PERSONAL MENTION.

Wednesday.

Mr. W. G. Kerns and family left this city yesterday for the Willamette valley, where he will engage in farming.

Mr. Wallace came in from Antelope yesterday, and reports everything prospering in that neighborhood. The shearing is at its busiest, and the clip is unusually clean and good.

Mr. R. B. Hood was a passenger on the 8:30 train this morning, bound for St. Helena, California, where he expects to remain. We are sorry to lose him, but envy him his residence in the beautiful Santa Clara valley, in our opinion the most beautiful in California.

Thursday.

J. W. Burgess is in from Antelope.

W. M. Davey of Antelope is registered at the Umattila.

Mr. Geo. A. Young, the boss sheepman of Ridgeway, is in the city.

Jas. L. Langille was up from Hood River last night. He expects to go to the McCoy Creek mines in a week or two.

Mr. J. Thorburn Ross, the distinguished young Oregonian who went to Washington and came back again, was in the city this morning.

Friday.

Mr. M. J. Finlayson came in from Antelope yesterday.

Mrs. August Buchler returned from Portland yesterday.

Miss Crossfield is in the city, the guest of her brother and his family.

Rev. Troy Shelley of Hood River came up on last night's train, and will remain until tomorrow.

Among those who went to Duin today were Messrs. J. Perkins and Arthur and Charles Clarke.

Mrs. Jas. Oakes returned from Portland yesterday, and is the guest of her sister, Mrs. Morgan.

Mrs. Chas. Tibbets is in the city from Monterey, Calif., visiting with her parents, Mr. and Mrs. Buchler.

Mrs. C. L. Schmidt returned from Portland yesterday, leaving Miss Edith in Portland visiting her aunt.

Mr. J. A. Cranston of the Portland Electric Light Co. came up from Portland yesterday and leaves for Spokane tonight.

Mr. J. A. and Miss Elba Apperson, who have been visiting Mrs. M. E. Briggs for several days, were passengers on the morning train for home.

Mr. F. M. Chrisman of Silver Lake arrived on the Prineville stage last night. The terrible holocaust in Paris calls to mind that similar affair in Silver Lake a few years ago, it happening in a building belonging to Mr. Chrisman.

Mr. J. F. Haworth and wife went to Portland Wednesday. Mr. Haworth's stepfather was injured in the recent street-car accident in that city, and while his injuries have not as yet proved serious, it is feared he is hurt internally.

A MUD CREEK ROMANCE.

A Groom of a Day Is Left Unconsoled and Mourning.

Even the euphemously named Mud Creek district, a few miles from this city, has its society events and also romances, if recent reports are true, and the last stir has left the community in a feverish state of excitement and gossip.

A young man, the accepted lover of a buxom maiden, after securing the necessary papers, was united in marriage last Sunday to his adored. The ceremony over, the bride of 16 made herself scarce by locking herself up in her bed chamber. The groom could not fathom this proceeding and made strenuous efforts to get at the cause of the trouble through the key-hole of the door, but to no avail. Next morning the wife applied to her spouse for the use of his cayuse and also asked for a little money. Both requests were granted by the loving husband, and he has not seen his wife since.

The story is current that this fair maiden has an unkind father whose treatment of her became unbearable and to get beyond his jurisdiction she planned the marriage. The father gave her away on the marriage day, therefore relinquishing all control over future actions, and as soon as the wedding was over the fair maiden, not caring for her husband, left for parts unknown. It is stated that the young wife rode to North Yakima on horseback, fording swollen streams and overcoming all obstacles on the way. When it is considered that the distance is over 100 miles and the Columbia had to be crossed, the bravery of the fair and romantic maiden will be fully appreciated. The mother of the girl is said to reside in North Yakima, and will shelter her daughter. The newly married man, it is said, is still wondering "where he is at."—Walla Walla Statesman.

Condition of Winter Grain.

The report of the department of agriculture for April 1st makes the average condition of winter wheat \$1.4, against 90.5 in December; 77.1 last April, and \$1.4 at the same date in 1895. Leading winter-wheat states show averages as follows: Pennsylvania, 96; Ohio, 83; Michigan, 85; Indiana, 65; Illinois, 40; Missouri, 60; Kansas, 80; California, 90. The average rye condition was 88.9 against 82.9 last year.

In Great Britain the season is practically two weeks in advance of the date, owing to mild weather. Field work and spring sowing are far in arrears, owing to the persistent rain which has fallen throughout the month. There is complaint of rust prevailing to a limited extent in some of the eastern counties, and

excessive wet has produced undue development of stalk in autumn-sown wheat. It is stated that in Devonshire some thousands of apple trees have been blown down in the heavy gales that have prevailed. The now firmly established market in England for our apples may, to a small extent, be improved next year by this.

In France there has been much rain during the month, and arrears of field work have not been, and cannot now be, made up. It is estimated that the wheat area will not exceed 16 1/2 million acres, a shortage of, approximately, three-quarters of a million acres. It is reported also that the winter wheat is not looking well, and that an average yield will not be reached. There is much dissatisfaction in France with the workings of the tariff and bounty provisions respecting wheat and flour, and the scale of drawbacks on exported flour made of imported wheat will perhaps be changed. In this case French flour will no longer compete with ours in the English market.

A Deserted Wife.

Charles Besserer, writing from Washington to the Walla Walla Statesman, says:

"A deserted wife here desires me to make inquiry through your worthy paper about her runaway husband. She says his name is Paul Kammerer, a practical upholsterer, has large ears, is 5 feet 10 inches high, and bowlegged. She wants him to come home, as his father has died since he left and bequeathed to his wayward son an immense estate. She thinks he lives in Umattila county, Oregon. If so, this may meet his gaze.

The Shakers have made a great hit. Their Digestive Cordial is said to be the most successful remedy for stomach troubles ever introduced. It immediately relieves all pain and distress after eating, builds up the feeble system and makes the weak strong.

The fact is, foods properly digested are better than so-called tonics. The Cordial not only contains food already digested, but is a digester of other foods. Food that is not digested does more harm than good. People who use the Cordial insure the digestion of what food they eat and in this way get the benefit of it and grow strong.

The little pamphlets which the Shakers have sent druggists for free distribution, contain much interesting information on the subject of dyspepsia. 17

The True Remedy.

W. M. Repine, editor Tiskilwa, Ill., "Chief," says: "We won't keep house without Dr. King's New Discovery for Consumption, Coughs and Colds. Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as in it we have certain and sure cure for Coughs, Colds, Whooping Cough, etc." It is idle to experiment with other remedies, even if they are urged on you as just as good as Dr. King's New Discovery. They are not as good, because this remedy has a record of cures and besides is guaranteed. It never fails to satisfy. Trial bottles free at Blakeley & Houghton's Drug-Store. (4)

MINING OUTLOOK GOOD.

Upwards of \$70,000 Per Month Paid Out in the Sumpter Section.

Ed. W. Copper, of the Sumpter Mercantile Company, is in the city. Asked about the prospects for good times in his section, he said:

"The mining country tributary to the terminus of the S. V. R. R., and that embraces all the territory lying southwest of Baker City—Sumpter, Granite, Robinsonville, John Day and Quartzburg districts—is most favorable for a healthy development. The mines are looking well and employing big pay rolls.

"Why, the other day I made a rough estimate and placed my figures conservatively. I estimated that the mines adjacent to Sumpter were paying out monthly the enormous sum of \$70,000 for labor and supplies. All this money finds its way into circulation in Baker county, and no wonder there are good times.

"One thing I wish to say is that people are rushing into the mining camps expecting to find work. Few of these people are miners and know but little of mining life. They haven't the least idea of prospecting, even. There is no employment for them, and all such become a burden sooner or later, not alone to themselves but the community. To all such I would advise they had better remain away. The unskilled laborer can do better in other localities."—Baker City Democrat.

CRUSOE'S ISLAND DISAPPEARS.

Reported Sinking of Juan Fernandez Land by Volcanic Action.

A few weeks ago a vessel putting in at Lisbon after a trip around Cape Horn, reported the destruction by volcanic action of the Juan Fernandez island, famous as the scene of "Robinson Crusoe." The master claimed to have seen the catastrophe from the deck of his vessel. The report was not given credence at the time by scientific men, and many denials were printed in papers and magazines. But Capt. Powell, of the British ship James Kerr, asserts that the story is generally believed by seafaring men all over the world. The James Kerr has recently arrived from Newcastle, N. S. W., where she was laid up four months on account of the coal mine strike. Capt. Powell met a very large number of master mariners there, and says that the destruction of the island was a matter of common gossip among them. The captain himself had not passed within sight of the island since 1889, when he secured a photograph of it from the deck of his ship. He says that some of the captains who arrived in Newcastle while he was there verified the report, that the island was missing.

A Diplomatic Tutor.

From a French journal comes this little anecdote of a tutor and his royal pupil: The lesson was in Roman history and the prince was unprepared. "We come now to the Emperor Caligula. What do you know about him, prince?" The question was followed by a silence that was becoming awkward, when it was broken by the diplomatic tutor. "Your highness is right," he said, "perfectly right. The less said about this emperor the better."

ANIMAL WARFARE.

Monkeys of Africa Depend Upon Their Numbers and Discipline.

The conditions of the life of the monkey in Africa are sufficiently curious without reference to their acquired habits, though these are undoubtedly due to the dangers to which the nature of the country in which they live exposes them. The different species of baboons, which are found commonly over the whole African continent, are all by nature dwellers in the open country. They find their food on the ground, and whether this be insects or vegetables, it is usually in places which afford little shelter or protection. Though strong and well armed with teeth, they are slow animals, with little of the monkey agility when on the ground, and not particularly active even when climbing among rocks.

In a rocky "kopjes" of the south, says the Spectator, of the cliffs and river banks of Abyssinia and the Nile tributaries, they are safe enough. But they often abandon these entirely to invade the low country. During the Abyssinian expedition conducted by Lord Napier of Magdala they regularly camped near our cantonments on the coast and stole the grain on which the cavalry horses and transport animals were fed. When on expeditions of this kind they often leave their strongholds for days together, and the means of joint defense from enemies in the open country are then carefully organized. Their natural enemies when thus exposed are the leopard, the lion, and the southern Africa and Cape wild dogs. To the attack of the leopard they oppose numbers and discipline.

Latest from Billville.

We recently purchased a bicycle. The doctor says that with careful nursing we will be out in six weeks. We lost one leg in the war and the other running for congress. We are still able, however, to play a full hand. There is only one gold bug in Billville now, and he's in a dime museum under the direction of a silver manager. There is no use to run for coroner in Billville. The only time a man drops dead here is when some one goes crazy and pays him ten dollars on account. Money is so scarce in Billville that we are compelled to run for office on the installment plan; but it looks like we'll never be fully installed.—Billville Banner.

Well and Truly Said.

Over the triple doorway of the cathedral of Milan there are three inscriptions spanning the splendid arches. Over one is carved a beautiful wreath of roses, and underneath is the legend: "All that pleases is but for a moment." Over another is sculptured a cross and these are the words underneath: "All that troubles is but for a moment." But underneath the great central entrance in the main aisle is the inscription: "That only is important which is eternal."

One Way to Find Out.

It was just after the honeymoon, and she had undertaken to get a breakfast for him with her own hands, in spite of the fact that she was inexperienced. "I think this egg is bad, Harry," she said. "How can I find out for sure?" "Taste it," he replied, promptly. "That's why he went to his office hungry that morning."—Chicago Post.

How a Train Sweeps Air Along.

Interesting results of an investigation of the effect produced by a railroad train on the air through which it moves were presented at a recent meeting of the St. Louis Academy of Science by Prof. F. E. Nipher. It appears that motion is communicated to the atmosphere many feet away, so that a large amount of air is dragged along with the train. A peculiar danger arises near a swift-running train from the tendency of the moving air to topple a person over, and at the same time to communicate a motion of rotation to the body, which may cause it to roll under the train.—Youth's Companion.
