

P. A. puts new joy into the sport of smoking!

YOU may live to be 110 and never feel old enough to vote, but it's certain-sure you'll not know the joy and contentment of a friendly old jimmy pipe or a hand rolled

cigarette unless you get on talking-terms with Prince Albert tobacco!

P. A. comes to you with a *real reason* for all the goodness and satisfaction it offers. It is made by a patented process that removes *bite and parch!* You can smoke it long and hard without a come-back! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Prince Albert affords the keenest pipe and cigarette enjoyment! And that flavor and fragrance and coolness is as good as that sounds. P. A. just answers the universal demand for tobacco without bite, parch or kick-back!

Introduction to Prince Albert isn't any harder than to walk into the nearest place that sells tobacco and ask for "a supply of P. A." You pay out a little change, to be sure, but it's the cheer-fullest investment you ever made!

Prince Albert is sold everywhere in tippy red bags, 5c; tidy red tins, 10c; handsome pound and half pound tin, 40c—and that clever crystal-glass pound humidor with sponge-moistener top that keeps the tobacco in such splendid condition.

CROP CONDITIONS

Following is a summary of the crop conditions in Oregon for the week ending May 23, 1916, as reported to the local office of the weather bureau by special correspondents throughout the state:

The week just closed was generally cool and showery throughout, although the opening and closing days were mild and favorable. Agricultural operations as a consequence were somewhat interfered with as the ground in the western countries was too wet for working. Farm work progressed in most eastern counties and summer following is nearly finished. Seeding also has been practically completed. Winter wheat and alfalfa made fair growth, but the cool weather retarded the growth of spring wheat, oats, barley, corn and garden truck. Pasture is good and stock are thriving.

The frosts and freezing temperatures of the preceding week are found to have caused considerable injury to fruit in extreme southern and eastern counties and indications are for a light crop of peaches and a fair yield of cherries. Reports on the apple crop from southwestern counties were not received.

The rains have saturated the ground in many sections and under the mild influence of the opening days vegetation made noticeable advancement. What is needed now is higher temperatures with plenty of sunshine.

Acting District Forecaster.

In the soft twilight, or as the deeper shadows gather, the song of "Juanita" always seems to soothe. The gifted authoress of this popular song was Mrs. Norton, a granddaughter of the famous Richard Brinsley Sheridan, born in England in 1808. Her songs of "Bingen on the Rhine" and "Juanita" were very popular. She died 1877 and lived to hear the echoes of her plaintive "Juanita" come to her from nearly every civilized country in the world.
