OUR MOTHER EARTH.

There has been a period of depression throughout the agricultural portions of the United States that has naturally caused a like depression in all other industries. As a result of this, farm lands have depreciated in value, farming has come to be looked upon as an unprofitable pursuit, and there has been in consequence a rapid filling up of the cities at the expense of the rural population. The movement is a natural one, for it serves to adjust the elements of supply and demand, and the final result will be to enhance the value of farm products. and consequently of the land itself. It will be but a few years until the landed proprietor, the owner of the broad acres, will be looked upon, even in this country, as the most favored of men. The country is settling up rapidly, and when there are no more new lands to be acquired those who have farms to bequeath to their children will have the noblest of all inheritances to leave them.

Few, indeed, look upon the soil with other than the idea of its value as an investment. In the practical every-day lifethe perpetual rush and grasping for money, the sentimental is entirely overhe is apt to own some of it. There is a your country because you own a part of not for its value from a money standpoint, but because we look upon it as a benefactor. All that we have of pleasure, of joy, of hope, of sadness, are of the earth. And when no longer we tread the shady paths, or listen to the winds whisperings to the trees, or hear the splashing of the running waters, or see the beauties wrought when the glad soil supple limbs that erstwhile danced for nearer to the earth that soon will open and we are fast coming to the concluher robes to receive and shelter usa mother's arms to be lulled to sleep and laid to rest. There on her bosom we may sleep. The seasons may chase each other swiftly around the starry circle; the tide of years will ebb and flow; the winds and the rain will beat down the lowly mound that marks the spot where our good mother has sheltered us, and in a few brief years we shall pass away from the memory of men-it is the kind old earth that will give us a resting place forever. It provides for us in life, and takes care of us when dead. Why then should we not look upon it with the eyes of sentiment and affection, and be moved to pride at the sense of ownership in it?

other things we could do. Mr. Vogt last year demonstrated that hops could be grown with profit; broom corn tops out as though it belonged here, and experiment will, no doubt, demonstrate that our possible industries are hardly yet thought of. In the meanwhile, we dream like somebody of "most tremen-

dous pippins," and, as Saxe says: "Apples of other appellations." dream will be realized in a few years and then even editors can own two spring overcoats and a Fedora hat at the same time.

A FAMILY AFFLICTION.

The

Rev. Wm. Cleveland, brother of the president has been asked to resign by the representatives of the congregation of his church, the vote being 28 to 1. Mr. Cleveland, instead of resigning, will appeal to the presbytery. The president seems to be afflicted the same way, and while it is not probable that he will be asked to resign, yet if the matter could be put to a vote, it would be tound as nearly unanimous as that concerning his brother. Just now the chief executive occupies the peculiar distinction of being a president without a party. Elected as a democrat, Mr. Cleveland tried to hover too many eggs that did not belong in his nest, and so spoiled all. He refuses to follow the

policy of his party, does not believe in republicanism, and has no confidence in mugwumps. At the same time he has no definite policy of his own, but is just drifting along, going like the old "nigger," through the woods, and spreading his sails to every breeze, in hopes of being nominated for a third term.

In a little more than a year the national conventions will be held, and when Mr. Cleveland reads the proceedings of the republican convention he can easily name his successor.

If the figures given by some of the powers that be proceeded to vaccinate Portland papers are correct, it is high 3.000 women of a certain class in Portland. The census gives that city a popthis again by two, and we have in round numbers 19,000, which would give practically the number of women above the age of 21 years. Allowing for those under 21 who may need the shelter of a refuge home, and also for those above a certain age, and the number of women in Portland will not exceed 15,000. It will be seen from this either that our Portland contemporary groesly exaggerates the number in giving it as 3,000, or else 20 per cent of the female population of the city is included in the class named. We do not believe the per centage will exceed one-fourth of the number named.

THE MARKETS.

FRIDAY, April 5th .- There is but little to say about the market or market con-

Wheat has crawled up steadily since this is that the visible cattle supply tion is concerned. There will be a short

heretofore supplied. Italy has imposed a duty on wheat of 36.7 cents a bushel. From this it is almost a certainty that Spain added 9 cents more last year, so smaller consumption abroad, and con-

> As to vegetables, this market is pretty vell supplied. Young onions, radishes. lettuce, etc., are in abundance.

Eggs and butter are plentiful, cheap, and the latter of extra good quality. We give quotations as follows: WHEAT-38 cents per bushel. OATS-75 cents per 100 pounds. BARLEY-55 cents per 100 pounds. FLOUR-\$2 25 per pound; retail \$2.50. CHOP FEED-\$15.00 per ton. BRAN-\$10.00 per ton. POTATOES-40 cents per sack. CHICKENS-\$2.50 to \$3.00 per dozen. Eggs-8 cents per dozen. BUTTER-30 to 40 cents per roll. WHEAT HAY-\$9 per ton. OAT HAY-\$8 per ton. TIMOTHY-\$12 per ton. WOOL-816 cents for best grade. WOOL BAGS-39 cents. SHEEP PELTS-5 cents per pound. HIDES-6 to 61/4 per pound.

Monday's Dust Storm.

A correspondent of the Spokesman Review, writing from Garfield of the remarkable dust storm of last Monday, savs:

"The cause and origin of the dust storms similar to the one which passed over here Monday evening have long been a mystery. The wind will sometimes blow steadily for days without any considerable amount of dust being raised by it, while, on other occasions, when the conditions are apparently the same, the air will 'be full of dust, causing the sun to give but a sickly color, sometimes even giving an appearance to the earth as in times of eclipse. The dust usually flies high, the lower strata of air being about as free from dust as ordinarily. Monday night was an exception, the dust being next to the earth, flying in quantities that made it almost impossible to face the wind which forced it along, the whole landscape presenting a ghastly hue until the darkness of night settled down. The extent of these storms is far beyond that commonly supposed. The dust is taken from the great plains of the Columbia, in the vicinity of Walla Walla, and when the storm continues for several hours-as it frequently doesit is swept northeast across the fields. forests and mines of Washington and Idaho; crosses the international boundary and shades the meadows of the Northwest territories; frightens the inhabitants of Manitoba with its similarity in appearance to that of a cyclone; still pushes on above the trappers of the Nelson and Severn rivers, casts its faint shadow on the sailors on Hudson's bay, 1500 miles from its starting point, and still continues its course onward to-no

PROGRESS.

People who get the greatest degree of comfort and real en-joyment out of life, are those who make the most out of their opportunities. Quick perception and good judgment, lead such promptly to adopt and make use of those refined and improved products of make use of those refined and improved products of modern inventive genius which best serve the needs of their physical being. Accordingly, the most intelligent and progressive people are found to employ the most refined and coeffect lavative to res. ¥. perfect laxative to reg-culate and tone up the stomach, liver, and bowels, when in need

of such an agent-hence the great popularity of Dr. Pierce's Pleasant Pellets. These are made from the purest, most refined and made from the purest, most refined and concentrated vegetable extracts, and from forty-two to forty-four are contained in each vial, which is sold at the same price as the cheaper made and more ordinary pills found in the market. In curative vir-tues, there is no comparison to be made be-tween them and the ordinary pills, as any one may easily learn by sending for a free sample, (four to seven doses) of the Pel-lets, which will be sent on receipt of name and address on a postal card. ONCE USED THEY APE ALWAYS IN PAVOP. ONCE USED THEY ARE ALWAYS IN FAVOR.

The Pellets cure biliousness, sick and The Pellets cure biliousness, sick and bilious headache, dizziness, costiveness, or constipation, sour stomach, loss of appetite, coated tongue, indigestion, or dyspepsia, windy belchings, "heart-burn," pain and distress after eating, and kindred derange-ments of the liver, stomach and bowels. Put up in glass vials, therefore always fresh and reliable. One little "Pellet" is a laxative, two are mildly cathartic. As a "dinner pill," to promote digestion, take one each day after dinner. To relieve distress from over-cating, they are undistress from over-cating, they are un-equaled. They are tiny, sugar-coated granules; any child will readily take them.

Accept no substitute that may be recom-mended to be "just as good." It may be better for the dealer, because of paying him a better profit, but he is not the one who needs help. Address for free sample, WORLD'S DISPENSARY MEDICAL ASEO-CIATION, 663 Main Street, Buffalo, N. Y.

Weather Crop Bulletin No. 1.

In the Columbia river valleys the highest temperatures ranged from 52 to 72 degrees, while the lowest were from 31 to 52 degrees. The rainfall was less than .10 of an inch. On the 28th a light snow fell in the southern portion of the valley. South of the Blue mountains, the temperature ranged from 22 to 64 degrees. The nights were generally frosty.

In the Columbia river valley, apricots, peaches and plums are in bloom and have, so far, escaped from the frosts. The ground is not in the best of condition for spring plowing and seeding. The major portion of the cereal crop will be from summer fallowed ground, while volunteer crops will be relied upon in many sections. In the Grand Ronde valley fruit buds are swelling and will soon be ready to open. Spring farm work is progressing. South of the Grand Ronde valley and of the Blue mountains, -the stock area of Oregon-but little progress has been made, so far, in farming operations. The ranges are fair, and the stock, of all kinds, in good condition. Lambing is in progress and but little loss is reported. The wool is reported as long and strong with clean, heavy fleece.

The season opens anspiciously in Oregon with bright promise of diversified purchaser of the entire stock, notes and products and good yields.

ITS LOCAL WITH US.

The Oregonian recently sent letters to one hundred persons in the state asking their opinion as to what should be done Uctober. The meeting was said to be a to increase the prosperity of the state. The answers are beginning to come in and are practically identical in their ideas. Diversified farming, the encouragement of manufactures, dairying, etc . form the subject of each and all. There is one matter that, so far as we have observed in the answers, has not been touched, and that is a reduced freight rate to the markets of the East. We raise immense amounts of fruit here, but, with the exception of apples, none of it will bear the rates at present existing and leave any profit to the dealer. We are not at all cranky concerning railroads, for we realize that they must have fair returns on their money, but we believe the freight rates could be cut in two, and that by so doing the roads would build up an immense trade that would yield them much more profit than the present rates, which practically forbid shipment of plums, prunes, etc. Another thing is the commissions charged by the firms in the East, which in ninety-nine cases out of a hundred overstep the boundary between profit and larceny.

Up in this neighborhood we are doing all we can to increase the prosperity of this part of the state by planting winter apples. Within five years Wasco county throw at the birds. There are many up a tariff bill.

sion that the moral wave must be acwe should go gladly and willingly, as to companied by soap, or else be applied with the aid of a hypodermic syringe.

> A new scheme for fleecing the gullible is being worked with great success in the states of the middle northwest. A gang of men goes through the country selling at one dollar each, apple trees of an imaginary variety, represented to be as hardy as burr oak for the reason that the variety is propagated from seed exclusively and the trees are therefore neither grafted nor budded-those operations causing the alleged tenderness of all previous varieties known. It is said that not only farmers, but also editors, lawyers and doctors have been freely contributing their dollars in exchange

for the trees.

The state board of horticulture, which has been in session at Portland for sevvery profitable one. The rules and regpest-infected trees and stock have been put in simple and concise form. They will be given to the press as soon as they are passed upon by an attorney.

The letters in the Oregonian on the resources of the state and the steps necing, though necessarily they are more or practice economy, diversify our farming, grow everything we need and something

besides, and above all to be a unit in everything that will advance the interests of the state.

"Yesterday," says the Sun, "the first Portland custom house." The reduction of the duty has made the business unprofitable, and the government will now get some revenue from the importation of the death-dealing drug.

Postmaster-General Bissell has been superseded by the new appointee, Ex-Congressman Wilson of West Virginia, who has taken the office and is now in will ship as many bushels of apples as full charge of mails. It is to be hoped she now does bushels of wheat, and he will do better at getting the mails gentleman, "but I fear I am not a good then we are going to have money to around on time than he did in getting enough man to back it up."-Indianap- fails to cure piles.
