### OHIO MONEY.

The democrats of Ohio have adopted or rather have issued a munifesto which starts out with a talschood. It says cents per 100 lbs. the last campaign "was fought upon two principal issues, a reformation of to 80 cents per 100 lbs. the tariff, and the adjustment of the MILLSTURFSmoney question by the restoration of silver to its rightful power and functions as one of the money metals under the constitution." The truth is the silthe last campaign. The democracy were afraid to raise that question in a national election, knowing that did they do so, New York was lost to them. The question was forced by President Cleveland at the expense of the tariff bill which he jeopardized and practically \$1.25 to \$2.25 per dezen, turkeys 5 cents killed by putting it off and attacking per lb silver. It follows the false assertion however with one that is perfectly true it less demand at \$1.50 per 100 is that : "The demand for money is incessant," and it might have added becoming more and more clamorous under and democ.atic rule. The manifesto is a re- weight at 310 cents dressed. hash of obsolete greenback theories calculated to catch the popular vote. That

those ideas is well assured.

#### PENNOYER DECLINES.

"Governor Pennover in a letter declining an invitation to fill a week,s en. rice, 7 cts. gagement in Montana says: "If the present ruinous depression in business and values, resulting directly from the demonitization of silver, and not from sk, \$1 00; 2001b sk, \$2 00. Stock salt, any tariff taxation, or change in such \$10 per ton. #### CHINA WHIPPED.

The Chinese in this country have great fainh in their countrymen at side, and are in other words, lanky. If They refuse to believe the reports about the Japanese victories, and say that the Chinese are ready to do and die for their country and that Japan will be whipped off the face of the earth when China gets ready to do the whipping. Their faith is sublime but their opinions are not worth what her own desires and the restrict- regulating. ions imposed by other European powers will permit.

Prof. Dewar is attracting world-wide attention by his remarkable series of railroad stock. Highes-To form a pool, successful experiments, in the Royal Institution laboratory, where he has liquefied oxygen, solidified nitrogen and reduced air to a frozen solid at a temperature of 346 degrees Fahr, below zero. For years frozen carbonic acid was the limit in extraordinarily low temperature, but Prof. Dewar begins where some of his predecessors ended in that journey toward "the absolute zero" that has so long been looked forward to by the exdorers in this department of science. Hydrogen is still successfully repelient to all efforts at the solidification of that lightest of all gases. A generation ago Farady advanced the theory that hydrogen was metallic. It has many characteristics that accord with that theory. The other theory that all metals are finally resolvable into hydrogen, and that hydrogen is the one simple element. does not meet with any present favor with scientists.

In perusing the Pendleton Tribune of yesterday which devotes most of its space to the visiting editors, we realize fully what a fine time our more fortunate brethren and "sistern" have had. We have the consolation, however, of knowing that we do not have to go home and go to work again. The trip to Milton and the reception at that place was one of the delightful portions of the meeting, and from our contemporary's description of the feed given the hungry quill drivers, it is evident that Milton folks understand the genus, newspaper man and realizes that the royal road to the intelligence is through the stomach. Some of those editors won't require another solid meal before Thanksgiving. which is perhaps fortunate for them, for
