When your watch is out of repair you take it to a competent workman, and he goes over the works and carefully cleans and regulates them. The result is a perfect time-piece. The same is true of your piano. In order to get the best possible results from this most perfect and delicate of musical instruments, it should be regularly gone over by one who is thoroughly competent to put it in the most satisfactory condition. It should be perfectly tuned and voiced, and the action carefully regulated when necessary. Your piano will be in the best condition for you. Phone 288-R. dtf

Screams of murder, suicide and other unusual wailings, caused no little commotion in one of Roseburg's "quiet" and restricted residential districts at about 2 o'clock this morning. After being separated from his wife for several months, it is said that the husband called upon her late last night, and in a mood of despondency, begged her to return to his bedside. She refused, according to reports, and the fireworks commenced. With a sudden and almost startling "yelp" he threatened to kill the frantic woman, who called for assistance. Several women in the neighborhood responded in haste, and it was not long until a couple of men were searching for the going-to-the-sun. Charles Williams responded, and the trouble was soon abated.
