the railway company. Two portage roads, he said, were maintained between The Dalles and Celilo, until Eastern parties saw fit to construct a railroad. Then the line of steamboats was discontinued. From that time to this the country has paid tribute to the railroad company. The state has power to relieve ship-

There are two ways of getting use of 's company's track. First, by agreement with the company; second, the state might stretch out its mighty arm of eminent domain. The company, probably, would not refuse to enter into such an agreement, as if the state decides to build a portage it would rather lease its piece of road and get some profit than not lease and get no profit. Portland was not greatly interested in

a portage. That city, Mr. Hughes said, chamber of commerce went to Salem on gets all the freight by Tailroad anyhow, a special train Thursday morning for the but. Portland was interested in the purpose of consulting the Multnomah effort for the relief of the Eastern Oresenators and the delegation about two gon farmers, because, lower rates of bills authorizing the construction of a transportation would place them on a portage railway from The Dalles to Celilo more prosperous basis. ### THE PACIFIC ROADS.

The Reilly funding bill, being a bill to fund the debt of the Union and Central Pacific railroads, so that those roads would be given fifty years to pay their debts to the government, is to be reported back to the house, with a strong recommendation by the minority of the committee. The debt originally was about \$64,000,006, and the interest to dead cold bluff. An asylum in Southern date amounts to \$74,000,000, making a Oregon is not needed; one in Eastern grand total debt of \$138,000,000. To Oregon is. It is needed for the care of meet this there is in the sinking fund, such patients as are sent from the coast provided for some time ago, about \$20,-000,000, leaving the debt due \$118,000,every promise every made concerning the payment of this debt, and have ignored every law by which the government undertook to protect itself, even congress has grown tired of fooling with But the radical difference in climate exthem, and the people of the Pacific coast, at least, are almost unanimous in their demands that the government place selected for it is interested; but a foreclose its lien on the roads and operate them.

The Central Pacific has been perhaps the most peculiarly managed road in the world. It was no sooner completed, and paid for by the government, than the management induced a rotten conrate of about \$35,000 per mile and to should be located in Eastern Oregon, as make the government lien on the roads subservient to it. In other words, con- for it.

gress permitted the government lien to become a second mortgage, and practically worthless. Then the boss conspirators, Crocker, Huntington, Stantord, and that gang of gold-laced thieves. took the money so raised, and also all the earnings of the road, and constructed a road of their own that the government had no claims on. But the little gang of big thieves overlooked one thing. They incorporated under the laws of California, and hence every stockholder is liable for the debts of the company up to the value of his stock, and it is possible that the bosses may be compelled to pay, in 1911, when the fifty years, the limit of the corporation, expires. This is why Huntington is so anxious to have the Reilly funding bill passed, as by it the final settlement will be put off fifty years. In this way the increased business, it is thought, would run up the earnings of the road so that it would pay for itself, while Huntington et al would be allowed to keep all they have stolen from the government, the Southern Pacific besides, and at the end of fifty years the Central would be theirs also. It is a pretty scheme, but California's delegation in congress is showing it up in such a way that it will hardly work. Mr. Huntington, who has been in Washington for months trying to get the Reilly bill passed, is growing weary, and threatened to turn the whole settlement of the affair over to congress, which 1s, of course, real mean on his part. In conversation with a senator Saturday he said :

"I am not here to propose any particular bill. I have become so sick of the worry and tedium of trying to show congress the best way out of the railroad

TELLS WHERE AND WHY HE WASTED GOOD MONEY USELESSLY.

For Creek, Ky., March 12, 1894. Gentlement-For more than a year I suffered everely with heart trouble. At times my heart seemed to stop beating, at others it beat loudiy and fast, and occasionally a harp pain shot through it for an instant. Iny severe exercise gave me a distressing sharp pain shot through if for an instant. Any severe exercise gave me a distressing pain under the left shoulder blade. I suf-fered much from shortness of breath, and three to four hours sleep was the most i could get in any one night. One week in Septem-ber i scarcely closed my eyes. I spent for for medicines and doctors in Louisville, Sta-byville, Frankfort, Cincinnati and Lawrenco-burg. It was all squandered for nothing. I finally got Dr. Miles' Nervine and Heart Ours at a drug store in Lawrencoburg, and in three days have derived more benefit from the use of Dr. Miles' remedies than I got from all the doctors and their medicines. I think sverybody ought to know of the marvelous power contained in Dr. Miles' remedies. Yours very gratefully. W. H. HUGHES.

On behalf of the Multnomah senators and delegation Colonel McCraken and Mr. Paxton explained their attitude and the procedure necessary to secure a passage of the bill.

At 2 o'clock the chamber of commerce delegation entered the house and were given reserved seats within the bar. Hofer moved that Messrs. D. D. Oliphant and Ellis G. Hughes be invited to address the house. The motion was carried and the gentlemen 'were invited to take the platform. Mr. Hughes was the first to speak. After being introduced to the house by Speaker Moores, he said the delegation from the chamber of commerce visited Salem in the interest of Boothby's bill authorizing the construction of a portage railway between The Dalles and Celilo, and appropriating \$300,000 therefor. Mr. Hughes spoke of the necessity of having an open river. It was a matter of the greatest importance, not only to Portland and Eastern Oregon, but to all of Oregon. There was only one railroad to Eastern Oregon and that railroad would not accept freight cident had happened. "Jury has not for \$2 a ton when it could get \$5.
