

NEW EVENING WRAPS.

Butterfly Bows and Bustle
Draperies New Style Features.

THE BUTTERFLY WRAP

The most artistic ideas are carried out in evening wraps. Every smart wrap now bears a large bow at the back. The model illustrated here is a French design fashioned in Egyptian crape. It has the huge butterfly bow at the waist line. The new bustle back drapery is used on it with quaint effect.

On many new evening gowns and wraps tassels are prominent. They are ideal weights for draperies, and yet they have a decorative value, especially those that reflect beads of many colors. The jet tassels answer so well the demand for cut jet that they are being used in many ways.

Cordlike girdles of jet and beads give a classic air to many evening gowns in which the simple Greek lines have been retained.

Medial collars of silver lace, ostrich ruffling, jeweled girdles, velvet flowers and lace decorated with strass and silver or gold threads are a few of the methods by which quality is made the feature of the present day evening costumes.

For Washington Birthday Candies. Patriotic designs embellish candy boxes in which bonbons for Washington birthday parties are put up. These charming boxes may have a

PATRIOTIC CANDY BOX.

cherry tree emblem, crossed flags, colonial hats and other decorations of a suitable character. The box illustrated here is designed in red, white and blue. A medallion portrait of the Father of His Country surmounts the small silk flag on the top of the box.

A Convenient Dressing.
A most efficient antiseptic wet dressing, poultice and cold pack may be made in the following manner: Soak a sufficient amount of gauze in one part of alcohol to three parts of water. Apply to the part to be treated thoroughly wet, just short of dripping; cover with rubber tissue and bind firmly with a bandage. Such an application many times takes the place of an icebag in reducing swellings or acute inflammation. On the other hand, it will hasten suppuration of a boil or abscess that cannot be aborted as well as the old flaxseed poultice.

This alcohol dressing should be renewed every twelve hours. If the bandage is put on tightly, so that no air gets under the rubber tissue, the dressing becomes a warm one, acting like a poultice. If the bandage is put on more loosely, so that air gets under the rubber tissue, allowing the alcoholic solution to evaporate slowly, the dressing is a cold one, acting like an ice bag.
