BE PRETTY! TURN GRAY HAIR DARK

Try Grandmother's old Favorite Recipe of Sage Tea and Sulphur.

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays, by asking at any drug store for "Wyeth's Sage and Sulphur Compound" you will get a large bottle of this famous old recipe, improved by the addition of other ingredients, for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, glossy and attractive.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite for those who desire dark hair and a youthful appearance. It is not intended for the cure, mitigation or prevention of disease.

THE ROSEBURG SANITARIUM

For years scientists have known that the sun's light was the most potent agent of destruction that could be employed in the war against tuberculosis. Germs exposed to the rays of the sun were instantly killed; but to apply this wonderful power in a practical way has been the "stumbling block". The extreme light the X-ray has been used without success, for while it succeeded in destroying some of the "germs" the intense heat burned the tissue, and thereby furnished "virus" or new food for the remaining "germs" to thrive and multiply upon, really making the second condition worse than the first.

After years of experimenting and a careful study of tuberculosis, I have succeeded in perfecting an apparatus in the form of an electric cabinet that will do all that has been credited to the sun's rays, the application of which causes no discomfort to the patient.

The cabinets are made of metal, absolutely air tight with a "dead air" space between the inner cylinder and the outside shell, the inner partition is lined with very bright metal and illuminated by scores of incandescent lamps, the light reflected against the area of the circle multiplies the power of penetration many times, the interior of the cabinet is so bright that it renders the body transparent, tubercular germs can find no place to secrete themselves from the strong rays of light, are killed, flushed into the blood and carried away by an increased circulation stimulated by the heat. The broken down tissue rebuilds, the lacerated parts soon heal, nature reasserts herself and with proper care and nourishment the patient rapidly recovers.

What this wonderful discovery

does for tuberculosis it can also do for chronic disorders of the kidneys, liver and bladder, Rheumatism in its many malignant forms — succumbed to its seemingly magic power.

My offices, Turkish bath, massage and treatment rooms are now located in the Perkins building, Roseburg, and I have leased the Herrington house, West Douglas street, as temporary quarters for my sanitarium.
