they both felt the effects of strychnine. Charlie was the first to show it, and immediately swallowed a dose of strong camphor, which relieved him. Then Louie was attacked and treated by Charlie in the same manner. Both are all right, but neither want to try it again.

It Should be in Every House. J. B. Wilson, 371 Clay St. Sharpsburg, Pa., says he will not be without Dr. King's New Discovery for consumption, coughs and colds, that it cured his wife who was threatened with pneumonia after an attack of "la grippe," when various other remedies and several physicians had done her no good. Robert Barber, of Cooksport, Pa., claims Dr. King's New Discovery has done him more good than anything he ever used for lung troubles. Nothing like it. Try it. Free trial bottle at Snipes & Kinnesly's. Large bottles, 50c, and \$1.

Senator Dolph yesterday saw the president and attorney-general and stated that he hoped that a thoroughly American and vigorous policy would be pursued in regard to Hawaii. For himself, he holds that now is the time for aggressive action and he believes that congress is ready to carry out such a policy.

There is a decided coolness between the weather bureau and the people. Can it be possible that Mr. Pague jerked the beautiful snow lever too hard and is unable to get it back. It is about time to present a memorial to the assembly asking that body to define the powers and privileges of the weather bureau in this matter.

Senate Bill No. 50. We give this bill entire today as introduced by Mr. Cross Jan. 11th. It will be read with interest, as it is one of the most important measures in the assembly. While on this subject we may say that the fees of the sheriff in this county the past two months aggregated \$202 for county business alone; the clerk's fees and salary for the same period of time was \$1,398. Other fees coming to the office for the two months make the aggregate something like \$2,500 for the clerk for county business during the two months.

Undisputed Authority. The United States Dispensary says that "Onions are a stimulant, diuretic and expectorant; they increase the appetite and promote digestion." The juice made into syrup as in Dr. Gunn's Onion Syrup, has a specific action on the Throat, Lungs and air passages, it not only cures Coughs, Colds, Croup and Consumption, but its stimulating effect, strengthens and builds up the system afterward. As a tonic and restorative it has no equal. We solicit a trial in the most chronic and stubborn cases. Price 50 cents. Sold by Blakeley & Houghton, druggists.

The ice harvesters today do not complain that the bright sun light melts the blocks any as they move from the river to the ice houses.

Deans Dehorning Penell. Farmers and stockraisers universally agree that dehorning cattle is a great advantage. The cattle become more docile and can be handled much easier, and are easier cared for than those with horns. All farmers and stockmen also agree that the proper thing to do is to stop the growth of the horns on the calf, thereby avoiding the troublesome and painful operation of using the saw. Dean's Dehorning penell has been thoroughly tested everywhere and thousands of farmers and stockmen testify as to the advantage of using the same on young stock. It makes no noise and causes no pain. By one application the horn will drop off in a few days. It is guaranteed to give satisfaction if applied as directed. Best of references furnished. Agents wanted. Address: U. R. Johnson, La Grande, Oregon. (P. O. box 199), general western agent for Eastern Oregon. 1,204 1/2

American Cholera. From THE DAILY REVEILLE, Whitson, Wash. "T. C. Burnett, the democratic candidate for sheriff, was taken violently ill at Clebsbrook. He had all the symptoms of Asiatic cholera, and for an hour or two it was feared he would die. They finally gave him a dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy, which revived him until a physician arrived." That is precisely what the manufacturers of that medicine recommend for cholera. Send for a physician but give their medicine until the physician arrives. If cholera become prevalent in this country next summer this preparation will be in great demand because it can always be depended upon. For sale by Blakeley & Houghton, druggists.
