A hog doesn't object to most any kind of dirty water to wallow in, but when it comes to his insides it would prefer to have it fresh.

Either beans or potatoes make an excellent crop to grow in the young orchard, and the thorough cultivation they receive furnishes the best possible condition for the growing trees.

Mrs. King of Corpus Christi, Tex., is credited with being the manager of the largest ranch in the world operated by a woman. The ranch comprises a million and a quarter acres and is owned by Mrs. King.

Triplets in the bovine tribe are quite a rarity, and even more rare is it that they grow to maturity. The writer saw such a trio the other day—all heifers two years old and all vigorous—and their dam with them.

There should be no double standard of courtesy for drivers of autos and horses on public thoroughfares. There is only one rule that does for all occasions—courtesy and the square deal or, in other words, the Golden Rule.

It's a pretty good idea for the busy man to take an outing or vacation now and then if for no other reason than to keep from getting into that habit which makes the taking of a vacation and the enjoyment of it a virtual impossibility.

The reason why vegetation on low ground gets hit with spring frosts is the more easily understood when, in passing rapidly through the country, one notices the marked differences in temperature between stratas of air on high and low lands, even if separated by a very few feet.

The old theory that thunder, the fierce noise, sours milk has been exploded. It has been found that the rapid scouring of milk during a thunderstorm is due to the effect of the electricity in the air upon the myriads of bacteria which the fluid contains, it having the effect to make these small organisms very vigorous and active.

The white clover is abundant this year again in many sections, and both stock and bees are making the most of it. It is not only pleasing to the eye as it feeds the pasture stretches, but the odor from it is most fragrant. It may be due to having needed moisture, but it is appearing this season in abundance where there has been little or none of it for the past two years.

There is nothing produced on the farm that is more delicious and fragrant than sweet, clean milk and its products, cream and butter, and, on the other hand, nothing more rank or odorous than these same products if they are dirty and full of putrefactive bacteria. To produce the better grade cleanliness is absolutely necessary, and this is possible through the proper use of cold and hot water and exposure to sunshine.

The guano, which is the deposit of millions of sea birds found on the island adjacent to Peru, is said to have been used and exploited commercially by Lucas centuries ago. In modern times this fertilizer has been used on a commercial scale since 1840, and during the years intervening it is estimated that the islands have yielded 11,000,000 tons. Some years ago the richest deposits were on the Chincha Islands, where the guano lay to the depth of 100 feet.

In many sections of the northern states where the apple trees are likely to produce new wood so late in the season that it runs the risk of being injured by the fall freezes it is well to stop cultivation about the 15th of July and sow some cover crop which will absorb the surplus moisture that the soil may contain. For this purpose vetch or oats and buckwheat may be used. The former has a trifle the advantage over the latter combination in that it will continue to grow after the first frosts and, being a legume, carries the soil through its root system.

An interesting illustration of how unwise can be turned into cash by the energetic and wide awake young man is presented in the case of a farm lad of seventeen years living in South Dakota. While his daily work would not seem calculated to make him expect any mirror on the handling of postage stamps, he has nevertheless invented a stamp cancelling device for which he has been offered \$20,000, while many others who have heard of it have offered to spend large sums of money to plant for its manufacture. This boy has been summoned to Washington to exhibit his patent before the postal authorities.

GRAY HAIRS AND BALD HEADS.

Are Disappearing in New York City And Elsewhere.

Men and women are realizing that they can accomplish this so easily by simply using HAY'S HAIR HEALTH—the best and only really satisfactory preparation for restoring Gray hair to its natural color.

Mrs. Fred Gompert of 223 W. 148th street, New York City, writes us:

"About six months ago I had a bald spot on the very top of my head as big as the palm of my hand. In about seven week's time, using HAY'S HAIR HEALTH continuously, new hairs started to grow. They are getting just as long and are the same color as the rest of my hair. I shall never give up using it."

TO THE FRUIT SHIPPERS.

The Southern Pacific Company are arranging a cheaper rate to take effect August 1, 1912, on green fruit (except apples) from all points on the Southern Pacific lines in Oregon to Cincinnati, Buffalo, Pittsburg, Philadelphia, New York, Boston and other points in that district. The present rate being to all points except Boston \$1.50, and to Boston \$1.55 per hundred pounds. The new rate is to be \$1.25 per hundred pounds, thus making a reduction of 25 cents and 30 cents per hundred pounds respectively. This change has the effect of making the rate on green fruit (except apples) to all Eastern points the same and shippers of pears, prunes, peaches and similar fresh fruits will be able to ship to all points without any change in rates.
