We here show the portrait of Prof. P. G. Daut, who has been in The Dalles for the past nine months, and is recognized as an optician of high scientific attainments and skill, and enjoys, to an unusual degree, the confidence of his patrons. He has just completed an operating room, known as a "Dark Room," and is lighted with the new Ascetylene gas, which gives light at all times of the day, The examination of the eye for errors of refraction and accommodation, and a thorough familiarity with the tests, such as the professor uses for the detection of anomalies of the ocular musclers, are the very best known. He has many testimonials in his possession of people he has fitted in different states, but they being of not much interest to the home people, he furnishes a great many home testimonials, but for lack of space we print from some of the people you know.

Eye Helps. Eye Hurters.

Spectacles are eye helps if right, eye hurters if wrong. Who is to know in time to let you stop the mistakes? Not the average optician is a spectacle seller, for he is unable to distinguish between optical defects and diseases. Prof. Daut is the only graduate of disease of the eye. He gives you a thorough examina-tion free of charge, and advises the use of glasses only when needed. If you don't need them, he tells you so.

The Dalles, O.., April 14, '98. I wish to add my testimony, and will ter had been troubled with her eyes for by different so-called doctors with bluetint glasses, her eyes getting constantly worse until she was compelled to wear glass at all times. I finally called on Prof. P. G. Daut, the optician, and he fitted her, saying that she must only wear them half the time and while reading or studying. His directions were natural. The vision is good again. The eyes will do well to see him. professor can handle a child better than any optician I have ever seen, and I can recommend him to any parent whose children's eyes are effected.

Do It Today

If you have the faintest suspicion that your eyes are not just right. If they bother you in any way, it is best to have them examined at once. The longer they are deprived of the aid they need the weaker they become. I know what I am talking about.

Wrong About Your Eyes.

You have been wrong in thinking you ought to put off wearing glasses as long as possible. This very thing is responsible for so many eye troubles. All eyes begin to fail at forty years of age; some more than others, and when complicated with incorrected defects, failure begins much sconer. A correction of the right time will save your eyes. Neglect is bound to injure them. Attend to them at once.
