SHUT OFF THE GAS.

It is related of the richest man in the world, as far as material possessions are concerned, that he was once riding in his auto and had occasion to descend a hill, when started to go down he leaned over and touched the driver on the shoulder and said, "James turn off the gas, don't waste it." To many people this would sound like penuriousness, coming from the man who of all others could afford a little extravagance in the use of that article, for he was the practical owner of the world's supply. But would it be close-fistedness or penuriousness that would make this man say this, this man who has given away millions as though they were dead leaves? Would it not rather be the mere force of an earlier formed habit of frugality and a detestation of waste, that could not be changed by the actual possession of unlimited and fabulous wealth? Could not these words or ones of similar import be used by many or all of us in countless situations of life, and could we not get the benefits ourselves by saying at times, "James, turn off the gas"? What a story of thrift and watchfulness are embraced in a sentence of this nature, what a curb it would be to exuberant, impatient youth if at some time the words "turn off the gas" were used; and to the older more experienced among us the warning can come with well timed grace, for in every phase of human activities, there are points reached where the injunction to "turn off the gas" can well be applied.

There are a great many men in the city of Roseburg today, who have a fuller and more definite idea on subjects relating to morality and the elevation of the human species, than they ever had before. It was an interested and attentive assemblage that carefully listened to the addresses of the various speakers. Impressions were made that will have a lasting effect for the betterment of certain conditions from which no community is free. There is more good accomplished from earnest quiet work of this nature, than there is in the many spasms of social reform that appear from time to time, and likewise from drastic legislation that is often put on the statute books. Too often has it been the case where reform movements are launched with great enthusiasm, arouse communities and state to a pitch of frenzy, then subside from the very violence of their exertions and are shelved and lost in voluminous resolutions, and pigeonholed by committees without any further action. Of what use are resolutions without action? What good would have resulted from the immortal Declaration of Independence had it not been followed up by immediate concerted action?

The Aunt Dolefuls are full of their woeful prophesies of dire results that are sure to come from the faultless weather that we are now having, and have had all this month. Some people can never see unusual happiness or prosperity, or even beautiful weather, without filling the world with their fears and complaints of calamities that are sure to follow. What if we do have some rains and storms and colder weather in the month to come, will there not be some compensation in the enjoyment of the present, and the knowledge of days of gladness that are sure to follow in their wake?

BRIGHTEN UP

You have the feeling, we know how it is every Spring  
You are going to Brighten Up the house with a new coat of S. & W. paint. Now just a word under heading of DON'TS.

DON'T use over ochre where mixed with boiled linseed oil.

DON'T use over a surface that is wet or frosty.

DON'T use over a surface covered with smoke and grease.

DON'T use over green or pitchy lumber.

DON'T use over another coat of paint that is not thoroughly dry.

DON'T use boiled oil for thinning.

Here we have a few DO'S to remember.  
Use only S. W. primer or S. W. paint as first coat  
Remember both must be thinned with RAW oil.

Fill wood with oil and prevent scaling and pulling.  
If old wood, be sure the old loose paint is brushed off  
Remember to call for color card and study the instructions. And, above all things don't forget the brand, S. W. P. It has stood the test for 40 years,
