

Why The Monarch Range Leads All

1. The Monarch is made of MALLEABLE iron and is riveted like a skyscraper.
2. A cast iron or grey iron range cannot be riveted, but must be bolted and nutted. After five or seven years use grey iron ranges are full of cracks and leak at every joint.
3. The Monarch Range, being malleable and riveted, remains tight and burns no more fuel than in the first year.
4. The Duplex Draft on the Monarch saves fuel. Come to our store, we will show this, the three wall construction and many other points.
5. Roseburg prices on The Monarch are \$5 to \$10 lower than in Portland.

COUNTRY COLD

So Residents of Canada Look Roseburgward

COLONY OF 4000 WILL MIGRATE

Large Number of Former Citizens Of Uncle Sam's Domain Tired Of The Frozen Northland—Coming Back.

During the month of August, 1912, the Publicity Department of the Commercial Club sent out 1267 pieces of mail. Inquiries were received from 27 states, the Philippine Islands, Canada and France.

As usual, the largest number of inquiries came from California with Oregon second and Washington third. Of the eastern states, the largest number of inquiries were received from Illinois, with Minnesota second, Missouri third, Oklahoma fourth and North Dakota fifth. A larger number of inquiries than usual were received from Canada, and less inquiries than usual from the Intermountain States.

The inquiries indicate that 31 per cent of the people make general inquiry only, 11 per cent ask particularly about general farming land, 23 per cent make specific inquiry relative to homestead land, 8 per cent ask particularly in regard to fruit raising, 3 per cent ask for very cheap land, the balance of the inquiries being stock, poultry raising, dairying, etc.

The inquiries for positions in business houses were much fewer than usual. The inquiries for business openings were also smaller in number than is generally received in the course of any month. Only one correspondent states that he is willing to do work of any kind. Men with trades asked relative to the chances for work about 4 per cent of the inquiries being of this nature.

The inquiries for maps were more numerous than usual, and not a month passes but what there are many inquiries for official maps of Douglas County.

The change in the homestead laws has increased the number of inquiries relative to homesteads materially and a large number of those who inquire relative to homestead land ask that we furnish a map of Douglas County, showing the location of these lands.

Inquiries relative to the land "won by the United States government from the railroad company" were also more numerous than usual, the writers indicating a desire to come out and locate on this land if 160 acres of level land, reasonably close to trans-

portation, is obtainable by paying \$2.50 per acre therefor. There have been quite a number of people located in Douglas County on this railroad land during the past two months, believing that occupation will give them title, but it has been the policy of the Commercial Club to advise all who make inquiry about this railroad land that until the question of title is decided, it is very doubtful if any means, can be employed to obtain even a shadow of title to this land.

Nine persons asked for copies of the local papers, which were sent, but if the terrific duel between our local publishers continues, perhaps it will not be safe to send out our papers for a time.

Several correspondents stated that they were informed that a railroad would be built from Roseburg to the Coast soon, and asked whether or not construction had commenced, and if not, how soon it would commence. It was deep sorrow that we informed them that construction had not yet commenced, nor did we know when it would.

Among the substantial inquiries was one from a gentleman in Canada, who informed us that a large number of people located there, formerly residents of the United States, were much disappointed with the climatic conditions in that country, and therefore wished to return to some locality where climate conditions were more attractive. In his letter he stated that the colony looking for a location numbered 400 people, and that they had at the time of writing a number of scouts out looking over various sections of the country; that within a reasonable time some of their number would visit Roseburg and the Umpqua Valley. He indicated that the choice of locations had narrowed down to the Umpqua Valley in Oregon, a certain valley in California and a large tract in Mexico, the social conditions in Mexico being such that that location was not being seriously considered.

Another writer states that seven families expect to move to Oregon as soon as crops are harvested this fall, and others state that several families in their immediate neighborhood intend to come to the Northwest after harvest.

Douglas County literature has been sent to all these prospective citizens, and without question influences them in favor of this community.

One of the men interested in the construction of the railroad through Roseburg handed us a little bouquet while here. After making inquiry as to the amount available for advertising, he stated that for the money expended Roseburg is the best advertised locality in the West, as far as his knowledge went. He went on to say that without question Roseburg and the Umpqua Valley were becoming more widely known all the time, and in the course of time our exceptional climate would attract many thousand to this locality, even if we had very few other inducements. His advance was to keep up the good work and Roseburg would be the second city in Oregon.

The Publicity Department expects to send several varieties of products to Portland to be used in the Oregon car, which will visit the various land shows, and is preparing an attractive exhibit of Umpqua Valley products to be placed in the Club Rooms. The Publicity Department received quite an exhibit from Dr. Bailey to be used with the Oregon Exhibit, and Mr. George Neuner, Sr., kindly furnished the club with a sufficient number of figs, so that we hope to have a jar of figs processed for our permanent exhibit.

Mr. J. M. Reese furnished a number of very fine apples, but unfortunately our processor failed to get the proper results in preparing them for exhibit.

We would like very much to have some of the large blue figs which are grown here, walnuts and particularly chestnuts and almonds for our local exhibit.

..NOW..

Is the time to lay in your winter's supply of

WOOD.....

We can furnish you 16-in. slab wood by the car load for only \$3.75 a cord, f. o. b., Roseburg, Oregon.

Page Investment Company

709 N. Jackson Street
Phone 242

Mr. R. M. Hall sent us in a supply of Italian, French and Silver prunes, all of which we expect to have processed and placed in the permanent exhibit. When the products are furnished without expense to the club, it is our plan to tag the same, showing by whom they are grown, in order that the donor may receive proper credit for the courtesy. We would be glad to have a much larger supply of grains, corn, hops, alfalfa and other grasses suitable for exhibition in the East. Through the courtesy of the Southern Pacific Railway Company, the Club is permitted to forward these exhibits without charge to Portland, where they are taken care of by an experienced man, who will arrange each country's exhibits so as to show its products to the best advantage.

LOCAL NEWS.

Papers of final account were filed in the probate court today in the estate of Thomas Maupin, deceased.

William Jackson the Looking Glass farmer, was a business visitor in Roseburg today.
