A SENSATIONAL REPORT OF CRIMES.

"The extreme to which through the ambition of professional detective matters of this kind (referring to accusations against Holmes) are carried, serve illy the ends of justice. It is doubtful whether they serve any more commendable purpose than that which feeds a morbid public appetite that constantly fattens on crime, and as constantly demands a fresh relay of food."-Oregonian.

THE CHRONICLE heartily concurs in the foregoing; the wrangling of lawyers through the press tends far less-al-though that is bad enough in its tendency-to bring the courts into public disrepute, than the publication of garbeled reports of expected testimony in criminal cases. The paid detective is in character not far from the criminal in his disposition to thwart vile justice: no misrepresentation is too gross for him to use; no trick too dishonest to be played; and when the accused is under arrest reporters of the modern city papers are too willing to feed the morbid appetite by publishing the statements of the detectives concerning the alleged crime, and if the prosecuting officers remain silent concerning the testimony, as they certainly ought to do, but seldom do, the enterprising reporter secures food for this morbid appetite by making up a statement for them. The public read these misjointed, sensational and, to a great extent, false statements of the testimony, and when the case comes on for trial are prepared to convict before the court has had ought to do with the case. At the trial the evidence admitted to the hearing of the jury is usually entirely unlike that upon which the public has rendered its verdict and after the trial results differently from what the public would have it; the public thereupon denounces the trial as a farce, proclaims the jury system a failure and concludes that justice has miscarried.

Often the trial is a failure and it is so because of the officiousness and interference of the newspapers, whose trial of the case is usually from the standpoint of the so-called detective. We believe the press is largely to blame for the "morbid appetite" of the public; and the trial of cases by the press upon statements of detectives creates a public contempt for courts and all that have to do with the trial of cases.

The nation is ready for another change and we think the treasury department is much in need of the change that is surely coming.

REPORT.

The public will read with interest the report of the water commissioner's, published in vesterday's CHRONICLE. have heretofore heard some complaint and perhaps the local papers have been to blame in the matter more than the commission. There has elapsed less than a year since the first installment of water bonds were paid off and yet it appears that there is now on hand nearly \$5000, of which \$4500 is drawing 6 per cent. Our water system is in good hands and there is no reason why the city should not meet its obligations for the water system without feeling the burden.

Anything that will help the future of The Dalles should be enthusiastically supported by our citizens. An organization composed of business men heartily devoted to the interests of our growing town is what just at present we need the most. In former years such a body did good work; it could do better now. Matters are continually arising, which for lack of a proper body of reference, are left neglected. Before another three months shall pass we should have som such organization. Pendleton, Baker City and La Grande have their boards of trade, commercial clubs or whatever name is given them. Our future is as bright as the brightest. Strong concerted efforts will hasten its coming. In a city more than anywhere else the adage "In Unity there is Strength," has especial force.

The Chicago police have made a most startling confession, namely, that they have no evidence strong enough to convict Holmes, the man who is more vited to step down and out, the chief accused than any in the world just now. reason assigned was that the income of When the Chicago police say they have the government was too great for the no evidence to convict an accused, the tho Columbia river log raft marks an welfare of the nation and the surplus rest of the world stands still, holds its era in ocean transportation. A BOARD OF TRADE.

A letter came to The Dalles yesterday from an eastern city addressed to the city. Board of Trade of this city, making enquiries as to the advantages offered by The Dalles for the establishment of a partment does not enjoy that sort of a branch factory for the manufacture of joke and is not likely to hasten again to school supplies and furfiture. Both these enterprises had their origin in The that detailed reports were not published, Dalles board of trade, and for some the Board of Trade Boat company.

We are now entering upon a new era of prosperity and we need, more than almost anything else, an organization which will unite in a common purpose the business men of the city. It should be organized on a sound financial basis and conducted for the commercial welfare of this city. Who will take the where her husband (Rev. Ireland) died matter in hand?

BUILDING MATERIAL GOING UP.

A strong indication of returning prosperity is the confidence apparent among builders; we assume that our own city is no exception, and here many residences and some business houses are building or have just been completed. The price of nails and lumber have both recently experienced a sharp advance; in Portland lumber has recently advanced 25 per cent.

A gentleman recently from Puget Sound reports that the lumbering interests are again active and as a result business in all lines is reviving. The same is true in the lumbering districts of California and Oregon. We hope it is a permanent improvement, although very small producer of lumber. Whatever helps the northwest helps us and we care little from what source the prosperity comes.

TO PUT ON needed flesh, no mat-ter how you've lost it, take Dr. Pierce's Golden Medical Discovery. It works wonders. By restor-ing the normal ac-tion of the deranged

tion of the deranged organs and functions, it builds the flesh up to a safe and healthy standard—promptly, pleasantly and naturally. The weak, emaciated thin, pale and puny are made strong, plump, round and rosy. Nothing so effective as a strength restorer and flesh maker is known to medical science; this puts on healthy flesh not the fat of cod liver oil and its filthy compounds. It rouses every organ of the body to activity, purifies, enriches and vitalizes the blood so that the body feels refreshed and strengthened. If you are too thin, too weak, too nervous, it may be that the food assimilation is at fault. A certain amount assimilation is at fault. A certain amo assimilation is at fault. A certain amount of bile is necessary for the reception of the fat foods in the blood. Too often the liver holds back this element which would help digestion. Dr. Pierce's Golden Medical Discovery stimulates, tones up and invigorates the liver, nourishes the blood, and the muscles, stomach and nerves get the rich blood they require.

"I was taken sick on the 24th of last April with nervous prostration, and had the daily attendance of three of our best physicians, one of them visiting me twice each day. The result was that at the end of four months I was an helpless invalid. Had run down from 176 to 120 pounds. Did not get thirty minutes sleep in each twenty-four hours. My condition was simply terrible! About four weeks ago, I began taking Dr. Miles' Restorative Nervine, Touic and Pills. I have gained & pounds in weight, can eat and sleep, and in fact, feel as well as I ever did. I felt the good effects of your remedies inside of 48 hours."

Mr. Stephens writes again under date of March 14, 1894.

After my great recovery, as I wrote you before, scores of people stopped me on the streets, came to see me at my store and wrote me from different parts of this and adjoining States, to all of whom I told the story of the wonderful curative powers of your remedies and am only too giad to herald their praises.
