

Patriotism and Business

Every good citizen at this time should do his share toward strengthening the Federal Reserve Banking System which our Government has created with its billion dollars of resources to stand back of its member banks and all their depositors.

You can contribute directly to the strength of this system, and at the same time secure its protection by depositing your money with us, since part of every dollar you deposit with us goes directly into the new system, where it is always ready for you when wanted.

This is a suggestion for prompt action.

Work on Farms.
Now that vacation for the schools is near at hand, it is thought that a large number of the older boys will accept positions on the farms of the Umpqua Valley. A census taken in the high school several days ago was for the express purpose of enlisting the students for such labor and although no returns have been filed to date, it is sincerely hoped by all that some action will be taken by those students who have not joined the national guard. To work on a farm these times is considered as patriotic an enlisting in the regular service of the nation.
