

Where will you find the equal of this car at its price?

Take the item of room. The new Mitchell Jr. five passenger light six is a car of 120-inch wheel base. This is five inches longer than most other light sixes. This extra wheel base is put into extra leg room in front and rear. It also enables us to make wider seats without disturbing the harmony of appearance.

FINISH FINE BY MEAT. The Mitchell body is not only a double cow pure steam line body of unquestioned beauty but we are adding to its attractiveness by fitting the finish by best in large ovens constructed for that purpose.

LONG SPRINGS MAKE EASY RIDING. Our long wheel base enables us to give you an extra long, comfortable spring. 59 inch in the Mitchell Jr. and 61 inch in the seven-passenger Mitchell.

EXTRA DRIVING COMFORT. The new Mitchell is the same of easy driving. The gear shifting is accomplished with little effort. The change is made with but a movement of a few inches of the shifting lever. Our steering gear is full worm type and irreversible. Our steering knuckles are carried on ball bearings.

A REMARKABLE POWER PLANT. In the Mitchell we are giving you an economical, efficient power plant. The Mitchell engine is an I. head engine with all parts enclosed and running in oil. The electric equipment is two unit type and gear driven.

UNUSUAL EQUIPMENT. Mitchell cars are not only equipped with one-man top, clear view windshield, but they carry reversible lamps, power tire pumps and the like. The Mitchell is really completely equipped.

REGARDING PERFORMANCE. This is our high card. If you wish to know how the Mitchell will hold, how slow it will start, how high gear and how it performs, just call on us and let us put it through its paces.

You Can't Begin too Soon

To bring the influence of music into the lives of your children. Why not begin now—by investigating the Cable-Nelson Piano? See our here today. Tone, action, design and matchless finish will win you immediately. Seven separate and distinct coats of varnish make these pianos lastingly beautiful. The sound-board is one of the big features of the Cable-Nelson. It is made of 100% spruce which is almost identical with the Spruce of the Tyrol Alps used in Italian violin making. Hence the rich, pure, ringing tone for which Cable-Nelson is famous. The price is right, too. The only pianos that can be bought at a saving without a corresponding sacrifice of service. Come in and try a

SPUDS GALORE BY INTENSIFIED PLAN

Kansas City Man Raises Potatoes in a Pen Successfully.

IS PHENOMENAL YIELD

In Little Pen 6x8 and Six Feet Deep Thirty-Five to Forty Bushels Are Produced.

Mr. E. A. Burroughs, of Greens, recently sent in a clipping from an eastern paper describing a new method of raising potatoes after an intensified system. The method is vouched for by the Kansas City Star and it is understood that a Chicago farm paper has endorsed it. We quote as follows, and perhaps some one will try it out:

Kansas City, April 10.—Hundreds of letters and personal visits to R. E. Hendricks, 2636 Elmwood avenue, by persons seeking additional information as to the construction and management of "potato pens," described by him in a letter recently printed, show such an interest in his revolutionary scheme to grow potatoes in quantities in a limited area that the Star herewith presents with more detail the plan he has proved successful for many years.

Plan a potato pen 6x8 feet on the inside ground measurement and six feet high. If desired, the length of the pen may be any multiple of eight feet. This plot selected is to be made into one large potato hill, the sides supported by a loosely constructed pen, built like the old rail fence, of 2x4 or any similar sized timber, firmly supported by posts. Rich earth, or earth and manure, must be at hand sufficient to fill the pen to the top.

Lay out the plot of ground and divide by five equally spaced longitudinal lines and seven crosswise lines, placing a potato eye at each intersection of the lines on the surface of the ground. Cover these with six inches of earth; mark as before and again place potato seed. Cover these with six inches of earth; mark as before and again place potato seed. Cover these with another six inches of earth and repeat the operation until 12 layers have been placed, the pen having been built as the earth was piled up.

As the pen rises, insert in the center of the side, three feet above the ground, a piece of timber three feet long and about the diameter of the arm, leaving an end protruding so that it may be loosened and withdrawn. In dry weather this is to be taken out and the moisture of the center of the bed determined by inserting the arm in the hole.

The top layer of earth should be sloped gently toward the center so that the mound will absorb and not shed rain, but care should be taken that mud be prevented from forming on the top and baking into a crust. When the earth is dry the mound should be sprinkled on top and sides.

The potato vines will grow both to the top and the sides of the pen emerging through the crevices at the sides and concealing the timber. Loose straw or leaves may be piled against the sides of the pen to prevent the earth from running out of the interstices. When the potatoes are matured the pen may be torn down and the potatoes rolled out of their thin covering of earth with a rake, thus preventing cutting them, as frequently happens when they are dug from hills.

Kansas City, Mo., April 16, 1917. Mr. E. M. Poston, Columbus, Ohio.

Dear Sir: Question 1. How many years have you built these potato pens? Ans. Three years with success.

Question 2. What is the average annual output of potatoes in one of these pens? Ans. In a pen 6x8 feet I took out 42 bushels first year, 34 bushels the second year and 42 1/2 bushels the third year.

This pen, we will say, is 6 feet by 8 feet by 6 feet high, has 35 hills of potatoes to each 6 inches. Lay off the first layer in 1-foot squares. Plant a potato on each cross line; put about one inch of well rotted manure on the potatoes, then wet this layer of manure well; then six inches more of dirt then mark off again as before, plant again, put one inch of manure and wet again, and so on as high as you like. A "moist tester" a piece of wood 3 feet long should be placed at the side of the middle row about two feet above the ground on one side as you build up the earth. After the potatoes have been planted three weeks pull the "tester" out and put your hand in and examine the moisture of the dirt in the pen. After the "tester" is once out this can be repeated once or twice a week; by so doing you can tell how much water to put in the pen. This potato pen should be built

CASTORIA For Infants and Children In Use For Over 30 Years Always bears the Signature of J. C. Watson

near a water supply so that they can be well watered during dry weather. Wishing you success, I am, (Signed) R. E. HENDRICKS.

NOTICE OF EXAMINATIONS.

The following program will be observed: Thursday—Arithmetic, Writing, Language, Agriculture and Spelling. Friday—Physiology, History, Geography, Civil Government and Reading.

O. C. BROWN, County School Supt.

GARDENS ATTRACT THE STRAY COWS

The News office this morning received a phone call from a resident living just outside of the city limits. They stated that of late much difficulty had been encountered near their home with stray cows that seem to have an "eye open" for back yard gardens. It seems as though some method could be arranged in which this nuisance could be done away with, as we all know it is very unpleasant to awake early in the morning and find several "brindle" cows "wading" through the rows of planted seeds. Some way will probably be devised in the near future either by the officers or the residents troubled so that gardens may be planted and allowed to grow without being molested by wandering cows.

PRIZES ANNOUNCED FOR AUTO PARADE

The parade of decorated automobiles will be given on Thursday afternoon, May 17, immediately after the crowning of the queen, probably about three o'clock. The place of formation has not been announced but it is expected that it and the line of march will be as usual.

After careful consideration and conference with the automobile committee as well as with car owners the general committee has decided that to maintain equality in competition between cars decorated in artificial flowers and those on which natural flowers are used the judges will be instructed to consider not only appearance, but design and labor involved.

Floral decorations may wilt somewhat before passed on by the judges and would therefore be at a disadvantage. The paper decorations would profit by reason of being more durable, therefore the decision to consider design, and labor expended, as well as final appearance.

The prizes will be as follows: Touring cars—first prize, 1 barrel Zerolene donated by Standard Oil Co., or \$25 in cash; second, \$15; third \$10. Roadsters—first, \$15; second \$7.50. For most original decorations, \$7.50.

In addition to the above several agents have promised prizes for the best decorated car of the makes they represent. These will be announced later.

SOUND PURE BRED STALLION.

Aguinaldo, No. 56135, will make the season at Judd's barn, Roseburg, Tuesday noon to Wednesday noon of each week. Terms \$15 to insure. 173-14 S. H. CHOY.

LETTER RECEIVED BY COMMERCIAL CLUB

As a part of the campaign which the National American Woman's Suffrage Association is making for women workers who will be introduced in increasing numbers, in the factories and business houses to fill the places of the men who leave for war, the Roseburg Commercial Club is in receipt of a letter from Mrs. Carrie Chapman Catt, president, urging that in this community every effort be used to conserve the women workers by keeping their hours of labor within eight hours per day and by giving them the same pay which men filling the same positions have received. The necessity of women supporting families in the removal for fighting purposes is urged as an obvious reason for granting pay equivalent to that which men doing the same work receive. The national association with its two million members have set on foot action to increase and conserve the food of the nation and have offered the services of their organization for the use of the nation.

NOTICE OF ANNUAL MEETING.

The annual meeting of the stockholders of the Umpqua Valley Fruit Union will be held in Roseburg, Oregon, on Saturday, May 19, at 2 p. m., at which time a resolution will be offered to amend the by-laws to increase the number of directors from seven to nine, and a report of the year's business will be submitted. Other important business will be transacted and a full attendance of all fruit growers is requested. UMPQUA VALLEY FRUIT UNION, 175-118 By S. D. Cooley, Sec.
