promptu dissertations on the science of hands the lives entrusted to them. life ever tongue or pen. A traveler who in safety reaches his Night had settled upon the city and in and vigilance it has taken to accom por apparel could be noted with any degree of accuracy. At the conclusion of his address a collection was taken up by a younger companion and the small crowd thoughtfully dispersed. The obvulsions of some of the sound money server, pleased with the fragment of the Democratic papers as they swallow speech he had heard, stepped up to him the nomination of Bryan. It is an and addressed him. A short conversapeople began again to cluster about him, when the nightwatchman happened along, and not appreciating the situation, ordered the fellow to move on. He replied most courteously and prepared to follow the officer's command with no show of anger or surprise. The observer invited him within doors and discovered, when the room was lighted, he was in rags. "You seem suprised," said the vagrant. "I am a gentlemen of education and refinement, yet you see me tonight in rage without money enough to purchase my lodging and breakfast." He then went on to explain that he could get no kind of employment, and that he was compelled to follow the road and do as the officer had so a little time previously ordered, "move on." In his travels he had met another in the same predicament, but younger and not so able to care for himself. He decided

therefore on reaching The Dalles to make an open air speech on the steets, the first he ever delivered outside of a hall, hoping that he could get a collection large enough to pay for lodging and breakfast for the two. The collection he admitted amounted to 35 cents. When asked where he was going, he replied he was en route to some educational institution

in Montana, where he hoped to secure a position as an instructor in Greek and Latin and other higher studies that

might be demanded.

The Crop Bulletin.

Continued warm weather has not been the best for the grain crop. There is a diversity of opinion concerning the amount of injury that has been done. However, there are favorable reports, but most of them come from Hood River. are not disparaging, but proceeding east-
