The following is a copy of a letter written to Senator Dolph by Capt Lewis and clearly states the condition of the settlers on forfeited railroad lands, as the gentlemen sees it, and there is no return about Nov. 1st. doubt as to the soundness of his reason-

The bill (H. R. 1,127) for the relief of Francis M. Tomlin,) introduced by Mr. McRae, will establish just the precedent wanted to make easier the passage of the bill providing for the repayment of the excess of \$1.25 per acre paid for the double minimum land within the limits of the grant to the N. P. Ry. Chicago. Co., since forfeited. The obvious reasons for charging double price (\$2.50 per acre) were, that the building of a railway would enchance the value of the lands along the line to that extent and that by

setting the even sections at that price the government would lose nothing by city. its grant to the railway of the odd sections. This was an implied contract between the government and the settlers. On the one hand the railway was to be built and on the other double price would be paid for the land. The settler

government, through the failure of the railroad company to build the road, has from 1850 to 1866, now a merchant of failed to do its part. More than that, the government has declared forfeited and has taker back the odd sections and still retains the excess paid by the settler on the even sections. The justice of this claim for repayment is so obvious that the railroad company has in every instance when applied for, repaid to extent of making the wheel revolve by those who purchased from them in for-means of a small electric motor, which mer years lands since declared forfeited, makes all the difference in the world in not only the amount paid them in excess of \$1.25 per acre, but interest on the same from date of such payments.

THE ENGAGED GIRL. Her First Meeting With the Parents of

the Man of Her Choice "It is all very lovely to become en-

gaged to the man of your choice and enjoy those blissful moments that come only once in a lifetime," remarked an elderly indy to a writer for the Louisville Post, "but when the young fiance has to go through the ordeal of meeting her intended husband's parents, then, indeed, is a trying moment that very few girls pass through without remembering very vividlw. The bride-tobe may have been known to the family for years, and yet when the son announces to his parents that she is the girl of his choice and the one whom he wishes to make his wife, she at once becomes in a certain degree a different creature and is criticised accordingly. No son ever yet married a woman whon his father thought quite good enough for him, though the outside world may think quite the contrary. The girl is always looked upon by the mother as an interloper who has come between her and her son's affections. When, therefore, the young girl is brought in contact with nor flance's parents, knowing the innate antagonism that reigns against her, she is seldom, if ever, at her best, and is more apt to court disfavor than complimentary comment from his relatives, simply from the fact that she is half stared to In my experience I have noticed that much of the trouble between a mother-in-law and her son's wife has been due to jealousy, and if at the very beginning these two could form a compact of mutual admiration for the son and husband and mutual forbearance with each other

Not the Only Violators.

The man with the "nigger babies" on the fair grounds, mentioned in yesterday's CHRONICLE, is not the only one who is openly defying the law of this state.
