Hundreds of Citizens Gather to Express Indignation.

**REMARKS MADE ALL FOUNDED ON FACTS** 

City of Duluth Grasped Opportunity Offered By The Steel Trust and Has Nearly 100,000 People Now. 1.

oBtween four and five hundred men and women of this city gathered the corner of Cass and Jackson streets last evening in response to the call issued by a number of the progressive citizens of this city to pended their salaries for the neces protest against the action of a few 'heavy taxpayers" of this city in their action in trying to block the recent bond issue. It was in the na-ture of an indignation meeting and showed clearly the attitude of the U. S. DIPLOMAT showed clearly the attitude of the more progressive citizens and the contempt in which they hold those rew who by legal technicalities and litigation would prevent the majority of people from carrying into effect the most beneficial move ever at tempted in the history of the city.

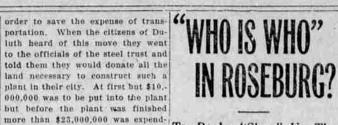

Hon. B. F. Jones presided at the meeting and in a few brief remarks. told of the cause of the gathering. Charles F. Hopkins had been asked to speak on "The bond isue from the laboring man's stand point". He pictured the conditions as they existed in the city at the present time. Laboring men out of work with no immeldate prospects of better con.

ditions, "honest sons of toil" leaving the city for the harvest fields of eastern Oregon and Washington where they secure temporary smployment. The speaker made the assertion and rightly too, that a great majority of the laboring men had ment more money for living necesties during the past six months than they bad earned and the chances were that the same condition would exist during the next six months unless something was done to relieve the situation.

Mr. Hopkins stated that he had spent the greater part of his life in Duluth, Minn., which at that time was a city of 25,000 people. A number of years ago the steel trust decided that instead of hauling the iron ore of the Lake Superior country to Cleveland and Ashtabula to smelt, it would build a plant at Duluth in

PETROGRAD, July 23,--- The great battle for the possession of Warsaw has now entered the decisive stage. South of Vistula, the Russians have withdrawn to strongly fortified positions extending from Novo Georglevsk to Ivangorod, 50 miles to the southwest. Along this line the Slavs have checked the forward rush of the enemy, inflicting heavy losses. To the north of Warsaw, the forces of von Hindenberg are being held along the Narew river. The roar of the guns 13 miles away can be plainly heard in Warsaw. The belief per-sists in Petrograd that Wars w cannot be captured.

Late dispatches declare that the fighting is within eight miles of the railway, and is entering the decisive stage. From the German View.

BERLIN, July 23 .- The fall o

Warsaw appeared imminent. The city is nearly half surrounded by German forces at an average distance of less than 15 miles, while three railroads leading into the city from armies, the official dispatches said. Rumors that the main body of Russlans were preparing to occupy it were circulated but were not credited. Critics believe that a great bat tle in the jungle defenses about the city will precede the capture, unless the Teutons advance from the southeast attains an unexpected momentum.

This road for a great many years has been a night-mare to the residents and the county court has been appealed to time and aagin to make some sort of repairs upon it but for one reason or another it has been delayed until a short time ago when county engineer Frank Cain was instructed to make a survey of the road and figure an approximate cost of the planking of it.

This work was commenced a couple of months ago and several lines run, after which one was decided upon which has for the steepest grade, and which is for only a distance of 500 feet a 7% per cent grade. The rest of the road is less that 6 per cent.

The county court let the contract yesterday to Shell and Shell, of Medford for the sum of \$9,000. They have the privilege of using the county grader in doing the work. The work is to be done by the 15th of October.

The contract calls for a 9-foot road of planks 3 inches by 12 and when completed will be one of the best pieces of construction work in the county. All hills have been oliminated which will allow the hauling of much heavier loads than have ever been hauled over the road before.
