## THE TINIEST OF WATCHES. Most Miunte Timeplece Now in Ex-

istence.

The smallest watch in the world is at present on exhibition in a show window in Berlin. It is the latest triumph in the art of watchmaking-the art that has made such wonderful progress within the last decade.

The lilliputian timepiece was made in Geneva. Following are given some of the tiny dimensions:

The diameter of the little watch is less than half an inch. The exact measurement is 101/2 millimeters, or .4137 inch. Its thickness is 3 millimeters, or .1182 inch, being but little more than a tenth of an inch.

The length of the minute hand is 2 4-10 millimeters, or .09456 inch. That of the hour hand is 1 3-10 millimeters, or .05122 inch.

The entire works of the tiny watch comprise 95 individual pieces, and its exact weight is 14.3499 grains, or, according to the metric system, 93 centigrammes-less than a single gram!

After having been wound up with the

northern Georgia, and the Chattahoochee river bed is yet worked by steam a dozen new plants have been crected in Simpkin, Hale, Harrison, Cherokee and other counties of North Carolina since the Atlanta exposition. This revived attention to an old gold field lends interest to a story told by E. E. Barnes, of Yates county, N. Y.

"Some years ago," said Mr. Barnes, "I read in a newspaper something which recalled to me a visit I had made to Cherokee county, N. C., 40 years ago. This newspaper account was to the effect that the director of the Philadelphia mint was anxious to find an owner for gold minted from a nugget weighing 136 pounds sentero the mint Dealer. by 'J. J. Burnes, of Pineland township, Cherokee county, N. C.,' years before

and never claimed. "As I had been through that township and knew it to be some 40 miles from a railroad, and as I was going to make another trip through the state, the idea

occurred to me to look into the case. I did so, and learned the history of the work on a comic opera, the book being Red creek nugget, and of the three murders it caused. John Farrell was a squatter on Red creek, Cherokee county. One day he had visitors-two men he had known long years before. For their entertainment he went into his bedroom and rolled out a large ball of something the color of bronze and as then he wondered why everybody heavy as lead. 'Gentlemen,' he said, smiled.—Harlem Life. 'here is something I found while looking for my cow. It is mighty heavy, and I thought it might be something more than iron.' His visitors, who were miners, pronounced his find almost pure gold. They proposed to help him carry the nugget to where it could be shipped to the mint. He accepted their offer, and the next morning the party started with their prize for the railroad, some 40 miles distant.

> "Meanwhile the two miners had coner. ceived the idea of murdering Farrell

and securing the nugget for themselves. So, while Farrell was carrying the front end of the pole on which the nugget was suspended, he was brained with a hatchet, and his body was hidden in the woods. But when they again took up their march the man at the front end of terries, especially because of the high the pole began to doubt the man behind him, and, stopping suddenly, said: I say, Mike, Farrell is sleeping behind in detail of each of his dependent brothin the bush, and as I dont want to sleep here we had better cut that lump of gold in two, and each man take his half and go with it.'

der which name is concealed the iden-'Mike' took the hatchet from his belt tity of a brilliant ex-cavalry officer, beand cut the nugget in two. Then, still longing to an illustrious house; Prince kneeling, he asked: 'Which half will Edward Schonburg-Hartenstein, and you take?' and as he spoke he looked Father Benedict, Father Sebastian, once down at the split nugget. This was the a major in the Saxon army, bearing the opportune moment for his partner, and name of Baron von Oer; Father John, the next instant 'Mike' lay dead in the who was Baron von Drais, and ran trail with a hatchet gash in his head. away from the court of Baden to em-His body was dragged into the woods brace this career; Father Nicholas, who If of th igget was hidden was Baron von Salis-Soglio; Father Around the other half was fastened a Hildebrand, who before assuming the strap, a stick was run through it, swung cowl and gown was a brave captain, by over the shoulder of the surviving murname of Count de Memptinne, and many derer, and so it finally reached the others too numerous to mention. mint. The other half was also shipped The Abbey Seekau is situated among to the mint, both in the name of J. J. the mountains of Steiermark, in a thick, Burnes. Then the murderer conceived wild forest, and in 30 years has united the bizarre idea of going back to Pinetogether Benedictine monks belonging land township to try to gain the affecto the best known families, celebrated tions of Mrs. Farrell and marry her. for nobility or riches or distinguished When he came to the place where he in the arts. This monastery, where the had murdered his comrade three armed rules are most rigorous, was founded men sprang from concealment and over 30 years ago by two brothers, Mau-rus and Placidus Wolter og Cologne, caught him. By accident his crime had been discovered. He confessed the murtwo learned monks sent by Pius IX. to der, but refused to tell what he had Prussia to reorganize the monasteries done with the gold. -"Why do you call it a South Da-kota novel?" "Because it is thoroughly up-to-date and ends with the statement: 'And so they were divorced and lived happily ever afterward.' "-Chi-

cago Evening Post. -"I noticed in those lines you wrote

in Miss Skimp's album that you said a 'smile sailed o'er her face serene." "Well, what of it?" "It was easy navigation, that's all." "Easy navigation?" Yes, plain sailing."-Cleveland Plain

-Useless .- "What do you think of that bill I have prepared to introduce?" inquired one member of the legislature. "It is a sheer waste of time," replied the other. "It isn't practical enough to become a law, nor foolish enough to get your name into the newspapers.' -Washington Star.

-On the Stump.-"In the days of the whigs I was a tory; in the days of the liberals I am a conservative. I have always been consistent," said the political candidate. "You have, indeed," said his rival. "But, gentlemen," he added, "I have been equally consistent, though I am not a conservatory." And smiled.-Harlem Life.

-Shifting the Responsibility .- "It has been proved by half a dozen witnesses," said the police magistrate, "that you are selling bread under weight. Have you any explanation to offer?" "The flour's so had these days, your honor." replied the honest baker. looking the magistrate fearlessly in the eye, "that my conscience won't let me sell it to the people in greater quantities than I can help."-Cleveland Lead

German Monastery Devotees-They

Are Born in the Purple. The pope has received in private audince the abbe of the famous Abbey of Benzon, at Seckau, in Germany, one of the best known and celebrated monasstation of the monks who are gathered there. The abbe spoke separately and er monks, and Leo XIII. heard with interest of their welfare. The monks of the abbey include Prince Philip of Hohenlohe, who has bidden a definite

adieu to the world; Father Charles, un-"This suggestion was agreed to, and

are about to have a season of bull fighting with Manzantini as the "espada principal," accompanied by a first-class troupe of performers. But even more sensational will be the advent of "the lady bull fighters," now on their way from Spain to this land of winter sun-

shine. "Las toreras," or the feminine fighters of bulls, will be greeted with enthusiasm, for they will be a distinct novelty, and are bound to make an impression on the susceptible masculine public. And why not lady bull fighters as well as the "new woman" of northern and colder lands? The girl who enters the arena to confront the "toro bravo," the fierce bull pawing the sand, and, head down, awaiting his human foe, must have "sand" herself, and one can fancy how convenient it would be to marry one of them, and so have always a valiant enemy of burglars in the house. At the first alarm, at dead of night, one could awaken one's lady bull-fighting consort with: "Oye, tu, Mariquita de mia alma, get up quick; there's some one in the dining-room packing up the silver!" And the wife of your bosom, arrayed in a wrapper and carrying her trusty sword in her hand, would descend to the lower floor to give the burglar an "estocada" in the most classic and approved form!

I don't think the new woman of the north can approach in interest the corresponding "feminine new departure' coming out of Spain in these days. In Georgia a female company of militia has been formed, and the gallant governor has a lady colonel on his staff. Chicago presents women footpads who assail and rob male victims in the most approved style of highwaymanship. Everywhere lovely woman is making progress, and it is fitting that the Latin races should produce, as their choicest exhibit, the lady bull fighter!

In Mexico the woman doctor has arrived, and is building up a clientele, and we have also a woman lawyer, besides innumerable teachers of the "female persuasion," all bright, capable and energetic young women. Women are being employed in the national postal service and are giving satisfaction. Soon they will begin to invade the great government departments, and will supplant the languid young dudes who now smoke cigarettes incessantly and manage to kill time at the government expense. The dudelet of the national palace and of the government offices outside is a study in pink shirts and tall collars. He certainly toils not, although he spins yarns in office hours, and he is "the man with two hats," for one is soft, which he can carry in an inside pocket, and the other hard, of the derby quality, which he leaves on his desk while he saunters out of doors, wearing his soft hat! The chief of his

bureau comes to his desk and asks, absent-midedly: "Where is Carlitos? Ah, I see he is in some other office, for here's his hat!" Credulous chief of bureau! your Carlitos is even now down on Plateros street, ogling the pretty girls and "throwing them flowers," as they say in Spanish.—Boston Herald.

Queen Victoria has given orders that the old state apartments in Kensington palace, which have long been disuse shall be put in order and opened to th public indefinitely, says the New Yor Mail and Express. Nine rooms will be renovated, among them the bedroom in which her majesty was sleeping on the memorable June morning nearly 6 years ago when the news came to he that the archbishop of Canterbury wa waiting in the council chamber to te her that she was sovereign of one o the great kingdoms of the world.

All these nine rooms are denuded of furniture and almost knee deep with dust. The ballroom in the Denmar wing, where the men and women of th aristocracy held high revel for two cen turies, has been found a handy plac for tucking away things which wer not wanted elsewhere, and it looks lik a regular junk shop. Rusty barrel or gans, broken-down tables, unseate chairs and pictureless frames lie on the floor in heaps, and over these hangs in ragged strips, as though to cover the desolation, the tapestry which former-ly decked the walls, a striking illustration of the "base uses" to which a roya palace may come.

Another of the rooms to be restored is Sir Christopher Wren's famous ban queting hall. The chamber in which the queen was born will not be opened to the genral public, but admission may be gained by a special order from the lord chancellor. In this room, which has been kept in order, a brass plate ha been placed, inscribed: "In this room Queen Victoria was born May 24, 1819.

# ELEPHANT CURIOSITY.

Ap Animal Which Stands with Its Feet Imhedded in Rocks. On the Miles Wilbur farm, less than two miles from Palmyra, Wis., nearly midway between Bald bluff and the Curelian spring, on a wild, rocky hill-

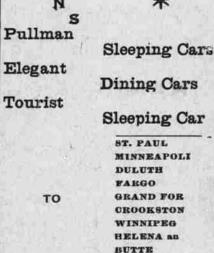

side of the Kettle range of bluffs, may be found a huge rock known far and near as the "stone elephant," says the Boston Transcript. It is annually visited by large numbers of people, some of whom pronounce it a petrified elephant of monster size,

but the theory most generally believed is that it was hewed out of the solid rock in which it seemed imbedded centuries ago by some prehistoric race. As if to substantiate this latter theory, from time to time many val-

uable tools, relics and implements unknown to the people of this age have been found about its base and in that immediate vicinity. The elephant is about 20 feet long, six or eight feet high, of a dark gray color and weighs hundreds of tons. The body only is above the level of the ground, its legs being deeply sunk below, holding it firmly in a standing position.

A tradition believed by many is that NEW YORK around this huge stone the Indians BOSTON AND ALL DINTS . rifices to the grea oner pirit and burn their prisoners at the take, or make them the victims of ow torture known only to the Ininns. It is a long established and generally believed theory that in this im- A. D. mediate vicinity and about Bald bluff and the Big springs were some of their most famous battle fields and hunting grounds.

In the Arctics. Walrus Bill-Klondike Ike's wife lidn't know him when he got home from our little swarray this morning. Sealakin Sam-How could you expect her to, after he had been out all night nd grown a beard six months old?-Indianapolia Journal.

animals and birds which derive almost as much enjoyment as human cyclists from trips on the bicycle. Of course, considerable time and patience were necessary to educate them up to the appreciation of the finest health-giving pastime on earth. As might be expected, monkeys take an easy first place after mankind in their regard of the wheel. Besides these, dogs have been trained to ride cycles. Members of the feathered world have proved apt pupils in cycling, and there are at least two cockatoos whose command of the bicycle is as perfect as it is wonderful. One belongs to the Bellonis, the owner of the very talented family of birds, and, besides ordinary riding, it gives an aerial performance, riding a tight wire. The other clever cockatoo was trained by Mile. Irma Orbasono, and rides a tricycle. But these two birds use their beaks for the purpose of steering their machines and pedal with their

claws .- London Cycle.

he higher arts, but they make and protide everything for themselves .- Pall **Mall Gazette.** 

TELEGRAPHING TO KLONDIKE. The Lines Were Laid There About

Thirty Years Ago. When one considers the great primal fact that Klondike is not in American territory one can understand why certain Americans are doing their best to discredit this mighty gold-bearing district in the eyes of the world. But while the discussion is going on the Canadian government has lost no time in considering the project of telegraphic communication with Klondike. This in- their lives one long worry and sorquiry brings out a strange fact-strange row-"

in that everybody seems to have forgotter all about it-that there was once a telegraph line to Klondike and far beyond. Mr. C. R. Hosmer, the indefati-gable manager of the C. P. R. telegraph all right. I calkerlate I know what system, does well to call it a romance.

AN ARKANSAS PASTEL

A Word Picture with a Very Pathetie Toning.

He sat on a backless wooden chair in front of his little cabin, idly cutting a "yaller" pine stick with his big jackknife. The poorly-cultivated corn was dry and yellow, but he had evidently not touched it. He was a characteristic specimen of the men of the section, tall, gaunt, ragged and yellow.

Eight or ten hounds lay around on the dusty soil near him.

I drew up my horse. "Hello!" I said; "we need rain." "Mebby," he said.

"You have a pretty good stand of orn there," I said.

"Yep," he said, languidly. "About time you were getting it in, don't you think?" I asked.

"Mebby," "When do you think you will harvest

it? You couldn't have better weather.' "Dunno."

"Now, look here," I said. "You have fair crop of corn there. Why don't you get to work and take it in. I suppose, like all the rest of you, you will let your wife do it?"

"Nope." "Well, it is a wonder. And you don't know when you will go to work at it?" "Nope."

"And you are not going to make your wife do it?" "Nope."

"Well, I'm glad to hear that anyway I never saw people who were as will-ing to let their wives do all the hard work as you men out here. You make

He got up and came over to the fence and leaned his arms on it. The eight or ten dogs followed him.

A KNOWING DOG.

He Had a Glass Eye and Never Rubbed It Out.

Marmaduke is dead. He was only a Blenheim spaniel, but he was wonderful in his way, for he had a glass eye He was bred by the duchess of Marlborough, who takes a great interest in the famous kennel. As will occasionally happen to small dogs, he tried to show his superiority over the feline race: but on one occasion a pugnacious cat declined to take orders from Marmaduke, and enforced its refusal by giving Marmaduke "one in the eye" with its claws. The result was that Marmaduke's eye was destroyed. The duchess then sent the spaniel to a veterinary surgeon, to be fitted to a glass eye, as she was especially fond of the little fellow, and the sight of the cmpty socket was repugnant. After he was sent back with his new eye, her grace was made nervous by seeing his staring artificial eye, it being just a little previous to a visit of the earl of Blandford, and so a home was sought for the unfortunate little blue blood, which was found with Miss E. L. Moore, of Denmark Hill, near Woodstock. The glass eye is the right one, and is exactly matched to the other brown, animated one. Marmaduke never tried to scratch or rub out the eye, but seemed to understand why it was there. He was run over by a van.

Monkeys in Africa. Africa's monkeys are giving out. In the neighborhood of the Gold Coast they have been exterminated, and last year the colony could collect only 67,660 monkey skins, whereas in 1894, 108,405 skins, valued at \$205,000 were exported.
