

The Weekly Chronicle.

THE DALLES, OREGON

PERSONAL MENTION.

Wednesday.

W. A. Johnston and family were passengers on the morning train bound for the coast.

Rev. W. C. Curtis accompanied a friend from the East to Cloud Cap Inn yesterday. They will return tonight.

Mrs. W. A. Kirby and little daughter, Maude, left this morning to visit her parents, Mr. and Mrs. Curtis, at La Grande.

Mrs. J. H. Wood, Misses Lola Eubanks and Hilda Beck, Frank Wood and Oscar Beck, went to Wind river this morning for a two weeks' outing.

Mr. George Gibbons went to Sandy, Multnomah county, on account of the serious illness of his wife's father, who resides at that place. Mrs. Gibbons has been with her father for some time.

Doctor and Mrs. Lannerberg and their niece, Miss Berg, left this morning for a month's trip to the mountains. They will stop a day or two at Dufur, then go to the Warm Springs, and from there down to the Three Sisters.

Miss Hollister and Miss Wyncup, who have been visiting Dr. Hollister's family for the past three weeks, left yesterday for Portland, and will return to their respective home in Chicago and Iowa, by the Canadian Pacific route.

D. O. Ireland, of the Moro Observer, was in the city last night, looking hale and hearty. He informed a CHRONICLE reporter that he was going up to Huntington to visit an old friend with whom he mined twenty years or more ago.

Thursday.

Mr. and Mrs. A. J. Dufur went to Portland this morning to remain.

Miss May Earight left yesterday for Victoria, B. C., and the Sound cities.

Miss Lena Wentz, who has been the guest of Miss Marden for the past ten days, returned to Portland by boat today.

Mr. Smith French and Mr. B. F. Laughlin were passengers on the train this morning bound for the coast. The weather yesterday was too tropical for them.

Mr. T. A. Hudson, who has been in San Francisco for some time, arrived home last night, Mrs. Hudson and Mrs. Thornberry stopping off in Portland for a short visit.

Mrs. Ira W. Lewis, who has been the guest of Mrs. Mary French for two weeks past, left for Portland today. She will return to her home in Dixon, Ill., by the Canadian Pacific route.

Friday.

Mr. John Fillou went to Trout lake this morning, taking his horse and buggy on the Regulator. Mrs. Fillou is camped there, and Mr. Fillou will stay for a week or more.

Miss Kate Biggs and Miss Lockitt, niece of Mr. and Mrs. Biggs, who have been visiting them for some time, left for home this morning, accompanied by Mrs. Biggs as far as Cascade Locks.

Misses May and Cora Wells, who have been visiting the family of their aunt, Mrs. Wm. Michell, left by boat this morning for Portland. Mrs. Michell accompanied them to the Locks, and Misses Annette and Myrtle as far as Portland. The young ladies will spend two days on Clatsop beach, leaving for their home in Portage, Wis., Monday. They return by the Canadian Pacific.

MARRIED.

At the residence of A. C. Sanford, in this city, Tuesday, August 3d, Elder G. H. Barnett officiating, Mr. James H. Gilmore to Mrs. Minerva A. Chamberlain.

Advertised Letters.

Following is the list of letters remaining in the postoffice at The Dalles un-called for Aug. 7, 1897. Persons calling for the same will give date on which they were advertised:

- Adkins, Anna; Bayer, J C; Beeker, Wm L (2); Burley, N H; Brown, S S (2); Bowman, Henry (2); Brown, Viola; Bishop, Chas J; Chire, C A; Campbell, Betta; Chicago Portrait Co; Davidson, Wm G; Evens, M S; Evens, John; Fagan, Mrs John; Gilbreth, Ella; Griggs, Frank; Howard, Abe; Howland, Fannie; Hargis, Mrs Wina; Houwer, Mrs Kristine; Henna, H S; Johnson, Mrs A R; Jaksha, Anna; Kooontz, Elton; Kirkpatrick, C R; La Pier, Edith (2); Lavis, F J; Morris, Dan; Martin, A F; Morrison, J B; Mackey, Donald; McKeiler, Mina; McCully, Clarence; Mathews, F M; Miller, Hugh A; Miller, Mary; Nelson, Kristine (2); Nolan, M C; Owens, John; Patterson, Wm; Quayle, T P; Robinson, F W (2); Rolison, J; Simpson, Nancy; Shannen, Talbert; Strens, L B (2); Schmidt, Lewis; Smith, Freeman; Smith, Chas S; Sandford, Lutie; Semple, Maggie; Smith, Chas S; Taylor, J F; Wilhelm, Josepha; Welch, W M; Williams, Hayell; J. A. CROSSEN, P. M.

At the Institute.

Visitors are welcome at the institute at any time.

Besides two regular recitations next Friday afternoon there will be a short program, beginning at 3 o'clock, consisting of music, singing and recitations.

Miss Clara Metzler of Portland, lately a teacher in district No. 51 in the neighborhood of Antelope, enrolled yesterday, and also Miss Madge Warren of Hood River.

During the absence of Professor Gavin at the school board meeting, Miss Hill conducted the recitation in U. S. History, including from Taylor's administration through the first year of the Civil war. Other work was as follows:

"The Foot of a Fly"

says an eminent English doctor, "will carry enough poison to infect a household." In summer-time, more especially, disease germs fill the air, multitudes escape. These messengers of mischief do not exist for millions. Why not? Because they are healthy and strong—protected as a crocodile is against gunshot. It is the weak, the wasted, the thin-blooded who fall; those who have no resistive power so that a sudden cough or cold develops into grave disease. We hear of catching disease! Why not catch health? We can do it by always maintaining our healthy weight.

Scott's Emulsion.

of Cod-liver Oil, is condensed nourishment; food for the building up of the system to resist the attacks of disease. It should be taken in reasonable doses all summer long by all those whose weight is below the standard of health. If you are losing ground, try a bottle now.

For sale by all druggists at 50c. and \$1.00

English Literature—The growth and development of English literature before the time of Chaucer.

Arithmetic—Proportion.

Spelling—List of fifty words.

Theory—Methods of conducting recitations.

General discussion—Reading of "Or-thoepic Melange" sent out by the publishers of Webster's Dictionary.

Penmanship—Principles of letters.

Physiology—Sympathetic nervous system and practical questions in review.

Grammar—Complex sentences and kinds of clauses.

Book-keeping—Shipments and consignments.

Geography—Europe.

Phys. Geog.—Glaciers and glacial action.

Algebra—Imaginary expressions and division of radicals.

What use is there in eating when food does you no good—in fact, when it does you more harm than good, for such is the case if it is not digested?

If you have a loathing for food there is no use of forcing it down, for it will not be digested. You must restore the digestive organs to their natural strength and cause the food to be digested, when an appetite will come, and with it a relish for food.

The tired, languid feeling will give place to vigor and energy; then you will put flesh on your bones and become strong. The Shaker Digestive Cordial as made by the Mount Lebanon Shakers contains food already digested and is a digester of foods as well. Its action is prompt and its effects permanent.

Doctors prescribe LAXOL because it has all the virtues of Castor Oil and is palatable.

Coaldealers Apprehensive.

CLEVELAND, Aug. 5.—Cleveland coal men viewing the coal strike situation with much apprehension. They are deeply interested in a mass meeting to be held in Clearfield district in Pennsylvania, which the strike has not reached.

Advices in Cleveland are to the effect that De Armit's mines are paralyzed, and the feeling here is that there may be an absolute tie-up.

Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by Biakley and Houghton, druggists.

Over Seventy-Seven Millions.

WASHINGTON, Aug. 5.—The latest official estimate of the population of the United States is 77,000,068. This is made by the actuary of the treasury, an officer whose duty it is at fixed intervals to report on the per capita circulation of money in the United States. He estimates that the present holdings of money are \$22.53 for every man, woman and child in the United States.

Miners in Convention.

SPRINGFIELD, Ill., Aug. 5.—About 300 miners were in attendance today at the opening of the state convention. The object of the convention is to decide upon a uniform wage scale for machine and hand labor. There will be a mass meeting this evening.

A Foolhardy Feat.

CLINTON, Ind., Aug. 5.—Hugh White, a colored miner, on a banter, made the perilous jump from a railroad bridge to the water, 100 feet below. After the leap he swam 150 feet in his heavy clothing, climbed to the top of the bridge again and repeated his feat.

Flour Is on the Rise.

CHICAGO Aug. 5.—Flour is rising in price, and has reached \$5 a barrel. Last April it cost \$4.10, the low price of the year. The advance has been steady since, and some of those in the trade think it will continue until the war-time prices prevail.

INDIAN RAIN-MAKERS.

Crafty Red Men Who Adapt Their Efforts to the Weather.

All the Indian tribes had rain-makers, and some are yet left. This is one of their methods of operation, explains the New York Tribune. A large body of Crow Indians had gathered, all decked out in their best finery. Two elderly men retired a short distance and seemed to be mumbling to each other something like prayers or invocations; after some time a fire was made on the bank of the stream, when the two rain-makers gave an order and a young man plunged into the river, which was there very deep. When he came up, he had a blue catfish in his hand, which one of the old men took and threw into the fire, the tribe looking on in perfect silence. Then there was more mumbling, accompanied by various contortions and gesticulations, when the gathering dispersed. It rained that night. Perhaps, on the whole, the Indian rain-maker is more generally successful than the civilized one occasionally appearing on the frontier. In times of drought, the former having a shrewder and more experienced forecast of weather probabilities and putting in his incantations at the right time.

GIVES OFF LIGHT.

An Ever Active Glow Issues from a Recent Hit of Uranium.

In a recent lecture before the Royal Society Lord Kelvin vindicated the correctness of Volta's early theories in relation to contact electricity. He showed that when a zinc plate and a copper plate are brought into contact with one another and then separated one was charged with positive electricity and the other with negative. He further demonstrated that this was not due to oxidation by air or the moisture of the atmosphere, as is stated in the text-books of the day. Lord Kelvin exhibited other experiments illustrating electrification produced by means of dissimilar metals, and showed some curious properties possessed by uranium. If a plate of this metal was connected with an electrometer and touched by a plate of aluminum positive electrification was produced, gradually changing past zero to negative. He also demonstrated that the rays given off by uranium in a dark room are a constant property of the substance and not a slow radiation of previously absorbed light, as has been claimed, but he could offer no solution of the mysterious action of this metal.

BUSINESS VICISSITUDES.

How Nations Have Encroached Upon One Another's Trade.

The annals of commerce are not entirely without a spice of romance. There is a little retributive justice that savors of the novelist's art in the way the spoiler is sometimes spoiled in business relations. In an article entitled "Made in Japan," the Pall Mall Gazette shows how nations have encroached upon one another's business, and reaped for a time a rich harvest, only to see the same tactics employed by a rival people, and be forced to stand aside while the trade shipped from their hands into the keeping of another nation.

In old times the Dutch, by importing English clay, made a good profit out of imitations of Chinese porcelain, and presently the Dutch product became established in the markets of the world as Delft ware.

But the Dutchman was no more secure in his profitable trade than had been his predecessor, the Chinaman. The English potters took to copying the Dutch patterns, and sold their pottery much cheaper, and the north of England became headquarters for the Delft china.

Again, however, the spoiler has been spoiled. Of late the Japanese have made themselves masters of the art of reproducing the patterns best liked in England, and have begun to encroach on the domain long monopolized by the English potter. The Japanese product is finer and stronger, and above all cheaper than the best English ware, and Japan is providing the markets with goods which were originally a Chinese monopoly.

CONTINUOUS STREET RAILS.

The Contraction and Expansion of the Metal Were Easily Overcome.

Continuous rails, made up of ordinary rails' length welded together electrically, are in use on many miles of electric street railways in the United States, says Cassier's Magazine, and with excellent results, too, having shown themselves to constitute an ideal track. Whatever misgivings may have arisen at one time as to the serious pranks which expansion and contraction might play with such continuous tracks have been effectively allayed, as experience has shown that the difficulties likely to grow from these causes are not extraordinary. It is interesting, however, to note that of the troubles from temperature variations in the track, that due to a temperature lower than the one at which the rails were welded is the only one requiring serious consideration. It is found in the tendency of the rail to shrink in a longitudinal direction, and this must be counteracted by a pull on the ends of the rail sufficient to produce a corresponding amount of stretch. Temperatures above that at which the rails were welded cause compression, and this has never been found to make trouble where the track was at all secured by the roadbed.

Experience, therefore, would seem to point to the winter season as the time for welding continuous track, as then the rails are materially contracted, and, though exceptionally cold snaps may be productive of a slight state of tension in the rails, yet the maximum stress would be nothing like that in rails welded in the summer, and probably far below the strength of the welds.

Schlitz and Hop Gold Beer on draught at Stabling & Williams.

Cuticura Soap Purifies and Beautifies The Skin Scalp, Hair, and Nails

By Restoring To Healthy Activity The Clogged, Irritated, Inflamed, or Sluggish Pores. This is the Secret of Its Wonderful Success.

Sold throughout the world. FORREN DRUGS & CHEM. CO., Sole Props., Boston. "All about the Blood, Skin, Scalp, and Hair," free.
