LATEST IN TRIMMINGS.

Tassels of Fine Silk and Many Buttons Are Among the New Features of Gowns.

Much of the effect from small tas sels as dress trimmings depends upon their being heavy enough to vibrate from their own weight. A tassel of fine silk has not body enough to do this. Hence the knowing choose such ornaments when made from heavy silk cord. There will be a number of new garnitures in the way of embroiderics, and buttons will also be extremely popular. Skirts are being trimmed with two

rows of buttons down the front. The two rows extend directly down the

middle of the front, and for this purpose small but very expensive but-tons are employed. They are of gold. 2 50

For the Complexion.

One hears of so many girls who complain of thick or spotty complexions, and in nine cases out of ten the trouble is quite easily removed. The very latest cure and quite the simplest one to follow, is to wash the face with parsley water, says a recent authority. It is done in this way. Take half a pint of rain water and soak it in a large bunch of parsley, letting it remain in the water all night. In the morning rub the face well with dry towel, then dip your sponge in the parsley water and pass it over your face, allowing it to dry on. Do this three times daily, and at the end of two weeks if you have persevered in the simple treatment you will be rewarded to see that there are no more spots or roughness on your face. Many of the high priced complexion nostrums contain this simple remedy, which is as inexpensive as It is effectual.-Detroit Free Press.
