## Fireless Cookers Save You Money

Our fireless cookers save you money by using but one-sixth of the fuel of a stove. They stew, boil, broil, roast and bake, and they give satisfaction. Any good fireless cooker will do this.

But this fireless cooker saves you money on first purchase price. It costs but half of others.

This cooker is a cylinder with two chambers. It is all metal and can be kept thoroughly clean. Because there is not one particle of wood in this cooker, it is more sanitary than all wooden cookers.

It comes in three sizes, one of which is certain to please you.

There certainly can be no complaint for the efficient way the exhibit building is now being conducted.
