Johnston, called the assembly to order and placed A. J. Dufur in nomination for chairman, who was unanimously chosen and H. S. Turner was made secretary. On taking the chair Mr. Dufur stated the object of the meeting, and called for nominations for the various town offices to be filled, which were made as follows: Commencing with treasurer, for which office S. H. Edmondson was the unanimous choice. A. J. Brigham was nominated for recorder. Edward Bohna, Jos. Douglass, A. S. Dufur, H. M. Pittman, T. H. Johnston, J. C. Johnston, C. H. Stoughton, E. W. Hinman, M. J. Anderson for councilmen. For mayor, W. R. Menefee, Wm. Heister and L. J. Klinger were nominated. Everything passed off pleasantly and without friction. While there are only four councilmen to be elected, nine candidates were placed in nomination, thus enlarging the opportunity of choice.—Dufur Dispatch.

Another Great Flood Predicted

The unusual and unprecedented late spring has made many people predict high water this summer. The snow in the mountains this winter has been very deep. In the past month all previous records have been broken. The rain which has been so plentiful hereabouts has been snow in the mountains and heavy snow at that. But the amount of snow on the hills and on the mountains does not alone determine the high water. High water is governed by the rapidity with which the snow melts rather than by its quantity. Some time when the snow is deep it goes off gradually and the rivers do not rise rapidly. At other times a light snow fall may go off with great rapidity during a week or two weeks steady warm weather and bring the river up very much. What induces the belief that the water this year will be very high, is the late spring. Generally before the end of March much of the snow has been melted away and has run off. This year it is all in place and is still falling on the lower foothills. Hence when the warm weather comes, if it should be reasonably steady, the water will come pouring down from the hillsides in great floods. Many believe this will be the case this year and that the high water will be greater than the great floods of three years ago. They say the only hope is that the warm weather will come very quickly, but not too intense, and that some of the snow on the lower mountains will melt away and run off before the time comes for the vast bodies of snow far back in the mountains to give way before the summer heat.—Klickitat Agriculturist.

There Are Others.

In last night's CHRONICLE appeared an account of a base ball game played Sunday at the fair grounds, between the Champions and White Stars. Now, as one of the White Stars, I desire to make

a few corrections in regard to the account of the game and the score. The Champions say they can justly claim the championship of Eastern Oregon and they are open for all comers. The White Stars and Champions have played but two games of ball this season. The first game the White Stars came off the victors with a score of 19 to 9, the Champions being shut out or "goose egged" six innings. They also say they won a great victory. Three of our best players were unable to be there, being the second and third base men and center fielder, which handicapped the White Stars, and claim they won no victory at all. The correct score by innings was: Champions.....7 0 2 0 2 3 5 5 x—24 White Stars.....3 0 1 2 1 0 0 3 1—11 The Champions have the score this way: Champions.....7 0 2 1 1 3 5 5 x—24 White Stars.....3 0 1 4 0 0 0 3—11 A comparison of the two scores, the correct and incorrect, will show that the Champions did not win such a great victory after all. In order to give themselves the title of champions of Eastern Oregon, they will have to meet the White Stars again. We dispute their fictitious title of "Champions," and next time we will be ready to again meet them. We hope they will not adopt the tactics of Fitzsimmons and say "We will retire on our laurels," for they have none. WHITE STAR.

The man who eats because he is hungry is, thus far, on the level with the brute. The man who stops eating the moment his hunger is appeased is the wise man. Nature needs no more food than he calls for. Continued excess brings about indigestion or dyspepsia, with loss of flesh, strength, sleep, ambition and mental power, and an accumulation of aches, pains and many dangerous local maladies. The stomach now can do nothing alone. We must appeal to some artificially digested food which can also digest itself. That is to say, we must use the Staker Digestive Cordial. The effect is prompt and cheering. The chronic pain and distress ceases. Appetite presently revives. Flesh and vigor gradually comes back, and the sufferer recovers. But he must be careful in future. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. A HOLE IN THE MOUNTAIN. Wonders of a Cave Near Chattanooga. That Fascinates Geologists. "The most peculiar cave I ever saw," said a Chattanooga man to a Washington Star writer, "is on Raccoon mountain, near Chattanooga. It has never been explored, and no one really knows whether or not there is much of a cave. The Indians have several legends concerning it, and it is remarkable that no one has ever entered it. It was supposed by the Indians to be haunted, and there are some gruesome tales told about it. The only opening yet discovered is on top of the mountain. It has been sounded with a line of considerable length without finding a bottom to the chamber through the roof of which the opening exists. There is a constant roaring sound, like the wind sometimes makes. It does not seem like water, and is undoubtedly caused by air circulating in the immense hole in the mountain. There are no volcanic indications, and the cave is a puzzle to geologists."
