**DRINK A GLASS OF REAL HOT WATER BEFORE BREAKFAST.**

Says we will both look and feel clean, sweet and fresh and avoid illness.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its untiring research is the recommendation that it is necessary to attend to internal sanitation of the drainage system of the human body as it is to the drains of the house.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the phosphated hot water is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble, rheumatic stiffness; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of internal sanitation.

John B. Hammon, of Clatsop and John McTomin, of Clatsop, captured a live cougar in the Grayback country on Tuesday morning. The cat was freed Thursday night and was in the tree until morning by the time when she was climbed and a rope slipped over the cougar's neck. The animal was caged and taken to the railroad for shipment—Medford Mail Tribune.

Some people may think they are paying pretty stiff prices for certain kinds of merchandise on account of the war, but a glance at the prices paid for all manufactures of cotton during our Civil War will show what effect the war had on staple goods then. One of the dry goods merchants in the city received a copy of a bulletin issued in Augusta, 1864, by the great firm of Claflin, in New York, in which the wholesale prices are given as follows, with the warning that further advances might be expected: American calico was quoted at 45 cents per yard, Amoskeag apron checks, 45 cents; four quarter brown sheeting, 72 cents; Hope yard wide bleached muslin, 61 cents; ten quarter sheeting, bleached, \$1.00; bed ticking, 30 to 75 cents; dress gingham, 48 cents; Coats thread, \$2.00 per dozen. From these prices it can be seen that a man needed a barrel of money when he went into a dry goods store to purchase supplies for the family.

Walter Winans, Esq. The most famous shot in Europe with hand and shoulder arms.

**Two World's Records in One Day with the .22 Savage Hi-Power**

At the Bisley Matches of the British National Rifle Association—the biggest rifle match in the world—the .22 Savage Hi-Power rifle and Savage ammunition in the hands of Mr. Walter Winans on July 25, 1914, made the highest possible score on the Running Deer target—six straight 5's. This is a World's record.

On the same day, with the same rifle and ammunition, Mr. Winans made the highest possible score on the Running Wild Bear target—six straight 5's. Another World's record.

This merely clinches what other shooters have proved—that the Imp's wonderful accuracy (15 consecutive shots in a 20-inch circle at 500 yards), tremendous velocity (2300 feet—more than half a mile—a second), long point blank range (5000 yard trajectory less than three inches), and trifling recoil (4.5 foot pounds) make it easier to hit moving game with than any other rifle.

And it has killed Alaskan Brown Bear, Grizzly, Buffalo, and man-eating tiger, besides the deer and black bear it was originally designed for.

Write us for particulars about "the biggest little gun in the world."

**S. P. COMPANY MAKES ROUND TRIP RATE**

It will be gratifying to the transportation committees of both the Old Fellows convention and the Carnival, to hear that the S. P. Company, with its usual liberality and endeavor to make convenience for its patrons, has decided upon a flat one and one-third fare for both of the above events in Roseburg next May.

The notice to this effect was received by L. B. Moore, the local agent, this morning, and the rate will be from all stations on the line in the state, including Klamath Falls and Newport. The date of buying is from May 14 to 20, with the return limit the 22nd. This will give an opportunity for purchasers to remain over the I. O. O. F. convention and return home the following Monday if they desire. It also obviates the necessity of paying full fare one way and taking a receipt which entitles the holder to one-third fare returning.

**NOTICE TO CHURCHGOERS**

After attending Sunday services take your dinner at the Umpqua hotel. A special chicken dinner served every Sunday for 50 cents. 297-m3
