 Twin babies were born to Mr. and Mrs. Earl Hamilton, of West Roseburg, Sunday. They were a boy and a girl. Monday afternoon the boy died. The mother and other child are getting along quite well.
 Chat. H. Smith, representing the Polow Amusement Co., is in the city arranging for a grand carnival here in June. On account of being unable to get Roseburg in time to meet with the strawberry carnival committee, Mr. Smith was unable to arrange to bring his fine attractions here for that event, much as he would have liked to have done so. His company has three car loads of parphnalla which they use in their carnivals and are at present showing at Watsonville, Cal. From there the company will work northward.

 A. S. Bennett, democratic candidate for governor, is in the city and was being introduced by Circuit Judge Hamilton. Both gentlemen gave the News office a pleasant call. Judge Bennett is a very courteous and agreeable man, and like all other candidates is strongly in favor of economy and tax regulations.
 Real estate in this city is beginning to move, as the sale of the Tim Carls home on Mill street to Mr. Clarke is reported, as was also the rooming house on Brockway street formerly owned by F. P. Hill, which was bought by F. P. Guest. This is

Your Telephone Expert

THE switchboard operator who answers your telephone call has a mission in life—her mission is to serve you. She has at her finger tips the most modern telephone equipment in the world. Quickness, accuracy and courtesy are her essential qualifications.

Frequently she is called upon to act quickly in emergencies when courage and presence of mind are required.

It is essential to good telephone service that each Bell Telephone operator should be healthy and happy as it is that every part of the equipment of that great inter-communicating system should be in good working order.

In the Bell system, 70,000 operators make connections which furnish clear tracks for 26,000,000 telephone talks each day.

 We have just received a fine lot of English walnut grafted on black walnut roots. We are offering these at very reasonable prices. Roseburg
 The method of the Montessori system of teaching children between the ages of three and six years, has been given careful attention by leading educators of this and foreign countries, ever since public notice of its worth was shown by investigations of the parent school in Italy a few years ago. The intrinsic merits were recognized at once and have been widely adopted over all civilized countries since. The Montessori method, as is well known, aims first at the education of the senses, which is most easily acquired during the formative period between three and seven years of age. It is based on the fact that every child differs from every other child, and for his fullest development his individuality should be encouraged. Children trained by this method have the advantage of better bodily control and will power, of greater muscular quickness and mental ability.
 It has been rumored that a class of this method might be started in this city, especially in view of the fact that Mrs. G. E. Ehrman, who is at present a resident here, is eminently qualified to give the instructions. It may not be generally known that Mrs. Ehrman is the daughter of Mrs. Frederick Schoff, president of the National Congress of Mothers and Parent-Teachers Associations, and formerly taught in one of the leading private schools of Philadelphia. In case that this lady decides to install a school of this method in Roseburg, there is little doubt that it would obtain encouragement and would be a success.

Alfalfa Talks to Farmers

Many farmers have been led, through the excitement produced by alfalfa trains and other promotion methods, to plant alfalfa when they never should have attempted it, according to hay specialists of the department of agriculture. These experts feel that there has been unnecessary amount of talk about alfalfa and too little attempt to demonstrate the limitations that exist with reference to growing that crop.
 As a result the department while it is helping farmers to cultivate alfalfa and other leguminous plants by preparing bacterial cultures, it also cautions its demonstration agents to teach the farmers to grow alfalfa where it is desirable to have it taught and where there is promise of success. These demonstration agents are particularly warned unless the climate and other conditions and the soil fully warrant the experiment not to encourage individual farmers to grow alfalfa.
