Orystal Sky Columns.

An explanation of a curious optical benomenon, sometimes witnessed on frosty nights, which is called the "pseudo-aurora," is offered by Mr. Goode, of the Chicago university. The phenomenon takes the form of beautiful columns of silvery light standing over electric arc lamps and other bright lights, and sometimes appearing almost to reach the zenith. Mr. Goode says that sometimes the evening star has a bright shaft below as well as above, while the rising moon stands in a broad column of light. These appearances are due to floating frost crystals which keep their reflecting faces horizontal. On examination he found that the crystals concerned in the exhibition were thin, six-sided plates of ice, never more than one millimeter in diameter. When the wind blows these little plates are upset, and the columns of light, caused by reflection from their surfaces, disappear.-Science.

In a political view the addition of Crete to the small kingdom of Greece would not be very considerable, though that island is three-fourths as large as Connecticut and is capable of supporting 1,500,000 people, as it may once have done. It now has perhaps 300,000, or about one-tenth of the present population of King George's domain-which, by the late census, reached nearly 3,000,-000. It is a mountainous land, and its highest peak, Ida, is nearly 7,700 feet high-but 400 feet lower than Par-

pleased to learn that there is at least and usually they were. From mercenary ernment, there is none which cherishes the Cretan."

And yet the cradle of classic civilizafertility has always been famous Aristotle said that no position (in the narrow Mediterranean world) was ever more favorable for the establishment of a great empire; and Plato drew from Cretan sources his ideal laws, as Lyeurgus was said to have done when he reformed Sparta. Minos, the mythical lawgiver, and Daedalus, the mythical artist, were both Cretans, and Zeus himself is fabled to have been born upon Mount Ida, named for the Phrygian mountain that overlooks Troy. The worship of several of the Grecian deities came from Crete-the Eleusinian Ceres, for instance; Epimenides was a Cretan, and the Delphic Apollo got his Pythian priests from the same holy isle. t. Paul established a church in Crete, and it was for centuries an orthodox sland. Venice did what she could to make it Roman Catholic, and when the Turks finally held it, but little over two centuries ago, they did their best to make it Mohammedan. The fierce orthodoxy of the islanders resisted it; and now but a fifth part of the residents follow the crescent, and most of those are of Greek descent-renegades

for the sake of gain and power. For the interests of learning and rehaeological research, the control of Crete by the Greek government would be all-important. The Turks have latterly allowed excavations there, and many discoveries have been made; but the difficulties of such work in a Turkish dependency are always great, Twelve years ago Halbherr and Fabricius discovered the antique laws of Gortyna, carved in marble, and lying in the bed of a mill stream; and for the past four years Arthur Evans, the Engglish archaeologist, has been finding wondrous Mycenean remains, which add much to our theoretical knowledge of that prehistoric period which Prof. Manatt, of Brown, has described so clearly in his new work. But all this research would go forward faster if Kavadias and Tsountas, and the other learned Greeks who have done so much on the mainland, would extend their inquiries over Crete, and open its treasures to the American, the British, the German, and the French schools, now so busy digging in Greece.-Springfield
