CONTROL OF THE SENATE.

It might be well for the Republican contingent which refuses to organize the legislature to consider carefully what the result will be, and to realize to what extent they are playing into the hands of the Populists and Democrats. If a Republi can senator is elected from Oregon, the Republicans will have exactly one-half the senate, and with the vice-president, who only votes in case of a tie, they will have control of that body. If no senator is elected from Oregon, the combination opposed to Republican ileas will have one majority. No tariff legislation can be enacted, and the Republican party will be powerless to sive animals in the pulpits of our carry out its theories.

The majority of the legislature want Mitchell, and certainly a large majority of the people want him. The only question in the election of a senator is, shall the majority select the man for the position, or shall it permit the minority to do so?

Oregon, after one of the hardest fought political battles it ever ex perienced, was carried for Republi can principles by a bare majority of 2,000. The fruits of that victory are about to be snatched from the party by a few boss-ruled Republicans.

It is not only the interests of the state that are being jeopardized, but those of the nation. If the legisla ture adjourns without electing a United States senstor, the party will not have control of the upper house of congress, and the blame for the

tive of annoyance is the communica- perhaps the most persistently stuck- structionists in, the house will pass a tions. A newsy letter from any lo. to lie in that paper's vast repertoire, resolution declaring their seats vacality, or a well-written and not too It knows the Benson house has done eant, and then proceed in joint conlong argument on some proposition, everything in its power to organize vention to cast their vote for senator.

fancied grievances, want to air them order to get the associated press disin the newspapers, and most of the patches, are compelled to buy the house will adjourn; and thus will time at the editor's expense.

One half of such communications journs. The Oregonian, by its perare anonymous, and the other half sistent lying concerning the legislative request the editor not to give away hold-up, has lost what little respect the names of the writers. If such the people had for it, and those who. communications are printed, the poor at one time, had faith in its statedevil of an editor is immediately ments, will believe it no more. It jumped on, and if they are not, the has indorsed the action of Joe Simon virtuous writers get indignant call and his little coterie of traitors, and the paper a truckling prejudiced has assisted in depriving the Repubaffair, and the editor a fool. If he lican party of the majority in the printed one-half the stuff he rejects United States senate, to which it is he would be in the jail half the time entitled. It has done this to satisfy and the hospital the other half, un- the spleen of its editor. Only that.

less, indeed, he presided at a funeral. 'The only thing to be done is the thing he does-shove the sorehead communications into the waste basket, and take the chances.

SLIGHTLY SPECTACULAR.

An article on our local page gives an account of the killing of two cats by the Rev. W. L. Laufman in the pulpit of his church, the killing being done to illustrate the effect of tobacco. The cats were poisoned with nicotine. We may be, and perhaps are, a trifle old-fashioned, but it strikes us that the killing of inoffen-

churches is slightly out of place. The same preacher advertised that on the next Sunday he would have the stomach of a drunkard on exhibition to illustrate the effects of alcohol on the human system. It might be hetter if the force of the lesson were increased by removing the stomach from the drunkard in the presence of the congregation. This might be a little tough on the drunkard, but it would be a splendid illustration for the congregation.

The article in question says "the church was packed." There might be quite a sermon preached on the above text, but it seems to us the text needs no elaborating.

The New York Sun is raising the question, "Should old bachelors marry?" Certainly they should, and eral constitution, for if a New Jersey the sooner the better. The best state of affairs must rest entirely on thing in the world to any man of a pig had not escaped from its pen and Joe Simon and the small Republican soul is a good wife. A man can caused its owner to miss voting, a contingent of the Oregon legislature scarcely be said to begin to live unthat he controls. The Oregonian til he has loved and married. Life in old age is full of dreariness in some upper room of a boarding party, state and national, in their house. It is no use saying "marinsane desire to down Mitchell, and riage is a lottery." There are millby the assistance of a few traitors, ions of good women in the land waitthey seem to be in a fair way to ac- ing to make homes of comfort and peace and happiness for the millions of bachelors who are hesitating. There are good reasons why men and many women do not marry, and they are valid. But that does not change the fact that there are multitudes of single people who have no such reasons, who would do well to marry .-We clipped the above from the known as the Holland torpedo boat, Et gene Guard, owned and edited by the first of the type being about to entirely new under the sun that a Ira L. FOOTBALL AND BLOOMERS.

College Girls Upset Vermont Propriety-Shocked the Village

One after another, the staid old New England institutions have fallen into innocuous desuctude, and now a Vermont female seminary has been invaded by the bloomer and the football. St. Johnsbur" - Vt., is eminently respectable

So it was that the statement that a member of the seminary's contingent had looked seriously upon bloomers and that talk of a football club had really been heard created the same sort of an atmosphere about the town that the finding of an old witch did in the old days of Salem. It was all true, however, both the statement and the look. What is more, a football team was promptly organized and all of the members wore bloomers. Even worse than that, the new organization actually se lected a plot of land back of the Fair

banks mansion to practice upon. Here was absolute defiance of all the social and community ethics that could follow her example if each were not be compiled in the bluest book that ever St. Johnsbury heard of. It was positively awful. It was almost as bad as if somebody had said that Boston was not elassic or that the university the balance of the would that it was at Burlington was incapable of giving a student the very highest education. Gossip grew rife and the football girls laughed at it. They were not old fogies.

they said. They knew a thing or two were not at all ashamed of it. As it? And as to the football and kicks there is considerable speculation as descent lamp cost him a world of about that. One of the girls whose father lives over at Barre said that just before she came to the school her father told her she was the hardest kicker he they complain of her kicking a football?

This was the burden of the song of among the townspeople, however; only lamentations and dire forebodings. Despite all this, the girls have continued to play ball in the Fairbanks lot, and, so far as reported, not a single window in the rear portion of the mansion that is the home of the grand panjandrum of St. Johnsbury society has been broken, for the girls are all pretty and they don't kick their football in the direction of aristocracy's

iosshouse. Thus it is that the bloomer, the football and the female seminary form a triumvirate which makes the average Vermonter stand aghast. Knowing all years ago murdered his wife and this, there can be realized in a small degree the heroism displayed by the girls who kicked the football around the Fairbanks lot. They formed a regular eleven, and, of course, in a very delicate way, they fought over the ball in regulation fashion. They play football at Vassar and the sport is not unknown at Wellesley and Smith, but none of them can kick that ball any better than the St. Johnsbury girls .- N. Y. Herald.

TINY LITTLE BRAINS. Are Scattered Throughout the They

Human Body. Dr. William A. Hammond, the celebrated neurologist, says the ganglia, which runs like little threads of silk throughout the body, are tiny little character, and received judgment for brains, largely made up of the same kind of gray matter that composes the thinking part of the brain.' While the sensitive ganglia send their little tendrils into every portion of the body, there is an especially large amount of them about the heart, and, really, according to Dr. Hammond, the human

AN IMPROVED WHITE HOUSE. The Presidential Family to Have Greater Conveniences

The residence of the president of the United States ought to be worthy of the office. The present white house is equal to all the requirements of such a residence, so far as it goes. It is a simple and dignified building, whose beauty is a constant delight to appreciative persons. It was conceived and carried out by the architect who planned it in the proper spirit, but it is not large enough for the uses to which it is necessarily put. The country and the city of Washington have grown, and the president's house have not grown with them. A large part of it is given up to the business offices of the president, his private secretary, and his clerks, and the president's family are deprived of the use of another, large part of the lower floor of the house because it is necessarily on public view most of the time. The family is therefore cramped for proper accommodations, and there are no rooms for the entertainment of guests. Moreover, s

the house is so badly arranged as to entrances, exits, and hallways that a state reception there is always an uncomfortable and dangerous jam, while many an invited guest, and many officers who attend certain functions under orders, have been made seriously ill because they have been compelled to stand for hours in cold or stormy weather until they could gain admittance through the single door that can be used for the purpose.

The deficiencies of the white house are so thoroughly recognized in Washington that for many years efforts have been making to secure worthier accommodations for the president. Some of these efforts have been in the wrong direction, because they have contemplated other buildings, foreign to the intent and character of the white house, within the same grounds. Other efforts still are attempts of speculators to move the site of the mansion to the hills north of the city. The white house, with all its charms and memories, should be preserved, and it should remain on its present beautiful and historic site, its fine grounds upencumberd by other structures. In furtherance of this idea, a plan prepared by Mr. Arthur J. Dillon shows conclusively that the white house can be made, not only abundantly spacious, but even improved, while its architectural features will be at the same time preserved .- Harper's Weekly.

low suit. This will end the farce, and will

leave the United States senate in the ery. control of those opposed to Republi-

can ideas. It is doubtful if any tariff measure can be passed, and the control of all branches of the government, will be saddled with a senate opposed to them. It seems hard that the fruits of a national victory

gratify the spleen of the Oregonian, the avarice of Joe Simon, and the ambition of Jonathan Bourne; but

that is what will be accomplished by failure to elect a Republican senator. The situation requires no extended comment. It speaks for itself. The

A JUDICIAL FEAT.

The hanging of Duestrow at St. Louis yesterday is, or was, in many respects a very strange affair. It is not at all surprising that a cold- Chicago Inter-Ocean. blooded murderer should be hanged for his crime, but it is something this result, it becomes more and more astonishing. With unlimited money he had the best of legal talent, and card. every step of the case was fought with bull dog pertinacity. The power of money was brought in to lives of single loneliness. assist the power of skill and of intelligence. To accomplish the punishment of the murderer required a jury of twelve men, none of whom could be influenced by money or sophistry. It required a judge of unimpeachable integrity. It required a supreme court that recognized the fact that the possession of wealth was not an thirty years. The final delivery is will, for the second time, revolution- and pharmacists, and a remedy coming excuse for crime, and a governor not to be effected, of course, without ize naval warfare. who had the courage to enforce the rueful throes. But the state is now law against rich and poor alike.

Missouri is a great state, and with all her greatness she can point with pride to her judiciary, her governor and her people as being the only combination in America that ever hanged a millionaire.

THE EDITOR'S LOT.

Nest of Clock Springs.

In the Museum of Natural History at Soleure, in Switzerland, there is a bird'a nest made entirely of steel. There are a number of clock-making shops at Soleure, and in the yards of these there are often found lying disused or broken ticle stands very high among remedies, springs of clocks. One day a clockmaker noticed in a tree in his yard a cine. Ely Brothers, were are informed, bird's nest of peculiar appearance. Examining it, he found that a pair of wagtails had built a nest entirely of clock from such a source should have the consprings. It was more than four inches fidence of those desiring a reliable preicross, and perfectly comfortable for the birds. After the feathered architects had reared their brood, the nest was taken to the museum, where it is preserved as a striking illustration of the skill of birds in turning their surroundings to advantage in building their nests

The White Feather.

The story runs that, during a war beween the backwoods settlers of North America and the natives, a Quaker feasted the enemy and placed a white feather over the door of his house as a sign of amity. The token was respected. Hence the phrase: "Showing the white feather," which has come to mean cowardice.

FROZEN MUTTON.

Preparation of the New Zealand Product for the Market.

The reason why Argentine mutton generally is of inferior price to that of New Zealand has a three-fold explanation. In the first place New Zealand possesses to-day a mutton-producing breed superior to that known in the Plate. In the second, the New Zealander feeds his stock during the winter time with extra forage, while in the Argentine the sheep are allowed to graze upon the same bare pampa during the dead season. The result of this is that the New Zealander produces an even, well-grown carcass, while there is sent home from the Plate one upon which a hasty covering of fat has been put duning the spring months of the year. The difference between the two carcasses will readily be noted by anyone who pays a visit to the cattle market. Thirdly, the freezer in New Zealand freezes the mutton on account of the breeder; and in the Ar ontine the freezer buys from the breeder. The disadvantage of the latter system, so long as the breeder has no knowledge of the requirements. The New Sa of the market, is apparent. Zealand breeder selects his wethers with care, rejecting any which will give an inferior weight, or which are in-

sufficiently fattened for the butcher. He remits them in small droves to the freezing establishments, and takes every care that they shall arrive in porfect order. The Argentine Breeder, on the other hand, makes a contrast with the representative of the In r to sell a given number; and the p r binds himself to remove them with asecrtain date .--- N. Y. Ledger.
