THE DALLES, OREGON

Entered at the postoffice at The Dalles, Oregon, as second-class mail matter.

STATE OFFICIALS: Governor, S. Pennington; Secretary of State, H. E. Klamm...

COUNTY OFFICIALS: County Judge, Geo. C. Blakeley; Sheriff, T. J. Dever; Treasurer, W. M. Kelsey...

THE INCOME TAX.

Every person with an income of \$4,000 per year and every business corporation has to face the income tax of the tariff bill.

Interests upon notes, bonds and other securities; profits realized within a year from sales of real estate purchased within a year from sales of real estate purchased within two years previous...

The following deductions are allowed: 1. Necessary expenses to carry on business.

2. All interest paid during the year. 3. All taxes paid during the year. 4. All losses actually sustained not compensated by insurance or otherwise.

Another provision is that: In computing the income of any person, corporation or association, there shall not be included the amount received from any corporation, company or association if the tax of two per cent has been paid upon its net profits of such organization as required by law.

The last clause given above would include all employees or corporations, although not intended to do so. Every corporation will be obliged to make a sworn statement, in which it will be forced to state:

- 1. Its gross profits. 2. Its expenses, exclusive of interest, annuities and dividends. 3. The net profits without allowing for interest, annuities or dividends. 4. Amounts paid for interest, annuities and dividends. 5. Every person who receives a salary in excess of \$4,000, and the amount.

A GREAT DUTY.

The Oregonian yesterday has an article concerning the management of state, county and city affairs that is directly to the point and filled with good hard horse sense.

"Never before has an Oregon legislature had such summons to duty as rests upon the one that will convene in January. Our whole official system has become honeycombed with practices which to use no harsher terms, are burdensome to the taxpayer and destructive to the state.

The O. R. & N. Co. is endeavoring to have its taxes reduced from \$4,500 to \$4,000 per mile. Its claim for a reduction is based upon the deterioration in values caused by inability to earn interest on the amount invested.

The Florida storm, the particulars of which are just becoming known, did a great amount of damage to orchards and orange groves, but fortunately no lives were lost.

per mile is not an exorbitant assessment, is a self-evident fact, and especially is this true when it is taken into consideration that the rolling stock is assessed at only \$750 per mile.

The entire press of the state has had something to say concerning the book trust; each presuming that what the other said was true. Now we do not know anything concerning this alleged octopus, and would like some information.

Senator Mitchell, in an interview concerning the probable candidates for president, after going over the field pretty thoroughly, gives as his opinion as to the most available man on the republican side the name of Senator Cameron of Pennsylvania.

The members of the Oregon Press Association from Western Oregon will pass through tonight on their way to Pendleton to attend the annual meeting of the association, which will be called to order at that place tomorrow.

The latest news from China is decidedly interesting. The Chinese troops at Wijn are said to have mutinied. The army is lacking in two things, one is patriotism and the other ammunition.

President Cleveland has issued a proclamation granting amnesty to all Mormons who have violated the laws concerning polygamy.

The secretary of war has ordered a board of engineers to meet at Portland about the middle of the month to change the plans of the locks so as to accommodate boats at a higher stage of water than was originally intended.

The czar of all the Russias is a very sick man. One learned doctor says he has Bright disease in an advanced stage, and another says he has neurasthenia, coupled with anemia.

EIGHTY YEARS AGO.

Recently we came across a volume written by Ross Cox, entitled "Adventures on the Columbia River including The Narrative of a Residence of Six Years on the Western Side of the Rocky Mountains, Among Various Tribes of Indians Hitherto Unknown."

"The upper part of this chain of rapids is a perpendicular fall of nearly sixteen feet; after which it continues down nearly one uninterrupted rapid for three miles and a half. The river here is compressed by the bold shore on each side to two hundred yards or less in breadth.

What strikes us as peculiar in his description is the statement that "the upper part of this chain of rapids is a perpendicular fall of nearly sixteen feet." There is no such fall there now, nor has there been within the memory of the oldest inhabitant.

JUDGE JENKINS REVERSED.

The famous strike order of Judge Jenkins made at Chicago last summer has been considered before the United States court of appeals, and has been modified. Jenkins, it will be remembered, decided that "a strike was necessarily illegal."

BEEF SUGAR INDUSTRY.

Until sites are chosen for the two best sugar refineries, which an enterprising company intends to establish in this state, the machinery now being manufactured in Germany, will not be shipped.

industry in this state. He explained that while the McKinley bounty has been abolished, there is still an advantage in duty on refined sugar sufficient to make its manufacture from beets profitable to both the producer and the refiner.

No trouble is anticipated in finding a home market for all the sugar that the two factories will be able to turn out. Professor G. W. Shaw, of the agricultural college at Corvallis, who has made exhaustive inquiry into the beet sugar question, found that Portland alone consumes and distributes about 25,000,000 pounds of sugar per annum.

MAKE 'EM SET.

The Sinslaw hatchery was completed this summer, and everything prepared for the hatching of salmon. There was only one reason why the hatchery was not a success, and that was that there were no chinooks.

RETIREMENT BUSINESS WOMAN

The value of a little Yankee push and enterprise is well illustrated in Mr. Francis B. Thurber's account of a trip from Madras to Trichinopoly, over an Indian railroad newly opened to travel. At one of the water stations the tank had given out, and a hundred or more natives were set at work with cartons and water jars to fetch water from a capacious well.

A DETECTIVE'S HINT.

It May Be of Service to Owners of Valuable Jewels. One of the big sleuths in the city had been seen by a citizen who had lost a diamond scarf-pin, says the Chicago Herald.

"Where did you keep it when you were not wearing it?" he asked of the loser.

"Under the lapel of my waistcoat. Always pinned it there when I didn't wear it in my scarf."

"Ever have your waistcoat scoured at the cleaner and dyer's?" "Yes, once a year." Then he named the place. The sleuth went to the place and found the missing spark. This in itself is of no consequence. But what the sleuth added may save some worry. "In a city like this," he said, "where so many are accustomed to sending wearing apparel to the scourer and dyer, valuables are likely to be left in a pocket. I have traced a number of such articles to those places. I do not say that all valuables that go in that direction are recovered, but I suggest to people who leave their apparel at the scourer's to examine the pockets first. It may save a whole lot of trouble."

Bullets Carried for Years. Two extraordinary cases of bullet wounds becoming active after a lapse of twenty-four years are reported by a German medical paper. One is that of a watchmaker named Kleemann living at Wundsdorf, who was wounded in the Franco-German war. Three years ago he had a bullet successfully extracted from his right shoulder, and a short time ago, after a month's illness, a second bullet was extracted from his left side. The second case is that of a stationmaster who a few days ago was operated upon at Bonn and had a French bullet, which pierced his right shoulder in the war, cut from his right side.

Healthy Berlin. According to the Glasgow Evening News it appears that the latest statistics issued by the German Imperial health department gave Berlin the honor of being the healthiest city in the world. The death-rate is given as only 16.3 per 1,000. The unhealthy city is Alexandria, which, despite its unvarying fine weather, its 500 fountains and its soft sea breezes, has a death-rate of no less than 32.9 per 1,000.

Married Fourteen of Her Own Sex. The most remarkable trial on record was that of Mary Hamilton, an English woman, who was brought into court on October 7, 1746. She was one of the greatest frauds of the day, having succeeded in deluding her own sex in a most extraordinary manner, it being clearly proven at the trial that she had at different times and places married not less than fourteen other women of various ages.
