When You are Ill—it doesn't take a good doctor to tell that. Most anyone can do as much. To tell what makes you ill sometimes calls for the utmost skill of the best physician.  
Anyone, by a few simple tests, can tell that your eyes are defective—that you need glasses of some kind—but to know the exact cause and fit the right lenses calls for more than ordinary skill.  
We have made the fitting of glasses a special study and we are in business to bring wrong eyes and right glasses together.
