HERE ARE THE TWO MEN

Dr. F. A. Cook

R. E. Peary

Peary has published his book and made his charges against Dr. Cook.

Claiming the North Pole, Mr. Peary has never made public an iota of the "proof" upon which he based his claim.

Mr. Peary's claim has never been proven.

The National Geographic Society of Washington awarded a medal to Mr. Peary as the discoverer of the North Pole. During the Congressional investigation last winter, two members of this society testified that in the Peary "proof" there was no proof. This was suppressed in the newspapers. Mr. Peary himself testified that, although he had them, no tests whatever had been made of his instruments by his friends of the Geographic Society, who gave their prearranged verdict.

The two cases, therefore, are parallel in the re-examination of verdicts, except that the Washington verdict was dishonest and the Copenhagen verdict was honest.

Dr. Cook maintains that the only proof of such a quest must be found in the explorer's narrative account. This is now told to an American audience for the first time.

In his lecture Dr. Cook tells a fascinating story of life in the Arctic and the strange people who inhabit the cold world of the Aurora; of Eskimo love-making, with a temperature far below zero; of the natives' marriage customs, and the coming of the stork among them.

Dr. Cook tells a story of hardships such as few men ever endured and lived. People thrill with his account of hazardous Arctic hunting, of his mad dash over frozen Greenland mountains during the long Arctic night, and of the perilous moonlight quest of walrus on the frozen Arctic Sea.

Bring the family to the Antlers tonight. They will appreciate it.

Buy bread made in Roseburg—none better. You could do your banking in Portland; laundry could go sent there; dry goods bought there—but it is not good business policy. Spend your money at home.
