

VOL. 11.

ROSEBURG, DOUGLAS COUNTY, OREGON. TUESDAY, OCTOBER 17, 1911.

No. 292

OREGON CLUBS

Womens Federation Meets in Eleventh Annual Session.

THE MAYOR WELCOMES WOMEN

Mrs. Abigail Scott Duniway, Pioneer in Club Work, Enthusiastically Received—Mrs. Smick's Address in Full.

The eleventh annual session of Women's Federated Clubs, at the Presbyterian church was called to order at 10:10 o'clock this morning by the president, Mrs. Sarah A. Evans, who asked as a special favor that Mrs. Abigail Scott Duniway, former president of the organization and the first woman in Oregon to take up work in behalf of women's clubs, take a seat on the platform. As Mrs. Duniway complied with this courtesy she was greeted with prolonged applause. Following invocation by Pastor Burkhardt, the audience joined in singing America in behalf of the city Mayor Fred Haynes made a brief address of welcome. After assuring the assembled ladies that speech making was out of his line, Mayor Haynes paid a deserved compliment to the ladies of Roseburg by stating that since he had stood at the head of the city government there had not been a single improvement made along civic lines but what it had the endorsement and active support of the women's clubs of the city, and that their efforts were largely responsible for the success of these several undertakings. The cordial tone of the mayor's speech was greatly appreciated by his listeners, and after a brief acknowledgment of the city's hospitality by Mrs. Evans the club gave a hearty cheer for Roseburg and Southern Oregon.

On behalf of the Ladies Auxiliary, Mrs. W. A. Smick delivered an address of welcome to the ladies of the convention in which she said:

Madam president, women of the federation and friends: It becomes my privilege, in behalf of the Auxiliary of the Roseburg Commercial Club, the '95 Mental Culture Club and the women of our city and county, to bid you welcome. We welcome you to our city nestled among the Umpqua hills; to the hospitality of our homes; and above all we welcome you to the enduring affection of our hearts. We welcome you the more cheerfully because of the class of women which our federation of clubs represent. The very best women in every community from which you come, and also because of the class of activities for which you stand. You represent the best type of progress in our modern civilization. You give every member of our federation the opportunity of a university training in the school of life. You endeavor for the development of the individual unit, in order to secure the elevation of the masses. The women who makes her little home in the wilderness or the poor woman, who is struggling for maintenance of herself and family, these may climb the steps of civilization to the achievement of noble womanhood.

You are the pioneers of that new state of society wherein our women shall come into possession of her just rights, and take her place in the great world's work. It has been said: "We are not struggling for our rights in order to enjoy them selfishly, but in order to better do some of God's work in the world." May heaven's rich blessing rest upon all women who struggle for this end; who climb that fettered life which is characteristic of the past, and ascend to higher and nobler regions of thought. Responsibility is education. Education in the sense of development is progress. The purpose of education is to bring out individuality and latent powers of genius. "No one is strong until he acts. No one is wise until he thinks. Difficulty and discouragements have

been the key to success. By the influence of women is due the evolution of a new point of view. This point of view means less attention to system and more to the nature of the child. It means all the powers and all the faculties latent in man; physical, mental and spiritual, that he may be the better able to serve his fellowman. Self-development for the purpose of social service must be the aim of education from the human point of view. A new social order will arise due to the part women are taking in the progress of education. Education should include culture, but it should also give practical training. The playground movement in a number of our large cities has been carried forward by the women's clubs until its worth was demonstrated and the municipal authorities were willing to take charge of it. The fact that in Philadelphia over 125 acres of vacant lots were used for vegetable gardens the produce being valued at \$25,000 in due largely to women's clubs in securing for needy persons the right to use the land. They have also accomplished a great

deal in improving conditions in factories and public institutions, and in general sanitary reforms.

While a part of the English women have been struggling for the ballot and the improvement of social and political conditions, American women, through their clubs, have shown how easy it is for them to secure social and civic reforms without the ballot. They have beautified towns by securing better streets, the planting of trees, and the laying out of parks. They have also established the traveling library and helped to develop many permanent libraries and reading rooms.

From an extract of Mrs. Philip Moore's address at Baltimore she says: "We come to the present time, the time of awakening and re-ordination, when we join with men's organizations and even with the government in improving the conditions of our country; we have been invited to join and are giving our best efforts in considering such questions as conservation of natural resources, the protection of the child that labors, the suppression of the white slave traffic and other moral questions. We stand for all that will uplift the race. The spread of the White Plague and an effort to stop unnecessary destruction of forests and our national parks."

You stand for reforms and philanthropy. The works already accomplished leave little room for doubt that all for which you are striving will soon be attained. Arise

ALLEY PROTEST

Objects to Re-laying His Cement Sidewalk.

LEWIS FILES ANOTHER PETITION

Councilman Micelli Objects to Paying Councilman Clements \$25 For Drawing Plans and Specifications for City Barn.

That the city of Roseburg will be compelled to pay for the rights in the courts in the event the officials persist in re-constructing the cement sidewalk of F. E. Alley, on South Stephens street, appears conclusive from a remonstrance filed with the city council last evening by Mr. Alley.

The remonstrance in brief, and attached thereto is a copy of the notice served upon Mr. Alley by Marshal Harman, in which the former was instructed to lower his walk within thirty days from the date specified in the notice.

Other than protesting to the re-building of the sidewalk in general, Mr. Alley alleges that he appeared before the city council at the time he was about to construct the walk and asked for a legal grade. He claims that the council considered the request, and after due deliberation ordered the city engineer to proceed and establish the grade. Further, he says the city engineer acted as instructed, and that he (Mr. Alley) was given what he supposed a legal grade. Mr. Alley claims that he protested against the grade given him by the city engineer at the time, but was informed that it was correct and that he would be perfectly safe in proceeding with his walk.

To be sure, Mr. Alley claims that he later sent for the city engineer, and that he set the grade stakes for the contractor to proceed with the work. In addition to the above remonstrance, Mr. Alley protests against the city's contemplated procedure in building the walk for the reason that his property will be materially damaged in the event such action is undertaken.

Upon reading the remonstrance Councilman Micelli remarked: "Inasmuch as there is not a scratch of a pen in our records to establish the contention of Mr. Alley, I move that the remonstrance be rejected." The motion carried by the unanimous vote of the council.

Mr. Alley's remonstrance followed in the procedure of the council at a previous meeting, when its members voted to re-construct the walk and assess the cost of the same against Mr. Alley's property. As the matter now stands it appears imminent that a law suit will follow in the event the city persists in carrying out the provisions of its recent decision.

Squabble Over License.
The chief discussion indulged in at last evening's meeting of the council followed the reading of a petition in which L. L. Lewis asked that his license to conduct a "near" beer saloon be transferred to S. H. Meyers, who recently purchased the saloon.

Councilman Mullen had hardly advanced a motion to the effect that the petition be referred to the license committee for investigation, when Councilman Sykes arose and suggested that the transfer be made as requested in the petition. Mullen objected and the question was placed to a vote. Krohn, Micelli and Sykes voted against referring the petition to the license committee, while Honek, Josephson, Sether, Natcher and Mullen voted in favor of the original motion. As a result of the vote the petition will be investigated by the license committee and a report will probably be forthcoming at the next regular meeting of the council.

Objects to Donation.
Mayor Fred Haynes called attention of the council to the fact that Frank Clements, a member of the body, prepared the plans and specifications for the city barn, and was entitled to some compensation for his work. The mayor said that Mr. Clements had never requested pay for the work, but that he (the mayor) thought it only fair that he be allowed a reasonable amount.

A brief discussion followed, and finally Councilman Krohn advanced a motion authorizing the payment of \$25 to Mr. Clements. Upon being placed to a vote all of the councilmen cast their ballots in the affirmative with the exception of Councilman Micelli, who voted in the negative.

In explanation, Councilman Micelli said he was not opposed to allowing the bill for personal reasons, but deemed the action a dangerous precedent. In other words the mayor-elect assumed the position that the council had no legal right to compensate councilmen for their work.

Minor Matters Considered.
Al Creason complained relative to a shortage of water in North Rose-

ATHLETICS WIN

Philadelphia Team Wins Second Game of Series.

BAKER MAKES GOOD AT THE BAT

Lanes Out a Home Run And Ties Game In The Ninth Inning—Game Is Attended By Fully \$30,000 Fans.

(Special to The Evening News.)
NEW YORK, Oct. 17.—In a thrilling 11-inning game, played on the Polo grounds, Philadelphia this afternoon won the third exhibition of the world's championship series. With today's game to its credit, the Philadelphia team boasts of two games, while New York's crack nine appears content with victory in the opening battle.

The almost invincible Matthewson, who pitched for New York, held the Athletics down for eight innings. His work was wonderful, and at times it appeared as though he would win the game single handed. One score for the Giants in the third inning made it look almost certain that New York would win. In the ninth inning, however, Baker, the pride of Philadelphia's batting staff, lined out a home run, and in so doing, tied the game. In the tenth inning, the score was tied without incident, other than the masterly pitching of the opposing twirlers. In the eleventh inning Collins singled, followed by Baker, and the two crossed the home plate before the end came.

Kerzog, for New York, doubled and was brought home by a stiff liner shot out by Matthewson. Decker, who reached third, was caught stealing home and the game was over.

Score In Detail.
Teams 1 2 3 4 5 6 7 8 9 10 11
Phila. 0 0 0 0 0 0 0 1 0 2
N. Y. 0 0 1 0 0 0 0 0 0 1

Summary.—Philadelphia 5 scores, nine hits and two errors; New York 2 scores, three hits and six errors. Batteries—Matthewson and Meyers for New York; Coulsons and Lapp, for Philadelphia.

Attendance 30,000.

One Jurymen Accepted.
LOS ANGELES, Cal., Oct. 17.—Determined, if possible, to qualify several additional veniremen today, the defense in the McNamara trial, led by Attorney Clarence Darrow, personally conducted the questioning of prospective jurymen during the morning hours.

It is considered quite likely that John Roberts, who was passed by the defense subject to peremptory challenge will remain through the trial. He is unbiased, highly intelligent, and a retired business man. The defense appears well satisfied with the elimination of Venetian Nelson, whom Judge Bordwell dismissed. His case has already outlined its defense, and has even gone so far as to practically admit that the chief contention will be that the Times office was destroyed by a gas explosion.

Foreigners Are Terrified.
HANKOW, Oct. 17.—Foreigners are in terror here today as the result of pillaging by the rebels. The robberies have continued for several days and the people are alarmed.

Traffic Is Suspended.
PERIN, Oct. 17.—Traffic was suspended today between Pekin and

REPORT A MYTH

Plot is Blamed Upon Railroad Officials.

PRESIDENT TAFT OFF FOR EAST

Supreme Justice Harlan Is Buried In Rock Creek Cemetery, Near Washington—Senator La Follette Is Chosen.

(Special to The Evening News.)
SANTA BARBARA, Cal., Oct. 17.—Little credence is placed in the published reports to the effect that 21 sticks of dynamite were found under the El Captain bridge, 25 miles north of here, in a deliberate attempt to blow up the bridge over which President Taft's special crossed, despite the Mexican watchman's statements that he fired several shots at a mysterious man.

Local labor leaders contend that the plot was hatched with a view of ascertaining the striking shopen. Several other reports of a similar nature have been circulated, and the unionists believe that the dynamite was purposely placed and discovered before any harm could be done. Sheriff Stewart said today that he didn't believe the dynamite was planted with a view of killing the president, but for the express purpose of blowing up the bridge.

Taft Speeds Eastward.
LOS ANGELES, Oct. 17.—Satisfied with the Pacific coast reception, President Taft started eastward today on the final leg of his journey. He left this city in an auto and traveled to Long Beach where he boarded the special train for Butte, Mont. He will be forty-five hours enroute with one 25-minute stop at Ogden, Utah. Meanwhile he will rest preparatory for a strenuous program of the Northwest and East.

Pay Their Respects.
WASHINGTON, D. C., Oct. 17.—Last respects to the memory of Supreme Justice Harlan, were paid today by the entire body of officials of the national capital. Funeral services occurred in the Presbyterian church, interment following in the Rock Creek cemetery. The service was private. The colleagues of the deceased on the supreme bench acted as pall bearers.

LaFollette Is Chosen.
CHICAGO, Ill., Oct. 17.—United States Senator LaFollette, of Wisconsin, will be the choice of the progressive republicans for the presidential nomination according to a definite stand taken at a conference held here today. They plan to carry the fight to the republican national convention. The declaration of principles of the progressives looked for greater control by the people in government affairs. No special reforms are outlined at present.

Withdraw Part of Fleet.
LONDON, Oct. 17.—Rome dispatches say that Italy will withdraw a portion of her fleet from Tripoli with the objection of occupying several islands of Grecian Archipelago. Turkey will soon issue an edict expelling all Italians from the Ottoman Empire.

Mr. and Mrs. Clark L. Bargar, of East Douglas street, are contemplating moving to the Jennings residence on Pine street.
