

THE WAY SHE LOOKS

troubles the woman who is delicate, run-down, or overworked. She's hollow - checked, dull-eyed, thin, and pale, and it worries her.

Now, the way to look well is to be well. And the way to be well, if you're any such woman, is to faithfully use Dr. Pierce's Favorite Prescription. That is the only medicine that's guaranteed to build up woman's strength and to cure woman's ailments.

For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," house-keepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic.

If you're suffering from Catarrh, the proprietors of Dr. Sage's Catarrh Remedy ask you to try their medicine. Then, if you can't be cured, they'll pay you \$500 in cash.

Dufur Doings

Weather unchangeable, very warm and sultry. The farmers up near the timber and out on the ridge say "fair and warm weather," while we Dufurites think a shower might lay the dust and be quite acceptable.

The general health of Dufur is somewhat improved at present, whether on account of our new doctor or the settled state of the weather we are unable to say.

The haying season is about over and the farmers are doing some proper stacking this season and a great many are building larger barns and sheds and all will be on time for the thresher this year.

Mr. Harry Clarke from Portland has been visiting his friend S. B. Johnston.

Col. Laing of Portland made a short visit to his daughter, Mrs. J. C. Johnston, taking home with him Miss Hazel.

Miss Gertrude Laird has returned from the agency, where she has been employed the past year.

Rev. Mr. Adams preached his farewell sermon on the 15th.

There was a dance out at Hendrix hall Friday evening. Guess they had an enjoyable time by the jolly crowd we saw going.

Mr. S. B. Johnston met with a serious and almost fatal accident Friday. He was hauling hay and while on the load driving, the double trees gave way, frightening the horse, at the same time jerking him violently.

He fell with all force on the slab or stake in front of the wagon, striking on his breast and dragging him to the ground, where he was picked up insensible and in a precarious condition. Had the blow been two inches lower we shudder to think of the result. Dr. Dietrich was summoned immediately. He pronounced his injuries dangerous, but we are pleased to state this morning he is improving somewhat but great care must be taken to avoid fatal results.

Deafness Cannot be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

The New York Observer suggests that clergymen really ought not to write so illegibly as to provoke the compositors to commit the sin of profanity.

Help is Wanted.

by the women who are ailing and suffering, or weak and exhausted. And, to every such woman, help is guaranteed by Dr. Pierce's Favorite Prescription. For young girls just entering womanhood; women at the critical "change of life"; women approaching confinement; nursing mothers; and every woman who is "run-down" or overworked, it is a medicine that builds up, strengthens, and regulates, no matter what the condition of the system.

It's an invigorating, restorative tonic, a soothing and bracing nerve, and the only guaranteed remedy for "female complaints" and weaknesses. In bearing-down sensations, periodical pain, nervousness, inflammation, and every kindred ailment, if it ever fails to benefit or cure, you have your money back.

THE KNIGHTS OF LABOR.

Work of the General Executive Committee in Omaha.

OMAHA, July 22.—All the members of the general executive board of the Knights of Labor except Mr. Sovereign are now here and have taken up quarters at the Delmona, where the session of the executive officers will be held. Sovereign is expected tomorrow morning. Martin, McGuire, French and Hayes were seen this evening, and when asked what they expected to do during the coming meeting they announced that General Secretary Hayes was the spokesman and they would look to him to talk to the press. Mr. Hayes said:

"During the week we expect to complete arrangements for a systematic canvass of Nebraska, and we will push the organization to a finish. I am glad to note that the organized workers of Omaha are forming themselves into auxiliary companies. Regarding the movement for a general union of all the labor forces, I do not know what will be done about that at this meeting. We are in favor of changing cards, and have been all along, but we will never consent to a unity at the whole expense of the K. of L."

Spread of Plague.

WASHINGTON, July 22.—Recognizing the difficulties in the way of obtaining accurate information upon sanitary matters from Oriental countries, Dr. Stewart Eldredge, the health officer of the port of Yokohama and a member of the imperial board of health of Tokio, has sent to the marine hospital a semi-official statement of the epidemic of the plague in Southern China. It appears from his report that this scourge, of which only fragmentary news has been received, is one of the most dreadful on record, having its great foothold at the port of Hong Kong, where most of the foreign commerce touches. The disease broke out in Canton late last February, and at the same time was epidemic at Pakhoi, a port not often visited by Europeans. During March and April it steadily increased until it assumed gigantic proportions. According to the letter of Dr. Eldredge, the eastern authorities treated the disease with their ordinary indifference. Although Hong Kong is the center of trade in the east, but half a day's journey from Canton, and in constant communication therewith, the existence of the danger was ignored. Several cases appeared in Hong Kong during the first days of May. It steadily increased in that place until the mortality reached 100 a day, despite the exodus of 100,000 Chinese and many Europeans.

The natives, in most cases, have left on feeling the first symptoms of the disease, in the hope of dying in their native villages, while a dozen Europeans have been attacked and most of them have died. From Canton and Hong Kong the disease is spreading through the neighboring country, and will soon appear in the coast towns of China, North of Hong Kong, because, from the carelessness in these ports, no effective quarantine is likely to be established. Several cases have already occurred on steamers traveling from Hong Kong to Chinese ports, but without serious consequence, on account of the prompt action by the ship's surgeons. A quarantine system has been put in operation in Japan, holding ships from the infected districts nine days after arrival or after leaving. The last case has abated, and but one infected ship has reached Japan. Dr. Eldredge concludes his report:

"If I may presume to advise, I would say the most stringent measures may need be taken to protect the United States, particularly as regards certain classes of goods from China likely to convey infection—rags, old cotton, etc., and also such manufactured articles as are made in native workshops, with perhaps a case of plague lying in the room; such things as straw matting, embroideries and every sort of textile fabrics. So long as the disease is kept out of Japan, so long will this country be the best bulwark of the United States against the importation of disease."

The Height of Mount Rainier. SEATTLE, July 22.—Rev. D. C. Garrett and Ira Bronsen, two of a party who ascended Mount Rainier, returned home yesterday ahead of the rest, with the news that Captain Ingraham, the leader of the party, in taking various altitudes, had discovered that the altitudes of the highest point of the peak reached was 15,539, or nearly 1,100 higher than the generally accepted altitude of the mountain. Several homing pigeons taken with the party have reached Seattle with bulletins.

Greenland's Glaciers. Among the principal glaciers of Greenland the fiord of Jakobshavn annually sends into the sea a piece of ice about two miles wide, over three miles long and from eight hundred to one thousand feet thick. The ice yield of Torssukatak is about four miles wide, one to two miles long, according to the swiftness of movement at various seasons of the year, and from six hundred to eight hundred feet thick. Karajak yields annually a volume of ice about three miles wide and from one and a half to two miles long, with a height of eight hundred to one thousand feet. The yield from Rivdlarsak is two miles wide, from one and a half to two miles long and six hundred to eight hundred feet thick. Aegpallartok yields annually a piece of ice at least four miles long, two miles wide and from six hundred to one thousand feet thick.

Offended Dignity. An American traveler relates that, alighting at a hotel in Granada, a man at the door put out his hand toward him. The traveler supposed that the man was the porter of the hotel, and offered him his valise. The man stepped back, tossed his head, and frowned scornfully. "Carissima!" he exclaimed: "do you take me for a porter? I would have you understand that I am no porter." "Indeed? Then may I ask you, señor, what you are?" "I am a beggar, sir, and asked you for alms!"

Cook's Cotton Root Compound. A recent discovery by an old physician. Successfully used monthly by thousands of Ladies. It is the only perfectly safe and reliable medicine covered. Beware of unprincipled druggists who offer inferior medicines in place of this. Ask for Cook's Cotton Root Compound, take no substitutes, or inclose \$1 and 6 cents in postage in letter and we will send, sealed, by return mail. Full-sized particulars in plain envelope, to ladies only, 2 stamps. Address: Parry Lilly Company, 215 E. 23rd St., N. Y. City. Sold in The Dalles by Seines & Kinersly. Put on Your Glasses and Look at This. From \$100 to \$2,000 to loan. Apply to Geo. W. Howland, 113 Third St., The Dalles, Or.

AN IMPLSION.

A Process Exactly the Reverse of an Explosion.

Every one knows what an explosion is, but its opposite, an implsion, is less familiar. At great depth in the sea the conditions are favorable for its production. At twenty-five hundred fathoms the pressure is, roughly speaking, two and a half tons to the square inch—that is to say, several times greater than the pressure exerted by the steam upon the piston of a powerful engine. A beautiful experiment to illustrate the enormous force of this deep sea pressure was made during the voyage of H. M. S. Challenger. We quote from "The Fauna of the Deep Sea."

Mr. Buchanan hermetically sealed at both ends a thick glass tube several inches in length full of air. He wrapped this sealed tube in flannel and placed it in one of the wide copper cylinders, used to protect deep-sea thermometers when they are sent down with the sounding apparatus. The copper cylinder had holes bored in it, so that the water had free access inside, around the glass. The glass tube, it would seem, as it slowly descended held out long against the pressure, but at last suddenly gave way, and was crushed by the violence of the action to a fine powder.

This process, exactly the reverse of an explosion, is termed by Sir Wyville Thomson an implsion.

CONQUERING A TIGER.

Prompt Action Saves the Life of a Fat Urchin.

Mr. Jamrach, the London dealer in wild beasts, is a man of great personal strength and of corresponding courage. On one occasion he was called upon to use both against a tiger which had escaped from its "den." Mr. Phil Robinson tells the story in his recent book, "Some Country Sights and Sounds."

To moving a "den" into which a tiger had been just delivered, the bottom fell out and the rest of the structure immediately collapsed. The tiger walked out from under the heap of planks and iron bars, and suddenly appeared in the yard. Many people were looking on, the children, of course, being well to the front. On the appearance of the tiger there was a stampede.

The tiger picked up a fat urchin by his clothes, and walked out of the yard with its dinner in its mouth, intent upon finding a convenient place in which to take its meal. Mr. Jamrach ran after the beast, flung himself upon its back, and grasping his throat with both hands, choked it until it opened its mouth to gasp for breath. The urchin dropped out and scrambled off. The tiger, drawing at one tremendous draught a whole lungful of air, turned upon Mr. Jamrach just then a man from the yard came running up with a crowbar, and as the tiger turned, he struck it a tremendous thump on the head. For a moment the tiger was dazed, but only for a moment; then he prepared to spring again, but Mr. Jamrach seized the crowbar and struck the great beast another mighty thump.

The beast, as if taking in the situation, trotted off by itself straight to the yard, and, finding the door of an empty den open, walked in.

A MUD DIAMOND.

The Funny Mistake Made by a Church Congregation.

"Every one knows that in the early days of Methodism a considerable degree of strictness was maintained in regard to the wearing of jewelry," said Rev. L. G. Cole, an elderly divine, recently, to a representative of the St. Louis Globe-Democrat.

"An incident that amused me a great deal happened soon after I had entered the ministry. One Sunday just as I was in the midst of my sermon a woman rose and left the church, slamming the door as she went out with unnecessary violence. (Of course I supposed I had said something in my sermon at which she had taken offense, but later I made inquiries and learned that she had left because I wore a 'wicked bosom pin.' The amusing part of it was that I had ridden to church over a very muddy road, and one drop of mud had settled in the middle of my shirt bosom and had deceived the good sister into believing that I had adorned myself with a bosom pin."

"The Regulator Line"

The Dalles, Portland and Astoria Navigation Co.

THROUGH Foreign and Passenger Line

Through Daily Trips (Sundays excepted) between The Dalles and Portland. Steamer Regulator leaves The Dalles at 7 a. m., connecting at the Cascade Locks with Steamer Dalles City, Steamer Dalles City leaves Portland (Yamhill St. dock) at 6 a. m., connecting with Steamer Regulator for The Dalles.

PASSENGER RATES. One way \$2.00 Round trip 3.00

Freight Rates Greatly Reduced.

All freight, except car lots, will be brought through, without delay at Cascades.

Shipments for Portland received at any time day or night. Shipments for way landings must be delivered before 5 p. m. Live stock shipments solicited. Call on or address,

W. C. ALLAWAY, General Agent.

E. F. LAUGHLIN, General Manager.

THE DALLES, OREGON

J. F. FORD, Evangelist.

Of Des Moines, Iowa, writes under date of March 23, 1893:

S. B. MED. MFG. CO., Dufur, Oregon.

Gentlemen: On arriving home last week, I found all well and anxiously awaiting. Our little girl, eight and one-half years old, who had wasted away to 38 pounds, is now well, strong and vigorous, and well fleshed up. S. B. Cough Cure has done its work well. Both of the children like it. Your S. B. Cough Cure has cured and kept away all hoarseness from me. So give it to every one, with greetings for all. Wishing you prosperity, we are Yours, Ma. & Mm. J. F. Ford.

If you wish to feel fresh and cheerful, and ready for the spring work, cleanse your system with the Headache and Liver Cure, by taking two or three doses each week. Sold under a positive guarantee. 50 cents per bottle by all druggists.

FRENCH & CO., BANKERS.
