

This is the Time for Every Citizen to Support the United States Government

Many are doing so at considerable cost or sacrifice to themselves.

We have joined the Federal Reserve Banking System established by the Government to give greater financial stability and strength to the member banks and protection to their depositors. You can give your support to this great Government enterprise and also obtain its protection for your money by becoming one of our depositors.

THE ROSEBURG SANITARIUM

For years scientists have known that the sun's light was the most potent agent of destruction that could be employed in the war against tuberculosis. Germs exposed to the rays of the sun were instantly killed; but to apply this wonderful power in a practical way has been the "stumbling block". The "extreme light" the X-ray has been used without success, for while it succeeded in destroying some of the "germs" the intense heat burned the tissue, and thereby furnished "virus" or new food for the remaining "germs" to thrive and multiply upon, really making the second condition worse than the first.

After years of experimenting and a careful study of tuberculosis, I have succeeded in perfecting an apparatus in the form of an electric cabinet that will do all that has been credited to the sun's rays, the application of which causes no discomfort to the patient.

The cabinets are made of metal, absolutely air tight with a "dead air" space between the inner cylinder and the outside shell, the inner partition is lined with very bright metal and illuminated by scores of incandescent lamps, the light reflected against the area of the circle multiplies the power of penetration many times, the interior of the cabinet is so bright that it renders the body transparent, tubercular germs can find no place to secrete themselves from the strong rays of light, are killed, flushed into the blood and carried away by an increased circulation stimulated by the heat. The broken down tissue rebuilds, the lacerated parts soon heal, nature reasserts herself and with proper care and nourishment the patient rapidly recovers.

What this wonderful discovery does for tuberculosis it can also do for chronic disorders of the kidneys, liver and bladder, Rheumatism in its many malignant forms succumbed to its seemingly magic power.

My offices, Turkish bath, massage and treatment rooms are now located in the Perkins building, Rose-

Total deficiency from September 1, 1916	7.05
Average precipitation for 33 wet seasons, (Sept. to May inclusive)	32.12

WILLIAM BELL, Observer

RESTAURANTS ARE EXAMINED TODAY

The council investigation committee was well pleased with the result of the examination made today of the many restaurants of the city, the sanitary conditions having improved wonderfully over any previous investigations made.

The only fault found was in the construction of the buildings in several places and this will be ordered changed by the committee within a short time. In a few places it was found that the restaurant employes were careless in leaving food covered and also allowed crumbs and scraps of food to remain on the floor as an attraction to flies, but there is no doubt but that this will be remedied as soon as it is called to their attention.

In every place it was found that the terms of the ordinance have been observed in nearly every way and those making the examination were exceptionally well pleased and commended the restaurant keepers highly. The same conditions exist in bakeries and confectionaries which were also investigated.

RESOLUTIONS ARE ADOPTED BY W. C. T. U.

In keeping with White Ribbon week, the W. C. T. U., held four mothers' meetings and at each of these the following resolution was unanimously adopted:

WHEREAS, the conduct of the boys and girls in Roseburg has been such that our mayor, the Honorable Napoleon Rice has deemed it necessary to appeal to the parents to gain the confidence of their children that they may know in what manner they are spending their evenings; therefore, be it

RESOLVED, that we, the members of the W. C. T. U., pledge our hearty support to the mayor in his position on this vital question and urge the parents of Roseburg to heed his timely warning.

BEGIN HOT WATER DRINKING IF YOU DON'T FEEL RIGHT

Says glass of hot water with phosphate before breakfast washes-out poisons.

If you wake up with a bad taste, bad breath and tongue is coated; if your head is dull or aching; if what you eat sours and forms gas and acid in stomach, or you are bilious, constipated, nervous, sallow and can't get feeling just right, begin inside bathing. Drink before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it. This will flush the poisons and toxins from stomach, liver, kidneys and bowels and cleanse, sweeten and purify the entire alimentary tract. Do your inside bathing immediately upon arising in the morning to wash out of the system all the previous day's poisonous waste, gases and sour bile before putting more food into the stomach.

To feel like young folks feel; like you felt before your blood, nerves and muscles became loaded with body impurities, get from your pharmacist a quarter pound of limestone phosphate which is inexpensive and almost tasteless, except for a sourish twinge which is not unpleasant.

Just as soap and hot water act on the skin, cleansing, sweetening and freshening, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels. Men and women who are usually constipated, bilious, headachy or have any stomach disorder should begin this inside bathing before breakfast. They are assured they will become real cranks on the subject shortly.

Delightful Decollete

Or, in other words, beauty unadorned. To be even more explicit, Gloria Swanson (left) and Peggy Pearce, of the Mack Sennett-Keystone company, showing the high cost of living by wearing what is most becoming—nothing. Of course, if the pictures had been longer we would have had to write a different type-line; but, as you observe, they weren't.

LIBERAL GRANGE PRIZE IS OFFERED

The prize essays to be submitted by members of the Douglas County Granges on the subject of "Why I Believe in Bonds for Road Construction," should be in the hands of the committee at once that they may be properly judged.

The subject of the essay is to be "Why I Believe in Bonds for Permanent Road Construction." These essays are to be judged more for the soundness of their reasoning than for their literary form. They may be short and must not be over 1500 words long. They should be in the hands of B. W. Strong, Roseburg, on or before the 15th of May, which means that there is no time to lose.

The prize offered to the writer of the best essay on this subject is a two-days excursion from Roseburg as follows: From Roseburg to Medford by train; from Medford south by auto over the new paved Pacific highway through Talent to Ashland, visiting the famous Little park and springs at Ashland; from Ashland south over the Pacific highway over the summit of the Siskiyou mountains to the California state line and return to Medford and Roseburg. This Siskiyou mountain trip is over one of the finest mountain highways in the west and this trip as a whole will be the best kind of an argument for permanent road building. There should be hundreds of essays submitted by Grangers in this contest. This trip is offered by Representative Charles A. Brand with the thought that it will give the Grangers a chance to express themselves on the matter of bonding for roads. Some of the Grangers have said that they were in favor of the big bond issue and some have said that they were opposed to bonds, but thus far have given no real reason. This essay should be a brief, concise statement of the reasons for building permanent roads by increased taxation. It also makes it possible for the winner to see the best argument for paved country roads that there is, viz., a trip over the roads themselves. One or more of these essays will be published in the Douglas county and Portland papers. Remember, they should be in by May 15.
