WRONG IN PRINCIPLE.

One of the lessons learned by the business collapse of 1893 is that the bonds given by sheriffs and other financially responsible public servants must be carefully scrutinized and properly drawn up if they are to insure the county from loss through the dishonesty or ineffi-ciency of the principals. This lesson has been a costly one, not only to Mult-nomah county, but in a large degree to Columbia and other counties of the state. The first requirement of prudence in the administration of county affairs is in choosing capable business men for the offices; the next is to see that these officers furnish responsible bonds, and that no loop-hole is left through which these sureties can escape the obligation assumed in the event that the contingency, against which the requirement of bonds was interposed, Compliments and confidences between friends and political and finan-cial bed-fellows are all right, but it may be hoped that they will not again be-come ruling factors in the transaction of they can sell them." the business of Multnomah county.

We have always thought that the system of placing public officials under bonds was a wrong one. It is wrong in principle, and a failure in practice. When the people elect a man to office why should they require of two or three, or a half-dozen individuals that they become responsible for the shortcomings of the man whom the people have tion. The caucus settled the matter, for Jones are opposing candidates for the gone before the caucus, like good repuboffice of county treasurer. One political licans and gentlemen bow to the decision party has selected Smith and stated to of that caucus. office the law should punish the offender himself. That punishment should be made severe and certain. If the law must have somebody from whom to recoup, let it arrange for taking enough from his relatives, if he has any, to make good any losses. Let it go further and render his relations, within certain degrees, ineligible for any position of public trust. This would evidently be unjust, but it would not be as unjust as the present law.

Let the law recognize the fact that the criminal is the one to punish, instead of his friends, and see to it that he is punished, and there would be no necessity for making one or two citizens of the county become guarantors that the majority of the voters of the county had not made fools of themselves in electing their officers. If the bonding system is to continue, the laws should be changed, so that the bondsmen should have some kind of a show, for they, instead of the people, should be allowed to elect the person for whom they become responsible.

SPRECKLES ON HAWAII.

Claus Spreckles, the San Francisco sugar king, knows most of the situation in Hawaii, and talks sensibly concerning that country. He is opposed to the permanent maintainance of an American warship in Honolulu harbor. In an interview at San Francisco Wednesday he said:

"When I first began to consider the situation in the Hawaiian islands, I looked over the ground carefully. My idea then was that a republic should be created, the people to choose their president and vice-president, and to vote on the new constitution. But when I be-

gan to talk about a republic they wanted to kill me. I would not join them in their scheme of annexation to the United States, which would not do either government any good. I told them that a provisional government could not stand and that if they did not want a republic. I would go back to the queen. The last election that was held under the government by the queen brought out 11,000 votes. You will notice at the last election, under the present so-called republican government, there were only 2,000 votes, and of these perhaps 1,000 would not have been legally entitied under the constitution with which the queen ruled. It is a sham republic and those who are concerned are working the matter only as a speculation pure and simple, hoping to sell their real estate at a high price. They expect to be able to do that.

"Look sensibly at what we would get and give by annexation. We could not annex the country without taking in the people who are in its territory. There are from 12,000 to 15,000 Chinese, from 15,000 to 18,000 Japanese and 40,000 or more half-castes. Then there are 1,000 lepers to be taken care of, and supported by us. This is not a very pleasing prospect. There is no danger that a foreign nation will ever take the islands. Nor is there any danger that they will change their commercial relations with us. There has been a great deal of talk, which has no foundation, and we know that to be a fact. For instance, there is nothing to the talk concerning the laying of a telegraph cable from British Columbia. Nor is there anything in the proposition for a steamship line between Vancouver and Honolulu. The Hawaiian islands have to sell their products here. This is the only place where

It is quite probable though that the session will last forty days anyhow. The hours that cost the state the least money will be those when the law-makers are not in session.

WHO IS THE MURDERER!

The Oregonian yesterday had an account of the attempt of Judge Gibbs of pardoned out of the penitentiary. It will be remembered by many that Gibbs was a Pullman porter, and that he shot and killed James McDevitt, and also shot and severely wounded Tom McDevitt, the depot master, whom every traveler knew and liked. As the Oregonian states the matter, the entire jury that tried Gibbs had signed a petition for his pardon, and that Governor Pennover was disposed to grant it until he had a conversation with M. C. Pennington, the cashier of the Pullman Company at Portland. What that conversation was the governor and Mr. Pennington know, but the latter gentleman has not vouchsafed to say publicly what he said to the governor. We are not a believer in promiscuous pardoning, nor do we believe that Gibbs

should be pardoned, though we thought at the time, and still think that Gibbs' crime was the legitimate outcome of the Pullman Co.'s system of carrying on its business, by which that company hired its conductors and porters, but comthe shape of tips. It appeared in the trial of the case, as we remember the testimony, that one of the rules of the Pullman Co. was that the porter should not allow passengers to put packages or baggage in the Pullman car until it was time for the train to start. On the 11th depot in Portland attending to his duties about the car, it being an hour or two before the time for the train to leave. A lady came to the depot and requested Gibbs to put some packages in the car. Although it was against the rules, Gibbs acceded to the lady's request, being superinduced thereto by a tip. It was by this same system of calculating that an old philosopher proved to his own satisfaction at least, that the human family could not have descended from Adam and Eve because each person having a father and mother, and each of these having a father and mother, the more remote the generation from which descent was traced, the more people it would require, and that consequently the earlier the period the greater the population.

On this side of the hand while handling a small pocket the river a republican in favor of gold, or at least against free coinage of silver, has been selected. On the other side it seems quite certain that a man will be selected, who on that measure will be able to pair with ours. It is of great interest to us whom that senator shall be, for while he will come from Washington, he will at the same time legislate for Oregon as well as Washington, and the whole United States. We must confess that the two leading candidates do not appeal strongly to the party at large, and a serious wound.

Dr. Miles Medical Co., Elkhart, Ind.:

I desire to add my experience to the many testimonials of benefit, persons have received from the use of your remedies. I was troubled with heart disease for several years, at first I felt an oppression around my heart: I then began to get short of breath, after violent exercise I would have palpitation, and finally became so bad that that work became an impossibility. I was doctored by several of the best physicians but obtained only temporary relief; Mr. G. B. Capps, druggist here, induced me to try a bottle of your Heart Cure. It helped me from the start; my trouble had become chronic, I had neglected it so long, that I have used several bottles. The result has been most wonderful. I can breather freely and easily, suffering no inconvenience from extra exertion and can enjoy a good night's rest, something I have not been able to do for years. I cannot express thanks too highly in commendation of your Heart Cure; believing you have prolonged my life many years, I can and will cheerfully recommend it to anyone suffering with heart trouble.
