THE CHURCH IN GOD'S VISION. A Dalles Pastor Finds New Testament Truths in Old Testament Imagery.

At the M. E. church Sanday Pastor Hawk took for his text Zechariah iv:2 and 2 verses, "What seest thou? And I said, I have looked and behold a can-

dlestick all of gold, with a bowl upon the top of it and his seven lamps there. sary. on, and seven pipes to the seven lamps Miss Grace Scott, of the Chronicles force, and Miss Martha Schooling, of the Oregon Telephone office, left on this two olive trees by it, one upon the right side of the bowl, and the other upon the left side thereof." The preacher said in

In the vision of the candlestick, bowl, pipes, lamps and olive trees we have an emblem of the church of the living God and her source of strength. The candlestick represents the church, the H. Herbring went to Hood River on olive trees on either side, with its ber-this morning's boat. ries of oil, symbolizes the goodness of God flowing into the bowl, which is Christ, the mediation, through whom sione all grace and mercy descend to mankind. The pipes are a sign of the

means of grace, as reading, hearing, singing, praying, the holy sacrament, etc. The seven lamps are emblematic of the spirit of God in all His plentitude R. H. Weber, the nurseryman, left on of grace, gifts and light dispensed through the church into the hearts of men. The church is symbolized by the candlestick, which is made of gold, a metal noted for its durability. Lead, iron, etc., can be melted till they waste evidence than in their method away, but expose gold to heat, melt it in the furnace, take it through chemical operations and alloy appliances, and yet it will retain its weight and escape uninjured. The blessed doctrines of the bed of treacherous snow, it is, of church of the Redeemer are incorrupta- course, impossible to move wheeled Dr. Ray Logan, of Shaniko, spent church of the Redeemer are incorrupta-Sunday in The Dalles, returning to ble; they have been tried in the formace of time; they have been tested by the of time; they have been tested by the however, intending invaders are by no alloy of this world and have escaped un- means given to confining their efforts injured. The Russian Admiral Alexieff Says the Foreign Minister Were Ont of Danger Yesterday.

Berlin, July 30 .- The German consul at Tien Tein has telegraphed under date of Saturday, July 28, to the foreign office, as follows:

"The German secretary of legation at At Kingsley on Friday, July 20, the Pekin, Herr Gelow, writes July 21: infant child of Mr. and Mrs. John Hix. "Thanks for your news. July 19 the Pekin, Herr Gelow, writes July 21: condition of Cordes satisfactory. The remaining members of the legation all right. The detachment of the guards lost ten killed and fourteen wounded. The houses of the legation, much damaged by cannon fire are held by the guard. The attack of the Chinese troops on us ceased July 16. Speediest possible advance of relief troops urgently neces-

> " 'According to trustworthy report, the body of Baron von Ketteler has been buried by the Chinese government." "

The Cordes mentioned in the above dispatch is the second interpreter of the German legation. He was with Baron von Ketteler when the latter was murdered, and himself was wounded. He escaped to the legation.

BRUSSELS, July 30 .- A dispatch from the Russian Admiral Alexieff, dated at Tien Tsin, July 30, and communicated to the foreign office, states that the latest news confirms the report that the foreign ministers at Pekin are out of danger.

WE ARE RICH IN GEMS

Every Kind But One Is Found in the United States.

This Country Has Never Taken Its Proper Place Among the Nations That Produce Preclous Stones.

The United States have never taken their proper place among the gem-pro-ducing countries, principally, it would appear, because of the superior gains offered in the metal mines, says the Brooklyn Eagle. Patient and skillful working of the gem mines, however, would appear to promise as well as many of the metal industries. There are in Montana sapphires of beauty and value. True, they are light in color, but they have more brilliancy than the Asian sapphires, and often exhibit dichroism, or double color, under different lights. The supposition that a sapphire should be dark blue is possibly responsible for the slowness of their acceptance in the market, but, as a matter of fact, sapphires are not of necessity blue; they are green, yellow, purple, white, and when they are red we call them rubies, for the ruby and sapphire are identically the same, save for a fraction of a per cent, of the coloring matter.

Every gem known to the lapidary has been found within our borders, except that form of chrysoberyl known as alexandrite, a stone most commonly found in the Urals, and showing green by day and red by artificial light. We have also found but tew of the cari-colored garnets of which Russia furnishes such remarkable and beautiful examples, and none have their brilliancy, though the red garnets of Arizona and contiguous territory are unsurpassed in richness, We have several gems, moreover, that are almost peculiar to this country, and that should be used more extensively because of their intrinsic beauty. Such are the golden beryls of Connecticut, that are of a brilliant vellow, full of light and sparkle, and the curious chlorastrolites and thomsonites of Lake Superior, that are useful as green or mottled grounds in the

that lend themselves to purposes of ornament are the grassgreen hiddenite, the superior of emerald in vivacity; the duller green diopside, the utabite, which is a rival of turquoise, if it can be made to keep its color and texture; the zircon, of red and brown, THE DINING CAR ROUTE FROM PORTLAND and especially the tourmaline, which presents a wide range of color, from jet black to almost water white, and including pink, brown, blue and almost every shade of green. These tourmalines are more appreciated abroad than they are at home, and whereas we buy sapphires and rubies from Burmah, and diamonds from Africa, and topazes from Japan and Brazil, and turquoises from Persia, we remain seemingly indifferent to the gems that come from Maine and Connecticut. Collectors have known them for years, however, and have prized them at their value. Many of the crystals show two and even three colors, being red at one end and green at the other, or green without and deep pink within. Of these tourmalines \$2,000 worth were mined last venr at Mount Mica, Me.

Turquoise has been known to the Indians of the southwest for centuries, and there is good reason to be lieve that it was mined by the Aztecs. Brooklyn capital has been invested in one of the New Mexico mines, and it is said that a superior quality has been produced. There is probably no ornamental stone that is so extensive ly imitated. Hundreds of people are wearing what they suppose to be turquoise, but is in reality glass or enamel or a composition that closely copies Its color and apparent texture, and does not fade, as the stone itself is apt to do. There has been an addition to the semiprecious stones of a new va riety of garnet known as rhodolite, o a pale rose red, but not many speci mens have been brought to the cities and it has not appeared to any exten in jewelry. It would seem to be wort our while to work our gem deposits more thoroughly, for, according to the report for 1898 by Mr. George F Kunz, the expert, there continues to be a profitable activity in the making of jewelry. This country has im ported is much as \$14,500,000 worth of gems and gem material in a single year, while the home production has dways been relatively slight, albeit there is a gain. In 1898, for instance the production of precious stones in the United States represented about \$161,000, as against \$130,000 in the year before, and \$98,000 in the year before that. The indications are that we have mineral veins and deposits that will, when adequately worked, offer rewards far in excess of these figures.

A Night of Terror.

"Awful anxiety was felt for the widow of the brave General Burnham of perous, who have paid all their debts, Machias, Me., when the doctors said or are paying them off, there is nothing she could not live till morning," writes attractive in the untried propositions of Mrs. S. H. Lincoln, who attended her Bryanism.
