What a Child OUGHT to Know and WANTS to know

Answers Every Question a Child Can Ask

- Why is the sea never still?
- Where does the wind begin?
- Why can't we see in the dark?
- What are eyebrows for?
- Why are the rain drops round?
- Why is the snow so white?
- What is the Milky Way?
- What is the use of our hair?
- Why do we grow old?
- Why is yawning infectious?
- Do we think in words?
- Why does water freeze?
- And thousands of others

- Fifteen Great Departments

The Book of Knowledge

The Children's Encyclopaedia

Superbly Illustrated with 9,000 Pictures 350 Magnificent Colored Plates

FIFTEEN GREAT DEPARTMENTS OF KNOWLEDGE

The Fifteen Great Departments supply the needs and exercise all the faculties of the growing mind. Natural Science, which lights up nature; delightful history, mechanics and arts; beautiful places to be seen or dreamed about, adventure, which arrives and brings back a treasure; real people more interesting than giants and cleverer than fairies; things to make and do which delightfully occupy busy hands—all satisfy and stimulate eager young minds. The reason for including every department will be easily apparent after examining the work.

President John H. Finley, of the College of the City of New York, introduction says: "Suppose a boy of ten were to spend fifteen minutes a day reading these pages. . . he would at 13 know more about the earth and the life on it than the wisest men knew a few generations ago."

A WELL-ROUNDED EDUCATION

A well-rounded education cannot be obtained in the school room alone. The boy or girl whose progress is the most rapid will almost always be the one whose reading has been carefully selected at home. The editors of the BOOK OF KNOWLEDGE have rendered this great service to childhood. No wise parent will neglect the opportunity offered by this work to study the disposition and capabilities of his child. In many cases a child's life work may be determined by the possession of these books.

THE THREEFOLD INFORMATION

The important facts in all the leading articles are indelibly impressed upon the mind in three different ways. First the summary at the head of each article, then the wonderfully interesting article itself, then the pictures illustrating it, with the several lines of terse and vivid description.

THE LITERARY DIGEST SAYS OF THE BOOK OF KNOWLEDGE:

"It is an exhaustive work and a notable example of editorial skill in the choice of topics and their treatment. Adults as well as children will be fascinated alike by the luminous text and the illustrations. As has already been pointed out in these columns, one of the uses of such a work would be to assist parents, their sons and daughters in finding out whether a child's natural bent be toward science, mechanics, trade or literature."

LET THE CHILDREN DECIDE

They will be delighted with the beautiful illustrated booklet mailed free giving the contents of each of the Departments of Knowledge. The valuable pamphlet, "The Mind of a Child," also presented.

The Giroler Society, LONDON and NEW YORK

THE WISDOM OF THE WORLD IN SIMPLE LANGUAGE

The lost art of simplicity—the art of presenting profound truths in the simple language which a child can understand—has been discovered by the editors of the BOOK OF KNOWLEDGE. The simple clear and convincing style which appeals equally to the adult mind is the secret of the great drawing power of this remarkable work. It quickens and stimulates thought and in a marked degree wakens interest in the world of ideas. Not only facts but ideals are absorbed, and learning made a real delight.
