It is true, also, that Today it turns out that he is a woman, the shedding of the blood of noncombatants is not confined to the Spanish and for fourteen years has been mastroops. In Pinar del Rio there is a querading as a man. It is stated that revel of death in which Maceo, as well letters addressed to her show that she comes of respectable people in New as the Spanish volunteers, is a prime figure. The rebel general dominates in York, who are very wealthy. Since coming to Helena she has gained the that province, through fear. His orders have gone forth, with the penalty of confidence of prominent merchante, who on by the tide. death attached, and the violation of set her up in the oil business here and at Great Falls, but drink caused her the those edicts has been followed with sumthose edicts has been followed with sum-mary punishments. The insurgents, it is said, hang those whom they condemn, of the Salvation Army Rescue Home in rather than to put them to death with this city.

A BRIDGE GAVE WAY.

And a Crowded Street Car Plunges Into Victoria Harbor.

VICTORIA, B. C., May 26 .- A terrible accident occurred here today. A sham tion of 1868. The Cabans show no signs fight and review was to take place at curred so quickly that nobody has a of yielding. Indeed, they gain strength della. They flamt the Service at their Macaulay point, near Esquimalt, this very clear recollection of what transdaily. They flaunt the Spanish at their afternoon, and crowds were making their pired.

Removing Bodies of Victims of the Victoria Disaster.

THE LOSS OF LIFE GREATER

It is Now Estimated That Nearly Two Hundred Persons Went Down.

VICTORIA, May 27 .- Thousands of sorrowful friends and relatives crowded around the approaches to the bridge where the terrible accident occurred yesterday, which cost over 60 lives, eagerly ecanning each body as it was brought to land. Mothers, crazed by the loss of husbands or children, attempted to jump into the water in their eagerness to rescue their loved ones. As body after body was brought to the shore crowds rushed forward to search each mangled face, dreading the possibility that it might be that of some one whom they hoped had escaped from the death trap.

Twenty persons known to have been on the bridge at the time of the accident are missing, and it is supposed that they have perished. The car register shows 90 fares, and it is probable that over 125 people were on board.

On the surface of Victoria arm struggling people fought to gain the shore. Strong men and frail women battled for

their lives. Husbands emerged from the wreckage, only to find that their wives had gone down to death. Children were carried down by those who were stronger, and fathers who had struggled from beneath the timbers and debris of the bridge and car and carriages returned to their doom in a vain endeavor to rescue their babes. ments." The waters of the arm for yards around

were dyed red with blood, and floating ing rapidly toward San Jose on a buckout to sea sent corpse after corpse, borne The shricks of men, the screams of the murders.

women and children filled the air and nerved the crowds of rescuers on to feats that endangered life and limb. The number of carriages lost and the

foot passengers carried down in the wreck cannot be learned. It is claimed by many that fully 200 persons went down with the span, and that more than half of them perished. The accident oc-

tims lay were bespattered with blood, and there was every evidence to show STRICKEN ST. LOUIS that the dead had made a desperate struggle for their lives. Page, finding that all were beyond

help, proceeded at once to notify the authorities in this city, and word was immediately telephoned to officers in all parts of the county to be on the lookout for the assassin. A large number of officers and men left immediately for the scene of the murder. The family was one of the best known in the valley, Colonel McGlincey being prominently identified with the fruit business. The McGlincey home is in the midst of the most beautiful and prosperous section of Santa Clara county,

COALING OF WARSHIPS.

Spanish Government Advised to Pre pare for an Emergency.

HAVANA, May 26 .- Diario El Ejercito, regarded as the organ of the Spanish army in Cuba, in discussing the possibility of war with the United States SAVA:

"We have a greater army than was ever before in Spanish America.' Our soldiers are invincible. We have got together an astonishing amount of war material. But, while we have an army more than sufficient to deal with the Yankees, our great warships are in European waters. In case of the opening of hostilities they would have to visitors.

navigate 3000 miles, and as they must travel at high speed they would use up most of the coal possible to be carried in their bunkers before they could get here."

The paper then points out the difficulty that would be found in coaling warships and suggests the necessity of Spain bringing to Cuba a sufficient supply of coal and the establishment of the coaling vessels within reach of the warships. At present the United States is the only source of coal supply in America.

The intimation that Spain has conceded to the United States an extension pleasure by Havana tobacco mea and manded. The rush of tobacco to the lowing order: United States is now so great that the Algeria is expected to take nearly 10,000 bales, valued at \$1,000,000, to Key West. During the past week fully 30,000 bales were shipped. Shippers here say the United States stock is fully equal to the demand for 18 months.

Tygh Flouring Mills.

way there by every route. All the tram cars were packed. Shortly before two o'clock two cars left Government street with more than 100 people. The first got over Point Ellice bridge, which

crosses Victoria Arm, safely, but when the other was about half way over the middle span of the bridge, about 150 feet in length, gave way, and the car plunged into the water, some 100 feet below. The car was completely submerged, and all on board were drowned, with the exception of some of those who were standing on the platforms and who, escaping injury from falling timbers, managed to

saye themselves by using the floating ruins of the bridge, and thus got ashore. Numbers of the bodies have already been got up, and the work of identification is proceeding. It is a difficult matter, as a great many of the bodies are those of

> So far as at present known, there are over sixty killed.

When the bridge broke down there were several carriages on it, and these also were precipitated into the water. Superintendent Wilson was driving one of these, and had his five children with him. He succeeded in saving himself and four children. The fifth, a little boy, was wedged between some iron bars and was drowned.

The rescue of some of the victims was under circumstances almost miraculous. Among those saved were Mr. and Mrs. Foster, of Seattle. Foster stood on the outside of the electric car and his wife was seated within. When the car went down he jumped and dived. Coming up and catching a bridge timber, he saw a lady rise near him and seized her. She was a Victoria woman, who had accompanied himself and wife. Then he saw his wife's cloak appear upon the water. He called to a man to save her, and not in vain, for the man swam to Mrs. Foster's rescue and bore her to the land. Superintendent J. Wilson, of the Canadian Pacific railroad telegraph, was driving a carriage containing his wife and five children directly behind the illfated car. His vehicle was swept down, and in a moment the entire family were struggling in the water. With rare presence of mind Mr. Wilson succeeded in saving his wife and four children. The fifth child, a little boy, was wedged beneath some wreckage and drowned.

The Catholic church St. John of front, which stands like a tower.

PASSENGER TRAIN WRECKED.

While the storm was at its highest, a passenger train on the Chicago & Alton railway pulled on to the bridge from the Missouri side, on its way east. Engineer Scott had proceeded only a short distance when he realized the awful danger. The wind struck the coaches, causing them to careen. The train was about half way across. The overhead poles were snapping and tumbling into the river, while large stones were shifting loose from their foundations and plunging into the water. Realizing that any moment his train might be blown into the water or else the bridge be blown away. Scott put on a full head of steam, in an effort to reach the eastside shore. The train had scarcely proceeded two hundred feet, and was about the same distance from the shore, when the upper span of the bridge was blown away. Tons of huge granite blocks tumbled to the tracks, where the train loaded with passengers had been but a moment before. About the same instant the wind struck the train, upsetting all the cars like playthings. Luckily no one was killed, but several were taken ont serionaly injured. The wrecked part of the bridge is just east of the big tower near the Illinois shore, and extends east about 300 feet. The entire upper portion, traversed by street cars and carriages, is carried away, while the tracks beneath are buried in

the debris, in some places eight feet
